REGIMEN SANITATIS

REGIMEN SANITATIS

THE RULE OF HEALTH

*A Gaelic Medical Manuscript of the Early Sixteenth Century
or perhaps older*

FROM

THE VADE MECUM OF THE FAMOUS MACBEATHS

PHYSICIANS TO THE LORDS OF THE ISLES AND THE KINGS OF SCOTLAND
FOR SEVERAL CENTURIES

BY

H. CAMERON GILLIES, M.D.

DEDICATED TO JOHN FOURTH MARQUIS OF BUTE

PRINTED FOR THE AUTHOR BY

ROBERT MACLEHOSE & CO. LTD.

UNIVERSITY PRESS, GLASGOW

1911

DEDICATED TO
JOHN, FOURTH MARQUIS OF BUTE
AN T'-OCHDAMH IARLA BHÓITE

PREFACE.

THIS is the first definite effort to restore our old Gaelic Medical Manuscripts which have lain unknown for so many centuries.

From the national-historical point of view the Text is very interesting, while from the medical-historical it is even more so, and from the scholar's point it must be of distinct importance. I have tried to keep my eyes open in these three directions.

I have been impelled to endeavour to do this work from a strong feeling that it ought to be done—that it was indeed, for long years, calling to be done. My instinctive devotion to my native language and the exceptional combination, with that, of my Medical training and my very big experience, seemed to make the call imperative that I should undertake the work, for this necessary combination in the life of one person does not occur very often.

I was also encouraged by the patriotic sympathy and enthusiasm of a nobleman who does his heredity full honour by showing his keen interest in the tradition and literature of his race, and particularly in the direction which this effort so far realises.

Very much remains to be done in this way, and it must be undertaken soon, because some of these MSS. are very far gone in decay—especially those written on paper. This work may encourage, as it certainly will assist, such as may wish to work in this field.

Hearty thanks are due to the Publishers, who did this difficult work sympathetically and admirably.

LONDON, *December* 1910.

INTRODUCTION.

THIS tract *Regimen Sanitatis* or the Rule of Health is from a Gaelic Medical Manuscript which I found at the British Museum. The MS. (catalogued as Add. 15582) consists of sixty-two vellum folios, the same size as is here reproduced. The cover is skin-covered board ornamented by simple straight-line devices. The front board has two sides of the original pair of silver clasps still attached, the other parts are wanting. The vellum is in a very fair state of preservation, and the writing, as may be seen from the photographic reproduction, is quite legible. Without doubt this book belonged to John MacBeath, one of the very remarkable family of that name who were hereditary physicians to the Lords of the Isles and to the Kings of Scotland for several centuries. The volume remained in the MacBeath family for many generations, but how it found its way into England, I fear, cannot now be surely known. The only indication is that it was "purchased of Thos. Rodd 9th August 1845"—by the Museum—but how it came into Rodd's hands is not known. There is another MacBeath book also lying here (catalogued as Add. 15403), a smaller vellum treating of *Materia Medica*. It also was got through Rodd, a well-known London bookseller who took up his father's business in 1821, and died 1849. In this volume, on inserted paper leaves in the front, occur these statements: (1) "Presented by Sir Wm. Betham [to the Duke of Sussex ?] May 24th 1827—MS. on Botany in the Irish character"; (2) "Purchased at the Sussex Sale 31st July 1844 by Thorpe and of him (through Rodd) for B.M. 10 Aug. 1845." It is very likely that the two volumes came by the same way, so

far. Sir Wm. Betham was Keeper of the Records of Dublin Castle from 1805 onwards until he was made Ulster King of Arms in 1820. He was devoted to philology and to the Gaelic language especially, and wrote extensively upon Keltic subjects. He died at Blackrock near Dublin in 1853. The Duke of Sussex (1773-1846) was sixth son of George III. and a president of the Royal Society.

THE MACBEATHS.

The only methodical attempts as yet made to endeavour to get the long history of this family into anything like order have been (1) by Professor Mackinnon in two valuable articles written to the *Edinburgh Medical Journal* in 1896, (2) by myself in an essay written for the Caledonian Medical Society in 1902, published in the Society's *Journal* for April of that year, and (3) by Professor Mackinnon again upon "The Genealogy of the MacBeths or Beatons of Islay and Mull," which was published in the same *Journal* (*C.M.J.*) in July of the same year. I here summarise these efforts, and try to get them into such order as I may be able to—with any additional facts I may have lately culled. This will give a more direct and intelligent interest to the text than could be possible without it. It will also serve as a basis for further investigation and addition.

The name MacBeath (as I here prefer it) is very variously written in the old manuscripts and in books. It is Mac-bead, *Book of Deer* 11th cent., M'Betha 1408, Beatone 1511, Meg Beth 1563, Micbhethadh 1587, MacBeath 1609, Beatoun 1638, M'Bethadh 1657, Betonus 1674, Bettounus 1677, Beda 1680—but older far—Maighbheata 1701, Maig Bhetha 1708. In the MSS. of the Advocates' Library the dates of which are not yet fixed, it occurs as Betune II, Meigbetadh IV, Maighbheata V, Magbeta XX, Makbetathe, M'Veagh Beattoun and Beattounne XXI. It has become Pendan (Peden) in Skye and Biotun in Mull. Bethune also occurs associated with the MacBeaths, but as this

family is said to have come from Fife it is doubtful if they were at all related in name or blood. There may have been an overlapping or an intermixture of the names, but the basic name is that given.

The true forms of the family name, such as Bead, Beda, Macbheatha and Macbheathadh, mean "Son of life," following a very old form of Gaelic naming, perhaps the oldest, many others of which remain with us to the present day.

Other important facts relating to this family are, in—

1379. Farquhar (medicus regis) had a grant from Prince Alexander Stuart ("The Wolf of Badenoch") of the lands of Melness and Hope, and in—

1386. Ferchard Leiche, "Farquhar the physician," got in heritage from King Robert II. the islands of Jura, Calwa, Sanda, Ellangawne, Ellanwillighe, Ellanrone, Ellanehoga, Ellanequochra, Ellanegelye, Ellaneyefe, and all the islands between Rowestoren-astynge and Rowearmadale—Rudh' a' Stóir an Assaint and Rudh' Armadail.

1408. Fercos Macbetha witnesses, and almost certainly draws, a deed of land-grant in Islay to "Brian Vicaire Mhag-aodh" from "McDomhnaill"—the Macdonald of the Isles who led the Highlanders at the battle of Harlaw, 24th July, 1411. His father, John, Lord of the Isles, was married to Lady Margaret Stuart, daughter of Robert II. This deed is reproduced in *Nat. MSS. Scot.* Vol. ii. No. lix., and in *The Book of Islay*, and in the *C.M.J.* for April, 1902. The lands here granted are situated in the Oa extending across from Kilneachtain to Laggan Bay.

1511. Donold M'Donachy or M'Corrachie (simply the same name mis-written because most likely mis-spoken), "descendit frae Farquhar Leiche," resigned the lands of Melness and Hope and all the lands of Strathnaver, in favour of the Chief of the Mackays. Donnachadh (Duncan) was a favourite name with the MacBeaths, and the M'Donachy, M'Corrachie (for MacDhonnachaidh) and the Connachers of Lorn are one and the same name. Donchad M'Meic Bead occurs in *The Book of Deer*.

Duncan Conacher wrote a medical work at Dunollie in this same year, which is still extant.

In 1511 a David Beatone was among the "Nomina incorporatorum" of the University of Glasgow, and from that time onwards through three centuries the Roll contains such names as Johannus Beatonus, Fergus Betonius, Duncan Beatonus, Donaldus Beatonus, etc.

1563. Another Tract of this same MS., mostly surgical, was written for John MacBeath by David O'Kearny. It was published, *C.M.J.* April, 1902.

1587. Under this date there is a Gaelic entry in the Laing MS. (Adv. xxi.) that the book then belonged to Gilcolum son of Gilanders son of Donald MacBeath.

In Adv. iii. (which I have at the B.M., by the courtesy of the Directors, for the purpose of reference) there occurs on the second folio from the end, in the top margin, **Misi Gilla Col[aim]** *I am Gilla-colum.*

1598. The MS. was in possession of James MacBeath at Tain. It was evidently lent him by John, the real owner, whose mother had in that year made a journey to Islay.—*C.M.J.*

1609. James VI. confirms to Fergus M'Beath by charter certain lands in the Oa of Islay which his family had held from the Lords of the Isles in virtue of their office as hereditary physicians "ab omni hominum memoria." The full text of the charter is given in the *C.M.J.*

1629. These lands were sold by John the son of Fergus to the Lord Lorne of the time and the charter found its way to Inveraray, where it is preserved.

1638. A James Betoun, "doctor of physicke," made a "voyage" from Edinburgh to Islay professionally twice, as would seem, in this year. In the Accounts of Colin and George Campbell—brothers and curators successively of John Campbell Fiar of Calder (1638-1653)—there appears an item of payment to the said James of £266 13s. 4d. for his first journey "as his ticket of reseate bears," and of £178 8s. for the second, and a further

sum of £101 6s. 8d. paid to Patrick Hepburn "for drogis that went in Doctour Beatoune his companie to Illa."

1657. The Laing MS. then belonged to a Donald MacBeath as an entry shows.

1657. John, a distinguished member of the Mull branch—the famous *Ollamh Muileach*, died. He was buried in Iona, where Donald Beaton in 1674 placed a slab to his memory bearing the inscription "Joannes Betonus, Maclenorum familie medicus qui mortuus est 19 Novembris 1657."

1671. *Ioannus Βεττοννυς* possessed the MS. Adv. iii., for he says *εγραφε το χειρ αυτων*, 1671, evidently intended to mean "written with his own hand," and E M'B appears in a small circular mended patch on the inside of the cover.

1700. Martin wrote his *Travels*, where he makes interesting references to the Beatons. He states among other things that "Dr. Beaton the famous physician of Mull" was sitting on the upper deck of the *Florida*, one of the vessels of the Spanish Armada, when it was blown up in the bay of Tobermory in 1588, but that he escaped unhurt.

1701. A John MacBeath possessed the MS. Adv. v.

1708. This MS. (15582) was in the possession of John MacBeath. His name is written under 25th May of that year.

1710. The same name is written under "20 die Junn." Although the writing of this name and that of 1708 are very different, it is almost certainly that of the same John.

1778. The Rev. Thomas White of Liberton who married a Miss Bethune of Skye wrote a pamphlet giving a genealogy of the Skye branch from a manuscript to which he had access. This was reprinted by Mackenzie of Glasgow in 1887 for a Mr. Kenneth Maclellan.

1784. The Rev. Donald Macqueen gave a Gaelic copy of the *Lilium Medicinac*, which belonged to the Beatons "for five generations before," to the Society of Antiquaries.

THE SUBSTANCE OF THE TEXT.

Even if this book may not add very much to the sum of our present medical knowledge it is nevertheless of extreme interest from the human and historical aspect as well as from the point of view of the physician and the scholar. To find men in the far North and in the Western Isles of Scotland who, in those early centuries, were familiar with, and had well digested all that was best in the medical literature of Greece and Rome and Araby is more than, let us say, Lord Macaulay would give them credit for; and it would surely surprise Samuel Johnson to find that there was a great mass of Gaelic scientific writing lying unknown, for long ages, before he declared that there was not one page in the language beyond a hundred years old. It was so, however, even if Dr. Johnson did not know, and even if Lord Macaulay to his utter discredit did not want to.

The generalisations of the first chapter are so completely comprehensive and yet so extremely precise and logical, that we may doubt if they have ever been, or can be, improved upon. *Conservativium*, *Preservativium*, and *Reductivium* round the whole duty of man regarding his health in the most perfect way, and perhaps in the very best form of words. *Conservativium* is the duty of those in health; or, as we might say, an intelligent understanding of the conditions of health and life, and a rightly careful application of this most useful and saving knowledge, to conserve the healthful state, is the first and highest duty of everyone. That is what Conservation means, or as Dr. Standish O'Grady has put it with almost a stroke of genius, "Keep as you are."

Preservativium, again, is for those who know by any signs that they are departing from the fully healthy state and are going into unhealth and weakness "that is proper and necessary" for them, and very urgently so, if they are to save themselves from a much worse state.

Reductium is for those who, failing to apply their common sense in the earlier, easier positions, must now be *led back*, through suffering and sorrow and loss and expense, the same way as that by which they ignorantly or foolishly came down—back to and through the *Preservatium* or “fore-seeing” position where they could have saved themselves before, and up to the position at which *Conservatium* would have made their decline and dis-ease impossible—that is, if they ever get back there again. How very often do we hear a man say, “Since that last illness, I have not been myself at all; I find I must be careful now.” This is the very essence of wisdom, but it has been dearly bought—perfection through suffering surely, for very much less “care” at the proper time would have saved him from the whole catastrophe. Much more rarely we hear, “Since that last illness I have been a new man.” This simply means that a man who has been drawing too much upon his life and health has been “pulled up,” and through long and careful *Reductio* he has been led back fortunately to his first position of apparently good health. *Conservatium* is the position for thoughtful, sensible men. *Preservatium* is the position at which natural warnings show themselves and should be understood and obeyed. *Reductium* is the whip-lash of compulsion which comes really to save and not to destroy, but which even in the best event can only attain, through suffering and sore uphill travail, to the position of less or more of the health which with some sense should never have been lost or departed from.

The sensefulness of this single chapter alone, if people would only understand and act upon it, would fully justify the labour and expense entailed by this work, apart altogether from its aim in other directions.

I do not analyse the contents of the Tract. It will reveal itself. It is full of wisdom—the filtrate, so to say, of a thousand years of very clear thought, and the essence of writings that are permanent. The very admirable morning “toilet” of the Third Chapter is, however, commended to the attention

of such as perhaps may be disposed to believe Lord Macaulay's gross travesty of the personal habits of his own people. We must remember that this was before the advent of the household bath and the tooth-brush. It is therefore a very excellent and very wholesome direction, indeed.

THE GENESIS OF THE BOOK.

John MacBeath (and I here use his name as representative of the whole family, others of them doubtless contributing also) kept a Note Book, a *Vade Mecum*, in which he stored the sum and essence of his reading, compiled and translated from the many ancient authors which we know he had in his possession. He added pertinent comments and observations of his own, based upon his necessarily wide experience. All this was set down in the Scottish Gaelic of the time, which really did not differ very much from the Irish language of the same period. The compilation was not intended for publication, but was simply a practical *memoriola* such as many thoughtful physicians keep even in our day and place, when it is not nearly so necessary as it was in the MacBeaths' time and circumstances. He gave his manuscripts over to a professional Irish scribe in order that the substance might be written in the best and most compact form, and that is how we have them now. This Tract was written by Aodh O'Cendainn, as is shown in the last line of column xiv. of the text. A Cairpre O'Cendamhainn wrote at least part of the Laing MS. (Adv. xxi.). These may have been brothers. A similar thing happens in the case of another Tract in this same book which was written by two O'Kearneys—David and Cairpre (*C.M.J.* April, 1902). That these men were mere copyists knowing little or nothing of Medicine or its terminology is abundantly evident from the numerous miswritings that occur throughout all their work. It is also clear that they had their materials before them in Scottish Gaelic form, because we frequently find that when they take their eye off the "copy" they

at once drift into the writing of Irish forms—especially of the smaller commoner words.

The MacBeath knowledge by reading seems to have included all the best that was available in their time. Martin "Gent," himself a man of Skye, the interesting, observant, and very intelligent traveller, writing in 1700, states that "Fergus Beaton in South Uist possessed the following MSS., namely Avicenna, Averroes, Joannes de Vigo, Bernardus Gordonus, and several volumes of Hippocrates." These names and many others of the medical classics meet us constantly in the MacBeath writings. John might have sat for his portrait to Chaucer of his "Doctour of Phisik" in the fourteenth century, for

Wel knewe he the olde Esculapius
And Dioscorides and eke Rufus,
Olde Ippocras, Haly and Gaylen,
Serapion, Razis and Avycen,
Averrois, Damascien and Constantyn,
Bernard and Gatesden and Gilbertyn.

It will be helpful to understand the remoter origins. *Peritissimus omnium rerum Ippoeras* says the postscript, column xxviii, and we may trace from this point and by this way the history of medical knowledge more directly and more appreciably than by any other path. To Hippocrates, Aristotle, and Galen, and the whole immense power of the Greek intellect, medicine was always a close branch of philosophy. It is not so with us now, but not long hence it must surely be so again.

The disturbing but awakening power of the Macedonian conqueror led to the founding of Alexandria and its great University. This was a University in the truest sense, for it was international and catholic without restraint. It had no test but knowledge and ability. Gentile, Jew, and Christian were alike equal. From this great centre through commercial and intellectual contact the Greek philosophy spread into Arabia and Persia and as far as India, and it had a further disseminating impulse from the banishment of the "heathen" philosophers by

the first Justinian in the year 529. The effect was that a blaze of intellectual culture broke out and possessed the East for five hundred years. The great Greek writers were studied, translated, and commented to an altogether wonderful extent. It was in this way that came Janus "Damascenus," the Commentator of our text, and "Isaac" Judaeus and Rhases and Avicenna, Hali, Averrhoes, Rufus and many others.

In the early part of the present millennium there came a great return wave which struck along the northern coasts of the Mediterranean, where many schools of learning were founded upon the Arabian models, and were greatly influenced by Arabian teachers. Of these Monte-Casino, Salerno, and Montpellier were the most famous.

The monastery of Monte-Casino, nearly half-way between Naples and Rome, was founded by St. Benedict himself A.D. 529, as is said upon the old site of a temple of Apollo. Centuries later with the return of learning an infirmary was added and a school of medicine.

Monks from foreign lands came there for instruction, and eminent invalids from foreign parts for treatment. The most famous teacher of the School was Constantinus Africanus of Carthage (1018-1087). He introduced Arabic science and learning into Italy and Europe, and because of his universal travel and influence he was called "Orientis et Occidentis Doctor." He taught for some time at Salerno, and then became monk at Monte-Casino, where he continued his work of translating from Arabic into Latin. Among his works of this kind was Hali's compendium, which he rendered under the title of *Pantegni*. It is frequently referred to in our text.

Salerno (old Salernum) on the bay of the same name, some thirty miles south of Naples, was founded as a school of Philosophy and Medicine A.D. 1150, and was for five hundred years at the top of medical schools in Europe. It was for this reason that it was nick-named "Civitas Hippocratica." It was a *practical* University, studying the symptoms of disease, diet, materia

medica, and treatment in its fullest expression—not giving much attention to physiology or anatomy. The school had a very excellent effect in that its teaching mitigated and *naturalised* the rather severe doctrines of the older Greek methods of treatment; and this, without doubt, came by Arabic influence. Two great and permanent works issued from this school, namely, the *Compendium Salernitatum* and the rhymed *Regimen Sanitatis Salerni*. The former was a composite treatise, the text-book of the school, of which Joannes Platearius was part author. His part of the *Compendium* is the basis of the other MacBeath MS. (Add. 15403) in the British Museum. The other work is a poem, or rather a versification, the object of which was that the wisdom it conveyed could be more easily committed to, and retained in the memory. It was addressed to Robert, son of William the Conqueror, “Anglorum Regi,” who was cured of a wound at Salerno in the year 1101. This was the *vade mecum* of every well-educated physician in Europe for several centuries. Sylvius, in his edition of the *Schola Salernitana* (Rotterdam, 1649), says *Nullus medicorum est qui carmina Scholae Salernitanæ ore non circumfret et omni occasione non crepet*. This work is attributed to John of Milan, who was President of Salerno in his day, but the Address is from “Schola tota Salerni.” That the book was in the possession of the MacBeaths there can be no doubt at all, so that if we owe the form of our text to John of Gaddesden we are indebted to the ancient School of Salerno for its substance and its whole essential character—not forgetting how much the MacBeaths themselves have added to it. The following quotation from the *Regimen*, if compared with the burden of the text, will readily show the pertinence of the statement which I have just made.

Anglorum regi scribit schola tota Salerni.
 Si vis incolumem, si vis te vivere sanum
 Curas tolle graves, irasci crede profanum.
 Parce mero, caenato parum, non sit tibi vanum
 Surgere post epulas. Somnum fuge meridianum.

Ne minctum retine. Ne comprime fortiter anum.
 Haec bene si serves tu longo tempore vives.
 Si tibi deficiant medici, medici tibi fiant
 Haec tria, mens laeta, requies, moderata dieta.

Sex horis dormire sat est juvenique senique
 Septem vix pigro, nulli concedimus octo.

Ex magna coena stomacho fit maxima poena.
 Ut sis nocte levis sit tibi coena brevis.
 Post coenam stabis aut passus mille meabis.

Montpellier, the chief town of the province of Herault in Southern France on the Gulf of Lyons, was, like Salerno, a school of general learning, with Medicine as perhaps its highest feature. The University was established by papal bull in 1289; the six-centenary was celebrated in 1890. Gilbert the Englishman was taught here, as was also John of Gaddesden, the author of the *Rosa Anglica*, upon part of which our Text is based. Bernard Gordon also, a Scot born in France, was a teacher here in the early years of the fourteenth century. He wrote the *Lilium Medicinae* which the MacBeaths possessed and rendered into Gaelic. A copy of this work was presented to the library of the Society of Scottish Antiquaries in 1784, where it now lies. It came from Farchar Beaton of Husabost "five generations ago"—according to the Rev. Donald Macqueen of Kilmuir who presented the book.

Montpellier was strongly under the Arabic influence, which explains how we find so very many Arabic terms in such of our Manuscripts as came by this way—especially in the names of medicinal plants and in *Materia Medica* generally.

This very short statement of the old Schools taken with the Personal Notes will enable the reader to understand the history of the Text fairly well.

THE TRANSLITERATION.

The *extension* of the Text which is arranged to face the photographs is as correct and exact as it possibly can be made. I have copied the errors of the scribe with even more care than the correct writing. I am exceedingly indebted to my affectionate friend Standish H. O'Grady, LL.D.—a **Grádhach** truly in act as in name. He compared my rendering of the MS. with the original, "letter for letter" as he expressed it—yes, and dot for dot. This exact rendering will make the text much more valuable from the scholar's point of view, and to the student it will be always of interest to observe the many difficulties and the very frequent pitfalls which the pioneer in this kind of work had to overcome and to avoid.

I have not brought the various Contractions together in one place as might have been done. I thought it would be sufficient to refer to them, as they occurred, in the Notes. In my Essay, which is deposited at the Library of the Society of Scottish Antiquaries, there are some ten pages of the contractions given, and a special page is given to the more important in the *Caledonian Medical Journal* for April, 1902. The novice, however, in this study will do well to make a list of them for himself; it will be easy to do so with the extension facing the original MS. writing.

THE TRANSLATION.

The English rendering of the Text is very stilted—for several reasons. The diction of the old Medical Empirics which occupies the great part of the earlier chapters, and colours all the others, however simple the words may appear, is yet in concept wholly unintelligible to the mind of the present day. All that could be done then was to give a rigidly literal but naked translation. Then again there is the immeasurable and

irreconcilable difference between the Gaelic and the English idioms. An English rendering can therefore only be a very crude compromise. I have endeavoured to conserve as much of the flavour of the original as I possibly could, and yet bring as much of the sense within the English language as makes it fairly easy to follow—with a little thought and attention.

THE TIME AND AGE OF THE TEXT.

This can be arrived at, but at best only approximately, by the following ways, namely:

1. By the earliest expressed date given in, or as part of, the Text. We find in this same MS., and in what would seem to be a *later tract* than that of our Text, **Ocus do bi aois an tigerna antan do sgriobhadh an leabar so .i. mile bliadan ocus cuig céd ocus tri bliadna ocus tri fithid** and the age of the Lord the time this book was written was one thousand years and five hundred and three years and three score—1563.

It is not drawing too much upon possibility nor even upon probability if we give our Text a century of existence as the handbook of the MacBeath family before it was given by this "John" to the Irish scribe O'Cendainn to copy, or the other and later tract to the O'Kearneys.

2. The form and style of the handwriting is another aid, but still only approximately. The writing of *Leabhar na h'Uidhre* in its contractions and other graphical peculiarities does not differ very strongly from our Text, and its date is taken as fixed—about 1470. The same may be said of *The Book of Lismore*, and it is accepted as being of the latter part of the fifteenth century. This also is in confirmation of my deduction so far.

3. Then there is the developmental stage of the language to be considered, and this again in the matter of "Eclipsis" and other grammatical peculiarities, points to the same period.

4. Finally, there is the fact that the *Rosa Anglica*, upon which our Text is based, was published in the early years of

the fourteenth century; and knowing that the MacBeaths took a high place in Medicine long before, and kept it for long after, we cannot imagine that it took more than two hundred years to come to their knowledge. Dr. O'Grady thinks the writing is of the early sixteenth century, but the late Whitley Stokes, by far the greatest Gaelic scholar of our time and perhaps of all time, placed the companion MS. (15403) as of the early fifteenth or even the fourteenth century. The side-light of Chaucer, already quoted from his "Doctour of Phisik" is also important in this connection, for we can hardly believe that the first physicians of Scotland were far, if at all, behind those of Chaucer's time in England in their knowledge of the authors here so freely referred to.

So, taking all these things into consideration, it does not seem too much to say that our Text is "of the Early 16th Century." I feel that it would be even safer to say the 15th century instead.

The form of the language in the Text is also of interest. If compared with the form of modern Scottish Gaelic, several points come out clearly. First, the root essentials have been, are, and remain the same—always—though other things vary and differ very much. The Eclipsis of the Strong initial Consonants **c, p, t** and even of the Medials **g, b, d** which has been so definitely developed in the later Irish language did not belong to the old language at all. It is an effort to follow and to express a physiological actuality but for which expression there is really no linguistic need. We had the process fully developed in our older Scottish Gaelic, but it has most sensibly been done away with altogether, and we have no eclipsis now. In my copy of the *Confession of Faith*, printed at Glasgow in 1725, such forms as **a mbpeacadh** *the sin*, **na ngcriostaidh** *of the Christians*, **na ndtrocair** *of the mercies* are met with, where the whole vocal gamut is logically, even if unnecessarily, expressed. The Irish people never went this whole logical length. It was too much to introduce a word by **mbp, ngc, ndt**—but

they have stuck closely to the two letter forms of initial **mb** and **bp**, **ng** and **gc**, **nd** and **dt**. Eclipsis occurs in our Text, but not regularly and not frequently, so we might fairly infer that the time of our Text was about the time of the introduction of this peculiarity in writing.

The terminal inflections are fairly well preserved, but without precision or regularity—as may be seen. They are carelessly and perhaps ignorantly shown and done; still they are not without interest. As in the matter of eclipsis, there is in these also an apparent seeking after phonetic expression, regardless of the historical continuity of form.

Aspiration of the consonants again is here only partly developed. This is now complete both in Irish and in Scottish Gaelic. The process has certainly deformed written Scottish Gaelic especially, which writes **h** after the consonant where Irish only uses the very much neater over-dot.

All these expediences follow the “otiose” or *lazy* development which is manifest in all languages. In fact, as the late Dr. Macbain put it to me, it is not unlikely that mankind in days to come may be able to get along with only a few grunts. The tendency is strongly in that direction. The speech of man is losing its bone and its strength, in the same way and perhaps for the same reasons as the race is losing its hair and its teeth—because it does not fully use them.

P.S.—On 13th July, 1641, William Earl Mareschal borrowed from James Beatoune of Nether Tarbett, Doctor of Medicine, and Janet Goldman, his spouse, the sum of 4000 merks upon the security of some lands in the parish of Fetteresso, for repayment of which and arrears of interest the said Mr. James Beatoune raised against the Earl a successful process of apprising on the said lands before the Commissioners for the Administration of Justice on 3rd January, 1654. (*C.M.J.*, Jan., 1911).

It is surely interesting that when I consulted the Museum authorities as to the best man to photograph this text, they at once said “Mr. Macbeth,” and his name is John!

CHAPTER I.

- COL. I. REGIMEN SANITATIS EST TRIPLEX, that is, there are three aspects of the Regulation of the Health. *Conseruatium*, that is, guarding, (or maintaining the healthy state); and *Præseruatium*, that is, fore-seeing; and *Reductium*, that is, guiding backwards (restoration) as Galen shows in the third Particle of his Tegni. *Conseruatium* to the healthy men, it is right. *Præseruatium* to those who are going into unhealth and to those of debility, it is a duty. And *Reductium* to such as are in illness, it is necessary. Nevertheless *Scruatium* is called *Præseruatium* sometimes as Hali says in the third Particle of his Tegni in the sixth Comment (and) ten and two twenties (the fifty-sixth Comment). And yet I say that it is from things similar that the conservation is made, as is said in the same place, *Si uis conseruare crasim quam accepisti similia similibus offeras*, that is, if you wish the Complexion which thou hast taken to thee to be retained give things similar. And so, it is things similar altogether in degree and in form that should be given to the moderate (abstemious) body; and the body that declines by natural disposition (away) from moderation, things similar should be given to him according to form and not according to degree because of the desire (disposition) he has towards falling as Averrhoes says in the sixth book of Colleget. And if you say that inaction is not taken to him from the similars
- COL. II. as Avicenna says in the chapter upon the Signs (or indications) of the Complexion in the second Section of the first Book where he says that it is from *tota species* the members act upon the food, I say that it is from *tota species* of the member

(the stomach) that digestion is made and from the warmth (heat) as instrument as Averrhoes says in the fifth Book of Colleget regarding the stomach of the bird called Struccio, that more readily (quickly) is the time in which a big (piece of) iron is melted there from *tota species* than in the fire and so it is in this case. Or I say that similars take no effect in the things that are without life yet they may do well in the things in which there is life. Nevertheless the bodies which decline (depart) from moderation they should be regulated (nourished) by things similar according to form while they are in the moderation which is proper to them, and without being similar as regards degree, for the degree should be lower in the (case of the) food than in (that of) the body if given for its nourishment. And these people should be nourished with healing food, for it is with food that is (really) food the temperate Complexion should be nourished. *Uerbi gracia*, that is, Hali says in the third Particle of his Tegni commenting (upon) this text *Calidiora calidioribus, et cetera*, that it is necessary to cure the warm body or the body which departs from the equableness of its two degrees with things (that are) hot in the first degree. And these are called cold things, for the low heat is "cold" in the mouth of the physician, and it is therefore that some say wrongly, understanding (interpreting) that text, that it is with cold things the hot bodies ought to be conserved, and that is a lie. Yet it may be prevented (fore-seen) or saved by things

COL. III. with lower degree than the body desired to be preserved. Yet, nevertheless, the regulation (or treatment) which is called *Reductio* it is with cold things on the contrary (side) and in degree that it should be done (carried out). Still it should be understood that it is with things hot and low that the hot bodies should be preserved, and the cold bodies with cold (and) low things, and the dry bodies with things dry (and) low—*et cetera*. And it is evident that those of black humors (of the Melancholic temperament) should be regulated with things cold, dry and low; and these are hot, moist things and not singly

but in compensation for the Complexion of black humor as says Commentator the Damascene in the second Particle (and) in the fifth Comment and three twenties (the sixty-fifth) that the wine is hot and dry yet he says that it is hot and moist in compensation for black humors and so also I say in this case. And so also regarding the cold Complexion (that) it should be regulated with things cold, moist (and) low, and these are hot, dry (and) low things. Yet if a Complexion of white humors (of phlegmatic temperament) has fallen by a hurtful fall towards coldness and moistness it should be regulated (treated) by hot, dry (and) high things—and that is the guiding towards the contrary. Further, these things ought to be studied in order to preserve the health, namely, Appetite (or disposition) and Quantity (of food) and Order and Time of year and the Time or Hour of eating and Age and Habit. And we have said concerning the appetite lately that it should be similar in degree and in form or in form only and not so in degree for as was said at first that low things are similars to the cold Complexion because low hot things are called cold by the physician and the cold is (a) similar to the cold thing; and also everything in which there is life it is hot [to be so classed] and it is therefore it should not be understood that the cold things are not similar(s) to the human body but that the cold low things are, and these are hot things in the mouth of the physician. COL. IV.

THE SECOND CHAPTER—OF THE QUANTITY OF THE FOOD.

The Quantity of the Food, that is, it should be eaten when it is desired, for Aristotle says in *Epistula ad Alexandrum*, *Dum adhuc appetitus durat manum retrahere*, that is withdraw thy hand towards thee and (while) the appetite is (yet) remaining with thee. And Avicenna says in the chapter which speaks of the regulation of the things (to be) eaten and drunken (that is Concerning Food and Drink) *Ita comedere quod sint reliquie*

desiderii, that is, you should so eat that you have a remnant of desire (for more) left, for it is better to multiply the times (to have meals more often) than a great quantity (at one time). And it is better to eat a little in two times than a great deal at one time because the food that is eaten at one time in large quantity it cannot be digested and it will pervert the power of digestion of the stomach then, and the error (perversion) that is made in the first digestion if (while) it is great is not corrected in the second digestion as Commentor Damasenus says in the first Particle in the sixteenth Comment. And it is therefore that it does not nourish dutifully then. And it is for that reason that Avicenna says in the third Book that the greedy men will not grow. And also the food that is taken in unreasonable quantity it will cause constriction and that is a cause of corruption through the absence of coolness, according to Hali in the third Particle of his Tegni. And it is the sign that a person has eaten enough that there comes not from the eating of the meal any increase of the pulse or diminution in the breathing, for this will not happen but because the stomach closes (presses) upon the diaphragm, and it is therefore (because of that) the breath is small (and) frequent, and the need for coolness of the heart causes the pulse to increase, since there is no weakening of (upon) the strength. Other signs are that there is no change upon the (appearance of) the urine nor upon the motions and upon the bowels particularly that hypocondria is

COL. V. not reached (caused) and without suffering cramps or flatulence or heaviness or weakness (faintness) and without sickness (desire to vomit) or *apititus caninus* (dog-appetite) nor falling (failing) of desire (for food) to be upon him nor laziness of mind, but that he can study after a meal as he did before it, but alone (indeed) while the food falls and the digestion begins, because the offensive (un-praisable) fumes then arise and they cause sleep and prevent study. And further he should be without sleeplessness and he should not have the taste of the food when he eructates—for if these are as we have said it shows that the

food has been moderate in quantity. Yet the habit ought to be considered here, if it is not very bad, as may be seen. And I say also regarding the drink that it should not be in that quantity that the food is a-swim in the stomach as the case is with drunkards. And it is therefore (that) the thing which some say that it is well to get drunk once a month is a lie, as Averrhoes shows in the second Particle of the Canticles in the third Canticle (and) ten over twenty (the thirty-third) where he says *assensus ebrietatis simul in mense est erroneus*, that is, it is wrong to agree to the drunkenness one time in the month, for, though of the things which more benefit the natural heat (it is) the wine taken in moderation and of the things that do it harm (to the natural heat) and to the brain and to the senses (it is) it, when it is taken in excess; and it is therefore he says there that the water of honey is better for those who have weak nerves, than it (the wine). Yet nevertheless a little wine may give comfort to the old men as he says there (in that place). Yet Avicenna says in the chapter which speaks of the regulation of the water and the wine *Pueris dare vinum est addere ignem igni in lignis debilibus*, that is, it is (like) putting fire upon the head of fire on weakly wood to give wine to youths. Nevertheless give it in moderation to the young men, and to the old men in the quantity he wishes; indeed they ought to have it in good quantity. I say that the quantity he may desire should be COL. VI. given to the old man because of the agedness and that is the moderate old man who will desire as much (only) as he is able to digest and he is a very discreet man. And yet the old man from his very-agedness (see Voc. *Sen*) he should not be given that much, for such people are exhausted and foolish and small is their heat for they are like a lamp ready to drown (go out) as is said in the first Particle of the Aphorisms and it is therefore that Galen says in the same Particle commenting upon this canon *Potus indigenciam soluit et cetera* it is therefore I ask (I question) is it before the meal it should be given or (immediately) after, and it will be seen that not before the meal for

Avicenna says in the chapter which speaks of the regulation of the water and the wine *Sapiens debet sibi prohibere ne ieinunus uinum bibat*, that is, the wise man should spare himself from drinking wine upon first eating and it should not be given after the meal for Avicenna says in the same chapter *Uinum post quod libet omnium ciborum est malum*, that is, the wine is bad after every meal (or food); and he says in the chapter which regulates the thing eaten and drunken *Uinum post cibum est ex rebus magis impediens digestionem*, that is, of the things which more greatly prevent the digestion (is) the wine drunk after food, because it makes the food bore (pass out of the stomach) before it is digested. And the wine upon the meal is not proper, according to Avicenna in the chapter which speaks of the regulation of the things eaten and drunken where he says *Oportet ut post comestionem bibat quis et non in hora comedendi* it is necessary that it is after (the) eating a person should drink a drink and not in the time of eating. And he says a little before that *Non est bibendum donec cibus de stomacho descendat*, that is, a drink should not be drunk until the food falls from the stomach. *In oppositum*, the common custom is against this, drinking the wine with the meal and after it. I say that it

COL. VII. is not right (to take) the wine before the meal in the time of health. Yet it is necessary sometimes in the time of illness, that is, when there is the greatest fear of the failure of the strength the wine will not hurt—as is evident in the syncope which comes from exhaustion (weakness of strength). And I say that in that time (in such a condition) it is right (to give it) before the meal and after it. And when it is made as an argument (given as a reason) that it should not be given upon the meal I say, according to Avicenna in the chapter which speaks of the regulation of the water and the wine, that two *briala* drunk with the meal will not hurt the person who has made a custom of it, and so also to the healthy man after blood-letting. Nevertheless, the ordinary practice should be observed here if it is old or if it is not very bad, and it should be for-

saken (given up) at that time after each other (gradually) and not suddenly. And, this it is, that I understand through this word *briala* the measure (so much) as is taken in one drink only, that is, as much as a person can take without change of breath, that is, without straining the breath or stopping it unwillingly. I say also that the wine is bad after every food but after (until) the food is digested and has fallen, except in *caninus apititus* where tender things should be given first and then wine, and that is necessary treatment. Nevertheless, it is not right to take wine after food from which evil humors are generated or before or at the time of eating, as Avicenna says in the same place, for it causes that evil humor to penetrate towards the exterior parts of the body and it is therefore that such people err as would desire to drink wine after evil (indigestible) foods (in order) to digest them, for it (the wine) goes before the digestion and it makes the body heavy.

It is therefore I say, briefly, that the wine may be given in small quantity after the meal and not in great quantity, and that it should be given to a person accustomed to it and to a person after blood-letting—and not to give it to any other person except in time of great thirst and in the other cases put (stated) in the chapter which speaks of the regulation of the water and the wine. And when he says that the wine is not right with the food I say that it is thus the words of Avicenna should be COL. VIII. understood when he says that it is after the meal the drink should be drunk and not upon it, that is, that it is after the mouthful (bite) is swallowed and not while it is in the mouth that it should be drunk, for to drink while food is eaten causes a glut—and that is what Avicenna calls quantity. The food is more effectual (more nourishing) by that a person should not drink upon the meal anything that puts the food in motion (forces it forwards) or anything that puts it too quickly in motion, otherwise it (the food) is separated from the stomach and it is put a-swim. Nevertheless a little may be drunk after the meal so that the food may be co-mixed and stirred about

well, and without making (any) very great fundament and without drinking to excess after it but (rather) to increase the number of times of eating, and without increasing the ordinary quantity. And it is therefore I say that there are three (kinds of) drinks, that is, *Potus alteratiuus*, that is, the alterative drink, and *Potus permixtinus* that is the co-mixed drink, and *Potus delatiuus* wash-away drink. The alterative drink, it is before the food it should be taken—such as are the syrops and the heating drinks. The co-mixed drink, it is upon the meal it should be used, a little being eaten and then a little drunk, so that the proper mixing is made. The wash-away drink, furthermore, after the meal, upon the making of the digestion (after digestion), and after the falling of the food out of the stomach, it should be taken—or in the time the food is leaving it (the stomach). And it is therefore that Averrhoes says in the second particle of the Canticles in the ninth Comment (and) twenty, as the water which is poured into a boiling vessel stops the boiling (so) the water or the drink that is put at the end of the food which is being digested in the stomach (it) will prevent the digestion and it is therefore that not much should be drunk after the meal until the digestion is completed in the stomach. But it is effectual towards the digestion to bear thirst after of

COL. IX. the meal. Nevertheless it is not possible to declare the quantity of the desirable (the give-able) things from proved writings as Galen says in the third Particle of his Megathegni, yet let it be done according to the judgment that is near the truth and let it be confirmed according to proofs (experience) and practice.

THE THIRD CHAPTER—OF THE ORDER.

Of the Order of Diet or the Eating of Food. This is it, that is, when a person rises in the morning let him stretch first his hands (arms) and his chest and let him put clean clothes on and let him then expel the superfluities of the first digestion and of the second digestion and (of) the third digestion by the

mucus and superfluities of the nose and of the chest for these are the superfluities of the third digestion and then let him rub the body if he has proper time because of the remnants of sweat and of dust which are on the skin, for the skin is porous and it will draw towards it everything that is near it according to Galen in the first Book of *Simplici Medicina*. And then let him comb his head and wash his hands and his face out of cold water in the summer and out of hot water in the winter and let him wash his eyes with water (which has been) held in the mouth and warmed there, dipping his second finger in it, for that will drive away the veils of the eyes and it will cleanse them. And let him then rub his teeth with the leaf of the melon in the summer and with the skin of the yellow apple in the winter. And then let him say his Hail Mary or any other (similar) thing which he may desire. After that let him make effort (exercise) and moderate walking in high (elevated) clean places and let his food be prepared so that he may take food the first time after that exercise what time desire begins naturally. And let him not take it (the food) before it (the desire) and let him not delay (beyond the desire) for Avicenna says in the chapter which speaks of the things eaten and drunken that the endurance of hunger beyond COL. X. habit (over the usual time) causes the stomach to fill from corrupt humors and there comes then a heavy fullness of red humors, drawn towards the mouth of the stomach so that the food cannot be eaten by natural desire (healthy appetite) though he should wish it. And a person should not eat to satiety as we have said before and only one food should be eaten at the one table (that is at one time) for Avicenna says in the above-mentioned place *Nichil deterius quam cibaria multiplicare et in eis temporibus prolongare*, that is, there is nothing worse than to eat too many different foods (at one time) and to prolong the time of eating, and it is therefore that he says in the end of the chapter *De regimine cibi* that it is sufficient for the old men to eat flesh-meat alone in the morning and bread only at

their supper, and let them not take immoderate (or exceptional) foods at (any) one time. Nevertheless if several (kinds of) food be eaten at one meal it is better to give the mild things first and the fat things then (afterwards) or the contrary of that; for when the mild food is eaten after the fat food it is quickly digested and the fat food is not, and it will be in that time seeking a way out and it cannot get it because the fat food is below; and it comes of that that the one is mixed with the other and they are all corrupted. Yet if one understood (rightly) how to equate the food to the stomach so much of the fat food should be given at first in proportion as the lower part of the stomach is warmer than the upper part. Yet it is not possible or not easy to do that and since you disregard what should be done incline towards the mildness (the tender things) as Avicenna says in the chapter (upon) The healing of Quartan (fever) in the second Particle of *Regimenta Acutorum*.

COL. XI. Item, do not take raw food on the top of half-cooked food.

And it should be therefore understood that the food abides in the body before it is entirely digested sixteen hours as Averrhoes says in the second Particle of the Canticles and the same is said in the last chapter of the sixth Book of Colliget though nine hours are said in some books, and that is a lie, for it is possible that the scrivener found a certain number written and he did not know what it was and he made a mistake in the writing (copying) and it should be sixteen hours and the reason for that (is) because Avicenna says in the chapter *De regimine cibi* and Averrhoes in the Canticles that it is correct feeding to eat food three times in two days, that is, twice on (some) days and once (on) the other day. And sixteen hours should be between every two times of these (that is, of taking food) so that the two natural days (in which there are eight hours and two twenties—48 hours) shall be divided level-ly (equally) into three portions. And the reason for that is if a mistake was made in the day on which food was eaten twice that it may be corrected on the morrow by eating (only) once, and *e contrario*

for every evil that is done by the filling (the excess of the one day) is cured by the emptiness (of the next) and *e contrario* as is said in the second Particle of the Aphorisms. Yet Avicenna says in the third Book (and) in the thirteenth Section (and) in the third Tract which speaks of the delay of the descent of the food out of the stomach *Remanencia equalis cibi in stomacho et egressionis eius est illud quod est inter duodecim horas et uiginti duas*, that is the usual time between the remaining (from its arrival) of the food in the stomach and its leaving is between twelve hours and forty through the slowness of the working of the digestive powers. And it is therefore I say that from the time fatty food goes into the stomach that it remains there six (hours) or in the places of the other digestions, for the chyle is tenderer than the bread and therefore it is quickly changed into red blood and red blood is quickly changed to rose in the pores of the members. And Avicenna comes with this remark (namely) the food digested in all the members COL. XII. through sixteen hours so happening without being assimilated to them in that time. Still, from weakness of the stomach, and from the fatness and from the toughness of the food it will remain sometimes through (as long as) eighteen hours or through twenty hours as is shown in indigestion of the stomach, and when a person eats hurtful foods of some kind which remain sometimes in the pores of the stomach through a month or (even) through a quarter of a year as I have heard from truthful men that they vomited foods and medicine some times in the same quantity and substance as they were taken a month before then. Furthermore it needs be shown that milk and fish are not right on one table nor wine and milk for they predispose a person towards leprosy. And let not a very hot electuary be taken soon after food nor any one thing diuretic for they will pervert (corrupt) the food, burning it or putting it in motion too quickly. And it is therefore that the drageta made of Maratrum and of Anise and of the like is bad immediately after the meal. For it is better to rest standing or to make (take)

a gentle walk after the meal as Rufus says *Modicus incessus post prandium hoc est quod michi placet*, that is, it is agreeable to me an easy walk after the meal. Nevertheless to make great exertion after eating (whether) by walking or riding will corrupt the food and will prevent the digestion. (But) after that (the meal) take a moderate sleep as was said in this Canon *Uentres hieme et vere* that it is well to understand the extent to which the sleep helps the digestion. Still, the sleep and the non-sleep that goes beyond moderation is wrong, as is said in the second Particle of the Aphorisms; and let it be done in the night for Hippocrates says in the first Particle of the Prognostics *Sompnus*

COL. XIII. *naturalis est qui noctem non effugit et diem non impedit*, that is, the natural sleep which does not avoid the night and does not prevent the day. Nevertheless many men make day of the night; sleeping in the day and awake in the night—and that is very bad. Yet, you ought to know that it is on the right side you should at first sleep for it is so that digestion is better made because the livers are (then) under the stomach, and you should afterwards turn upon the left side so that the food is not drawn towards the livers before it is fully digested, and then (again) turn upon the right side so that the thing (part) which is digested in the stomach is more easily drawn towards the livers. And this may be learned from Avicenna in the chapter which speaks of the thing eaten and drunken and in the chapter that speaks of the sleep and of the sleeplessness. And he says there also that to begin by lying on the belly will give great help towards the digestion because the natural heat is retained and because it is surrounded and it is therefore it is increased. Still, a vain (shallow) sleep is bad and to sleep quickly after food is bad for the sight. And sleep of (in) the day is bad if it is not made in nearly a sitting position and that is good after the meal and in the summer but yet in that time, only a little. And it is therefore the versifier says *Aut brevis aut nullus sit sompnus meridianus*, that is, let the sleep of the middle (of) day be brief otherwise don't let it be

done. Nevertheless if it is done before the meal let it be done of a morning till sunrise according to Hippocrates in the second Partiele of the Prognostics. And it should not be done and (with) the mouth open for fear that bad air may go in and prevent the digestion. And let the head be well raised in the sleep and let him be well covered with clothes—according to Avicenna—and that is very good for (towards) the digestion. ITEM, The diseases of the mind are here considered, and it is concerning this that the versifier says *Sit tibi mens leta labor et moderata dieta*, that is, have a cheerful mind and moderate diet and take exercise. And greatly does bathing in sweet water COL. XIV. suffice but that there is no food in the stomach. And let the supper be short or light unless the habit is against that; for regarding the digestion that is made during sleep it were better that not more (or not a greater quantity) were eaten at night: Yet as the sleep is made so very soon, before the food falls from the mouth of the stomach, it is therefore that too much food at night so greatly hurts the sight and it is therefore that there are many verses upon this matter (on this cause). *Nocturna cena fit stomacho maxima pena*, that is, the supper of night is great pain to the stomach. *Si vis esse levis sit tibi cena brevis*—if you wish to be light let your supper be short. And there are two other verses upon the same thing. *Scena brevis uel cena levis raro molesta*, that is, it is rarely that the short or light supper is injurious. *Magna nocet medicina docet; res est manifesta*, that is, the healing art teaches and it is a clear thing (manifest) that the large supper hurts yet more. *Summe cibum modice modica natura fouetur*, that is, Eat (but) a little food, for nature is satisfied with (from) a little. *Sic corpus refice ne mens ieiuna grauetur*—it is so the body is known to be satisfied that the mind is not heavy (not dull) because of the abstinence (from food) [when it remains clear without food] and yet take the food from thee (leave it off) when the nature sooner demands it.

ITEM, let the urine and the faeces be voided (expelled),

and let them not for any one reason be retained beyond the time in which it is the habit to evacuate them, because they make constriction in the sides (parts) and singing in the ears from flatulence rising upwards (antiperistalsis), or a stone (in the bladder) or hydropsy from the holding of the urine. That is for thee John from Hugh O'Cendainn.

COL. XV. *Nec minctum retinere uelis nec cogere uentrem*, that is, do not desire to hold thy urine nor to force thy middle (*uentrem*), that is, beyond the time in which it is right; and it is therefore that it is not well to be on the stool too long and (not well) to make forced squeezing. And it is therefore that the urine should be given (passed) six times in the day with the night for that is the (whole) natural day—and the evacuation (of the bowel) twice or thrice in the same time as these verses say. *In die minctura fit sexies naturali tempore bis tali uel ter sit egestio pura.*

THIS IS THE FOURTH CHAPTER—OF THE TIME.

Regarding the time, that is, the time of the year ought to be observed for something of heed should be given to the age and the country and the time as is said in the first Particle of the Aphorisms. And yet let fat food be given in full quantity in the winter because it is said in the same place *Uentres hieme ct uere calidissimi sunt natura*, that is, the internal cavities are very hot by nature in the winter and in the spring, and the sleep will be very long. It is therefore that plenty food should be given and the times of eating should not be frequent for the heat is not short as in the summer but long (great) according to the extension through abundance of the spirits. Nevertheless the heat will be small in the summer taking warmth for the warm body more [*maior extensiuæ extensione raritatis sed non extensione quantitatis*]. And the food should incline towards hotness in that time, and it is apparent from that what is well said regarding the heat of the young men and youth (generally).

In the spring however the food should be moderate but

inclining towards a smaller quantity because of the fullness that was done in the previous winter.

Yet, in the summer the food should be mild going into COL. XVI. (inclining towards) coldness and that is (means) mild in quantity, that is, (only) a little should be given at one time for the substance (the sum) of the (bodily) heat will be small in that time being spent and dissipated because of the external heat. And if food mild in its substance is given it will be burned from the fiery heat. And it is therefore that Galen says in the Canon *Uentres hieme et cetera* that the heat will go external in the summer to co-rejoice with the similars and it is therefore it is weakened (diminished) internally.

In the autumn, again, give the food in small quantity and it should be inclined towards warmth and moistness, and there are verses upon this *Quantam uis sume de mensa tempore bruno* eat the quantity you wish of food in the season of winter, *Tempore sed ueris cibo moderate frueris* but use food moderately in the season of spring, *Et calor estatis dapibus nocet inmoderatis* in summer evil is made (comes) of the immoderate foods. *Autumpni fructus extremos dant tibi luctus* the fruits of autumn will give thee sore weeping.

THE FIFTH CHAPTER—REGARDING THE TIMES OF EATING.

The time of eating (the proper time) is when there is true hunger as we have said in the third chapter above. And it is better in the summer (to choose) the time that is cooler, that is, before sunrise and at the time of vespers—in the evening. And the time of need (when it is really necessary) is the time in which food should be taken, and it is therefore that Galen says in libro *De regimine sanitatis* that no person should be compelled to observe the Rule of Health but the person who is not prevented (from following it) from any other compulsory cause and who has his desire (choice) free in every one thing (a man COL. XVII.

who is thoroughly well). Yet, in the winter, let the time that is warmer be chosen and so also of the spring and of the autumn, for these (warmer times) are apportioned towards the summer and towards the winter, for it is in the portions that are nearer to the summer of them that the time should be like the time of summer and the portions which are nearer the winter let the time of moderate warmth be chosen.

THE SIXTH CHAPTER—OF THE HABIT, OR CUSTOM.

The habit of diet should be maintained unless it is very bad (unless it disagrees or is injurious) and if it is so it ought to be departed from slowly (not too quickly) and therefore the habit which conforms with natural things should be maintained. And if it should depart (only) a little from them it should still be continued. Nevertheless if the departure (from nature) is great it should be directed back and (yet) not suddenly, as we have said. And yet let those of bad regulation (habit) take heed to themselves for though it does not show on their countenance (even if the effect is not immediately apparent) it will yet show (later on) very effectively—they shall feel it—as Avicenna says. And therefore, those who say that they can fill themselves often with food and that no hurt comes to them let them take heed to themselves for they shall be hurt; for if God took revenge upon every one sin the first time after it was committed (that is immediately) there would not be a (single) man in life, and as is all Nature, that is, God, it is so that Nature is ordered in man, that revenge (restitution) is not made the first time (or immediately) but after a season. *Item*, there are some people who eat more of fruits than of other foods, and they do so wrongly, for

COL. XVIII. every fruit makes a watery blood unprofitable (innutritious) and it is corrupted. Nevertheless astringent fruits should be eaten after food if the middle (intestines) is relaxed—as are pears and coctanas and apples. But the roasted apples before a meal will relax those of red humors (of choleric temperament), and the

raw apples are more astringent and every kind of them is greatly so, for the sweet apples are less astringent, and the sour apples are more so. Yet the bullaces and the raisins and the figs it is before the meal they should be taken as Isaac says in *Dietis particularibus*. Nevertheless the common custom is against this badly for this causes constriction from the milder things and it is therefore that they should be eaten with ginger for this fights against every corruption which comes of the fruits—according to Avicenna. But it is better to avoid fruits altogether. And it is therefore that Galen tells in the book upon the Regulation of Health that his own father was a hundred years in his life (lived a hundred years) because he did not eat fruits. *Item*, there are some people who prefer the tails of beasts rather than the other parts, and other people (prefer) the heads and other people the bones—and so of the other parts. It is therefore that this verse says *Pisces et mulieres sunt in Caudis meliores uel dulciores* it is in their tails that the fishes and the wives are better or sweeter, but that only means that the fish is less cold in its tail than in the other parts of it because of its movement (or activity). Nevertheless it is easier to digest the other parts as is manifest COL. XIX. regarding the belly of salmon and its like. Nevertheless, that part which is in greater motion is the part that has less superfluity (that is less gross) and it is therefore the better part of the animals which men eat, if all other things are equal. Therefore let the more tender part be chosen which has some motion and is of better taste, for the part that tastes best nourishes best—if other things are equal. And yet the verse says *Non ualet in iecore quod dulce est in ore*, that is, that thing is not good in the livers which is sweet in the mouth. And it is of simple (single) sweetness that is to be understood.

Nevertheless I say of the nuts here, that there is not among all the fruits, after the figs and the raisins, a (any) fruit that is better than them, and it is therefore the verse says *Die auellanas epati semper fore sanas*, that is, say that the nuts are always healthy for the livers.

Furthermore I say, namely, that such as would desire to indulge in co-reaching should not do so with the middle (stomach) full but after the finishing of the first digestion and the second digestion and half of the third digestion, and (I say) that it should not be indulged in (made) often, for that greatly weakens the stomach and the whole body, and it hurts the sight very greatly for it puts the eyes into great depth (it causes them to sink greatly) clearly.

- COL. XX. Of the Blood-letting, indeed, it should be understood that it should not be over-practised, for Avicenna says in the chapter Of Blood-letting that the too frequent blood-letting causes apoplexy, and Galen says in the ninth chapter of his *Megathegni Minucio ceteris euacuacionibus uirtuti maiorem debilitatem infert* the regulation (or practice) of blood-letting more greatly weakens the vitality of (than) all other practices, and the reason for that is that red blood is more akin to the nature (of man) than all other humors (fluids). It is therefore that its practice in the time it is excessive most greatly weakens, unless the man is young and has a complexion of red blood (has a ruddy complexion) and he is resting and using of flesh meat and of other foods which nourish well for that condition demands that blood should be let more seldom (less often) for fear of Quinsy and internal ulcers—than would be the case in another person (of different temperament). And the rule which Damascenus gives in his own Aphorisms in the second Particle (and) in the nine and fortieth Comment should be observed; that is, if a person in his youth practised to let blood four times a year it should only be let thrice (in the year) at the end of the fortieth year and once only at the end of sixty years, and after ten and three score or four score years it should not be let at all. Notwithstanding, it is the mediana (vein) that should be let at the end of sixty years and the basilica at the end of forty years for it is not right to
- COL. XXI. let the cephalic (vein) beyond the end of forty years at the outside, for that will blind a person and it will pervert the memory.

The chosen time of the year, indeed, for the blood-letting, that is, the spring and the autumn. But the blood-letting of the spring is the better, for there is not one thing which preserves a person against the diseases of summer as the blood-letting of the spring does, according to Avicenna. Yet it is in two portions the time of the whole year is divided according to the people, that is, the summer and the winter. And the blood-letting should not be in a very cold time nor in a very hot (time). And it is therefore that those err who would wish to let blood about the feast of Stephen and about the feast of John Baptist through (because of) the coldness of the one time and through the heat of the other time. But it should some times be let about Christmas to save from the illnesses which come of the filling (the excess) accustomed to be done commonly in that season.

Concerning the side on which it should be let, indeed, the versifier says *Etas uer dextras, autumpnus iempusque sinistras*, that is, the right hands in the spring and in the summer, and the left hands in the autumn and in the winter. And he says also as regards the Moon thus, *Luna uetus ueteres iuuenes noua luna requirit*, that is it should be let for (in the case of) old men when the moon is old and to the young men when it is new.

Regarding the diet after blood-letting. It should be understood that great error is then (often) made, for there are men who would like to drink and to eat a great deal in that time to make the blood again which they have lost, and it is therefore that (only) a little should be drunken and eaten. Yet more of wine should be drunk in place of (to make up for) the less food then, or as they were accustomed to, because it is easier to satisfy with drink than it is with food. COL. XXII. Yet, avoid cheese in that time and fat flesh and salt fish and fruits and anger and exertion and be not close to a fire and do not make co-reaching and do not make but a small supper and it is therefore this verse is good *Prima dies uene moderacio sit tibi sene*, namely, let thy supper be moderate the first day of (after)

the blood-letting. Nevertheless the other verses are lying which would put (one) to activity and to exertion.

And if you wish to know what time begins the (proper) seasons of the year they are found in these verses *Ver petre detur estus et inde sequitur quam dabis urbano autumnus simphoreano*, that is, the spring in (at) at the feast of Peter and the summer at the feast of Urban and the autumn at the feast of Simphorean. *Festum clementis iemis caput est orientis*, that is, the feast of Clement is the head of the beginning of winter. And this is according to the astrologers who always put the seasons to even-ness (who divide the seasons rigidly) and not so the physicians but they call the moderate time of the year spring, and it lasts sometimes during a month, but one time it is less and another time more. The summer, indeed, it is a very hot season, and the autumn it is sometimes hot and another time cold according to different weather, and the winter is a very cold season altogether. Furthermore, namely, it should be understood that the eggs and their custard benefit such as are after blood-letting if the stomach is clean. Nevertheless, if they are got in an unclean vessel they are very easily fouled, and they are the more healthy if broken into water. Furthermore,

COL. XXIII. you should know that the right time to eat this pottage is at the commencement of the meal; and it is made, in the winter, of "kale" and of mallow and of sage and of parsley or of the white heads of leeks boiled and strained and mixed with milk of almonds. And I say that the almonds are an excellent fruit eaten whole, as they are, or with the skin taken off them, and given to the men who have had blood let and to those who are wasting and to those of phthisis. In the summer, indeed, a pottage of borage and of bugloss and of violet and of mercurial and of spinache and of patience and of lettuce and of the tops of fennel and parsley with the like—is proper, and it is well to put avens into it if the stomach is cold. The pea, however, should not be eaten except with cumin; and let not beans or peas be eaten new or old except with salt and cumin; and those

who have a weak stomach and flatulence let them not eat them for any reason. Nevertheless the soup of peas is good (sufficient) and it relaxes, but let there not be anything of the substance (the solid part) of the pea be (left in the soup). Furthermore, understand that the milk greatly hurts the cold stomach and (but) it does not (hurt) the hot stomach, and for that the right thing is sour milk in the summer. The butter, indeed, let it be eaten before the foods, and let it not be eaten after a drink, and let not the top of milk (cream) be eaten after the supper, or curds and whey for they are constringent and tough. It should be known COL. XXIV. also that great injury is caused by the raw things such as the oysters, and the things half raw as are the birds that are badly roasted, and it is therefore that good cooking of the food and well roasting and completely (throughout) is little less than half the (work) of the internal digestion—or, to boil it well externally; and it is therefore that those err who eat too hurriedly (or greedily) for they sometimes eat hurtful things before they are brought to their attention (before they notice it).

THE SEVENTH CHAPTER—OF THE AGE AND TEMPERAMENT.

The Age and the Complexion—it is almost entirely by things similar that they are regulated (nourished). Nevertheless, the young men will digest more of fat things and of hard things than the old men because of their agedness and the sons (or youth generally) the moist things, that is, the tender or soft things, for the diet should be renewing (restorative) and (only) a little should be eaten (but that) frequently. And those given to study should be nourished like old people, for the studying dries them; so let them eat tender things according to their sufferance (as they can bear them) so that their blood is replenished quickly and well. Those who labour, however, let them eat roasted fat things for these are the things that resist (the waste) of labour. For though the roasted things are moister

within than the things cooked upon water from the moistness of the substance inside, yet they are dry outside and they are altogether more solid, and it is therefore that they are difficult to separate from their heat and therefore they are the more

COL. XXV. difficult to digest. The things that are cooked in bread they are moist and (but) they are good. Nevertheless the pastil bread is bad. And it is a very broad (comprehensive) rule that the food which adheres to the fingers when it is being touched should be avoided, for it is tough. And the roast things kept over night are not good (even) with a covering upon them, nor the very tender things at the end of the meal. The moderate abstinence is a very high treatment; and it is therefore that Galen said *Commedo ut uiuam non uiua ut comedam*, that is, it is to be in life that I eat and not for eating that I am in life. Yet, it is said in the first Particle of the Aphorisms *Senes facillime ferunt ieiunium*, that is, the old men more easily bear emptiness, and these are the old men from their agedness, and then the young men, and then the youths, and then the old men from their age. And so also those of cold humors fully enjoy to suffer emptiness (hunger) and those of middling red blood (well-blooded people) but those of red humors or of black humors cannot suffer it. And yet those of black humors bear it better than those of red humors for the heat is less which they set free within them, and they spend more upon the thing (or work) upon which they employ themselves (they have less resistance). And the versifier has put (made) verses upon the regulation of health *Si vis incolumem si uis te redere sanum curas tolle graues irasci credere profanum*, that is, if you desire to be whole put heavy sorrow from thee and believe that it is vain (foolish) of thee to make

COL. XXVI. anger. *Parce mero scenare caue nec sit tibi uanum pergere post epulas sompnum fuge meridianum*, that is, spare wine and avoid supper, and do not think it foolish to have a walk after the meal, and avoid the sleep of the middle-day. *Non teneas minctum nec cogas fortiter anum*, that is, do not retain thy urine and do not constrain too strongly thy seat. And there are other verses

upon the wine *Dat uinum purum tibi ter tria comoda primum*, that is, there are nine (thrice three) cases (or comforts) which the clean wine gives thee *Uires multiplicat et uiscera plena relaxata* that is it multiplies (increases) the strength and it relaxes the full intestines. *Confortat stomachum cerebrum cor dat tibi letum*, that is, it strengthens the stomach and the brain, and it will give thee the light heart, and it will make (give) boldness (courage), and it will call forth the perspiration, and it will sharpen the intellect, and it will give assistance to the friends (it will promote friendship). Yet let moderation be along with it so that its working (efficacy) may not be perverted, for all these (good effects) will be undone without the moderation. And because the wine is sometimes drunk finally, remember this verse *Potus tarde datus multos facit cruciatus*, that is, the drink that is drunk finally will give thee many pains. *Item*, let cinnamon be used frequently for it will bring the mouth to sweetness and it will suffice against the cold rheum, and it will prevent the corruption of the humors in them; and it is therefore it is said *Non moriet homo comedens sepe de cinamomo*, that COL. XXVII. is, the person who eats cinnamon frequently will not go to his death from corruption of the humors for that is prevented if the nourishment (regulation) is well in other respects from that outwards. And it should be understood that the water must be clean, and the air is cleaned scientifically (quickly) by means of a good fire, if it is not found naturally clean. And this is sufficient though a great deal more might be said here.

IT ENDS.

Make a note that it is in six positions the horn should be put in bleeding (cupping). The first position—in the furrow at the back of the head, and it will empty (draw from) the animal parts there, and it will relieve headache especially, and diseases of the eyes, and the filth of the night (upon the eyes) shall be cleansed, and it will serve or deplete the region of the vein called

Cephalic. The second position, namely, between the two shoulder-blades, and it will there draw from the spiritual parts, and it will comfort dyspnoea and the asthma and the ortomia and it does (controls) the area of the vein called Mediana. The third position, namely, on the roots of the forearm and it will draw from the hands and it will relieve the seregra that is in them. The fourth position between the kidneys and the buttock, and it will there draw from the organs of nutrition (the nutritive parts) and it influences the province of the vein called Basilic. The fifth position—on the flat of the hip, against the lipra and eruption of the hip and eruption of the whole body, and against urine disease, such as stranguria, and against every disease in the parts leading thereto. The sixth position, namely, upon the flat of the calf, and that will draw from the feet, and it does the area of the vein called Saphenous, and it will call forth the monthly blood.

COL. XXVIII.

3 that is Ounce; 5 that is Dragma; 9 that is Scruple.

PERITISIMUS OMNIUM RERUM Hippocrates *et cetera*, that is, the key of all knowledge (is) Hippocrates, and he commanded that the knowledge and the prognostics of the death and the life of all [human] bodies should be written (at the end of his life) and that this should be placed along with himself in the coffin, and he ordered that it should be put under his head in the burial, for fear the other philosophers might get his "Arcanum" and the secret of his heart.

At the end of much time after that, the Emperor came, that is, Caesar; and he ordered the tomb to be opened—seeking treasure, that is, gold or gems or precious jewels. And the thing he found there was a shapen box which being lifted and opened what was found in it was a document on which was the "Arcanum" of Hippocrates. And the Emperor ordered it to be given to the physician of his own body and flesh and Amustosio was the name of the physician. He saw the people, and he read

the document, and having understood it he pointed out to the Emperor that it was the "Arcanum" of Hippocrates and the prognostics of death and of life to the human body. And Hippocrates spoke first of all regarding the signs of death pertaining to the Head, and he said if there is pain in the head and swelling of the nostrils that signifies death upon the fourteen and twentieth day (34th). Item, the person on whom there is Frenzy, if his cheek is red (flushed) with his face puffed with COL. XXIX. defect of digestion in the stomach. . . .

Stranguria is (to be) interpreted (as) the emission of the urine in drops (and) that is not a trifling (small) matter. *Donald MacBeath* wrote this.

The first post-script beginning in Col. 27 would seem to be a personal MacBeath note based upon practical experience and observation—for I have not been able to trace its origin otherwise. It would seem also to be in the same handwriting as the text, so far.

The second post-script introduced by *Peritisimus omnium rerum Ipocras* is in a new hand without doubt, and most probably that of one of the MacBeaths themselves. At the middle of the fourteenth line down, another and coarser hand takes the same incompleated matter up. This is almost certainly that of James MacBeath, whom we find making other additions to the manuscript in the year 1598—and long after the O'Cendains and the O'Kearneys had finished their work—when

the book as it stands was in the family possession. From this we must learn that the *Capsula Eburnea*, presently to be referred to, was also, and continuously, in the hands of the MacBeaths.

In a collection of classic, medical, Latin tracts called *Articella*, which was, I think, first published at Venice about the middle of the fifteenth century, the piece *Capsula Eburnea* appears along with tracts from the works of Phylaretus, others of Hippocrates, Johannus Damascenus, Galen, Celsus, Avicenna (the Cantics), and others. It is headed *Liber Hyppocratis dictus Capsula Eburnea qui in ejus sepulchro inuentus fertur*. My edition was printed in London in the year 1519.

The Tract is introduced as follows—"Peruenit ad nos quod cum Hyppocrates morti appropinquaret percepit ut uirtutes iste scripture ponerentur in capsula eburnea et poneretur capsula cum eo in sepulchro suo ne aliquis eam detegeret. Cum ergo uoluit Cesar uidere sepulchrum Hyppo. peruenit ad ipsum: aspexit ipsum: erat aut valde percepit ipsum renouari et fabricari et corpus ejus si integrum inueniret deferri sibi quidquam foderet sepulchrum inuenta est in eo hec capsula eburnea: et in ea iste uirtutes: delata est ergo Cesari: qui in ea aspiciens: Misdos amico suo fideli tradidit"—from which, when compared with the Gaelic rendering, it may be seen that the parallel is not very even between the two.

It would seem that the MacBeaths attached some importance to this tract; and it is surely very interesting, if its history is true, even if it is of no meaning to us in this time. There was a desire to continue it, but James was certainly not the man to do it. It has, however, been done. It was used as base for a Chapter in another Gaelic MS. which lies at the Museum (Egerton, 159), and as it must be of interest for purposes of comparison, I give here a part of it which more than covers the post-script.

Tionnsgainter diryduy ypo. ann so. Peritisimus omnium rerum ypoeras et cetera .i. eochair gach uile eoluis ypr. rofurail

The tract is translated in full (Eg. 159), but it does not follow the Latin very closely, especially in the matter of "critical days." The forms of the language are distinctly nearer to those of our own time, and the writing is in many respects like that of Adv. III. Both are almost certainly of the late sixteenth or the early seventeenth century.

Since I finished my work on this text, I have examined MS. Adv. LX, and I find that my note, p. 3,—1511, must be corrected. The MS. was written at Dunolly, Argyll, in the end

of the sixteenth century and the beginning of the seventeenth—and the signatures, which are frequent, leave no room to doubt that Maconochie or *Duncan's Son* cannot be equated with the Connacher who wrote this book. The signatures are always **i** **oqbair**, **i** **conqbhair**, and **y** **oqbair**—and this is one of the oldest and most famous names in the whole tradition and history of Ireland, easily contemporary with the Christian era. It is Connor now, but Connacher is much nearer to the original. The adherence to the Irish generic **i** and **y** for Irish **ui** and modern **O'** is very interesting and suggestive; and one wonders whether these men of Con-acht may not after all be the Kun-etae of Herodotus.

NOTES.

COLUMN 1.

LINE

1. I here give the whole of the First Chapter from the Latin text of 1501 for purposes of comparison with the Gaelic.

Regimen Sanitatis est triplex, Conseruatium, Preseruatiuum et Reduetium ut innuit Hali tertia particula tegni can. 19. Conseruatium competit sanis, Preseruatiuum neutris, Reduetium egris. Sed Preseruatiuum nominatur Conseruatium ut dicit Haly tertia particula tegni (τέχνης) commento 55. Dico ergo quod Conseruatio fit per similia—unde tertia particula tegni Si vis conservare erasim qualem concepisti similia similibus offeras. Corpori ergo temporato debent dari omnia similia in gradu et forma. Sed corpori lapsa lapsu naturali debent dari similia in forma sed non in gradu propter inelinationem quam habent ad lapsum ut dicit Auicen. 6° Colliget ultra medium lib. cap. de regimine complexionum malarum. Si dicas similia non patiuntur a similibus sibi dicit Auicen. libro p[ri]mo, fen 2^a capitu de signis complexionis Dico quod membra agunt a tota specie in cibum et ideo dico quod digestio fit a toto specie membri per calidum tanquam per instrumentum sicut dicit Auer. 5° Colliget de stomacho structionis quod in minori tempore dissolvitur ferrum quam in igne a toto specie. Sic dico in proposito vel dico quod a similia non fit passio in rebus inanimatis sed in rebus animatis bene potest fieri. Corpora ergo lapsa regantur cum similibus in forma quando ipsa sunt in temperamento eis debito sed non in gradu quia gradus debet esse remissior in cibo quam in corpore nutriendo. Et debet talis regi per cibum medicinale quia per cibum absolute complexio temperata absolute regi debet dicit Haly tertia particula tegni in commento illius Calidiora calidioribus indigent adiutoriis quod lapsum corpus vel calidum ab equalitate per duos gradus debet regi cum calidis in primo gradu vocat frigidum, quia calidum remisse frigidum est in ore medici. Et ideo aliqui errando dicunt ex Haly quod calida debent conservari

LINÆ cum frigidis; hoc est falsum. Tamen preservari possunt cum frigidis remissis et in gradu remissioribus quam sit corpus preservandum. Sed reductio debet esse perfecte in opposito latere in eodem gradu. Hic tamen sciendum quod calida debent regi per remisse calida et frigida per remisse frigida et sicca per remisse sicca, etcetera. Sicut melancolica cum remisse frigidis et siccis remisse et hoc est cum calidis et humidis non absolute sed respectu complexionis melancolicæ. Sicut Commentator Dama. particula quinta asso. commento 67 quod vinum est calidum et siccum tamen respectu melancolie est calidum et humidum. Sic dico in proposito quod ita complexio flegmatica debet regi per frigida remisse et humida et hoc est per calida et sicca remisse. Si tamen complexio flegmatica sit lapsa lapsu accidentali ad frigiditatem et humiditatem tunc debet regi per calida et sicca intensa et hoc est reducere. Consideranda tamen sunt in regimine sanitatis, qualitas, quantitas, ordo, tempus anni, hora prandendi, consuetudo, et etas. De qualitate cibi iam dictum est quia debet esse similis vel in gradu et forma vel in forma licet non in gradu quia ut dixi prius remisse calidum vocatur frigidum a medico et simile est frigidum frigido. Et cum hoc vinum omne calidum et ideo non est intelligendum quod frigida sint similia corpori humano nisi frigida in remisso gradu, quæ sunt calida in ore medici.

6. Galen (Claudius) was born at Pergamos, Asia Minor, A.D. 130. His father, a noted architect and mathematician, gave him a good education, intending to follow the study of medicine. We learn from his writings that he studied under the best physicians of Smyrna, Corinth and Alexandria, and that he travelled widely in quest of knowledge. In his twenty-eighth year he settled in his native town, where he remained for five years. He then went to Rome, where his skill soon brought him into prominence. Envious of his great success as physician and teacher the other physicians made his position so uncomfortable that he went back to Asia, after a while again settling in Pergamos. In A.D. 169 he was again back in Rome upon the invitation of Marcus Aurelius. After some years in Rome, practising, lecturing, and writing, he seems to have returned to Pergamos, but little more is known of his life. Neither the time nor the place of his death is known. He wrote a great number of treatises upon medicine and philosophy—perhaps hundreds—but very many were lost at Rome, where his house was burnt. He also

LINE wrote fifteen commentaries on the works of Hippocrates. (See Col. 6.)

7. **Hali sa treas partegul do thegni H.** in the third *Particle* of his *τέχνη*. This most probably refers to the translation of Hali's works by "Constantine the African" under the title of *Pantegni*. Hali's most important work was "El Malika" or the *Royal Book*. He was a strong hygienist and an independent observer and thinker, basing his practice and his writings upon his determination of cause and actual experience rather than upon his teaching or learning. He died A.D. 994.

Constantine (1018-1087) was for a time teacher at Salerno and afterwards became a monk of Monte Casino.

20. **tabhair neithi cosmuile** *similia similibus offeras*. This doctrine is extremely comprehensive and valuable. It underlies to a most remarkable extent the great part of what is sensible and truly scientific in modern medical treatment. It simply means "See what Nature is doing and help it on." The homœopaths have made these words their chief corner stone, but there is no evidence anywhere in their literature that they ever understood the words in their original and philosophical sense. In fact their practice, which they think is based upon this old teaching, is at once conclusive proof that they have not only not understood it but have perverted it into very strange ways. To a thoughtful student of Medicine, and especially of the surgical side, it is of abiding interest to observe how very much of all that is rational and assured in our treatment of the present time is referable to this venerable principle.

28. **Aueroy**s, usually now written, Avernhoes—a corruption of his Arabic name, Ibn Roshd, or as we should say, Mac-Roshd. He was born at Cordova in Spain in the early half of the twelfth century, where his father was chief magistrate. His early education was directed towards theology and philosophy. He succeeded his father in the magistracy, and was also appointed Cadi of the province of Mauretania by the king of Morocco. His learning and his great gifts were envied. He was charged with having rejected the established religion, and, after being deprived of his offices, he was banished to Spain. Here again he was envied and persecuted, so he fled to Fez and after further persecution there, he was ultimately restored to his dignities by the enlightened Caliph Al Mansur. After an active life he died in Morocco in the beginning of the thirteenth century. Aristotle was to him

LINE the greatest of philosophers. He wrote translations of, and commentaries upon, the philosophy of Aristotle to such an extent that he was nick-named *the Interpreter*.

He wrote a compendium of medicine, called *Colliget* in translations, but a corruption of Arabic "Kullyat" meaning *Universal*. The *Colliget* is frequently referred to in our Text.

31. **Auicina**, now commonly Avicenna for Ibn-Sina, Arabian physician and philosopher, was born near Bokhara A.D. 980. Aristotle was his favourite philosopher. He tells us that he read the *Metaphysics* forty times before he understood it. He was very precocious, finishing his early education at the age of eighteen, when he began to practise as a physician. Losing his father, at the age of twenty-two, he spent several years in travel, studying his profession, and then he settled down at Hamadan as private physician to a noble lady. He was soon afterwards appointed Vizier to the Emir. On the death of his patron, the son and successor did not continue him as Vizier so he went into retirement, meanwhile writing diligently upon his favourite studies in philosophy and medicine. He offered his services to the Sultan of Ispahan and so came under the suspicion of the Emir, who put him in prison. He escaped, however, to Ispahan, where he was received with great honour. He lived and worked here in peace for fourteen years. He died A.D. 1037. His principal medical work was the *Canon Medicinæ*, often referred to in our text. He also left many commentaries upon the works of Aristotle.

COLUMN 2.

3. **Tota species.** I have not been able to find out where this expression had origin. It clearly means the same as our word *digestion* in its widest sense. It seems to imply a big truth, namely, that digestion is not a matter limited to the stomach alone, but is a function of the whole body and of every part of it. Our nails and our hair digest, select, and assimilate the elements of food that are proper to them as surely and as correctly as do our muscles and our bones. The whole body is a digestive organ.

"And from the heat as instrument." This also is a complete expression of actuality. The less heat the weaker function. The higher heat the more life. No heat, no life at all.

- LINE The words "form," "degree," and "high" and "low," "hot" and "cold," in this connection have no meaning, and can have no meaning in our day. They were artificial and *unnatural* concepts, of the empirical form of thought, which imagined man to stand apart from, and outside Nature. The whole truth is well stated in the Sixth Chapter, "As all Nature is, that is God, and so Nature is ordered in man." Man is Nature, Nature's highest product and expression. Man is the microcosm; Nature is the macrocosm. In Heine's wonderful statement, "The Ego equals the non-Ego," the whole of wisdom is complete.
20. **biadh is biadh** "cibum absolute."
24. **Calidiora calidioribus**, etc.—the full quotation needs **indigent adjumentis**.
25. **Cuttromacht** is here used in its original and best sense of *equipoise*, or, as Latin has it, *equalitate*. In the modern speech it always means *weight* or *heaviness*.

COLUMN 3.

9. **Coimplex lenna duibh—lenna find—lenna ruaidh**. These are the Complexions, Temperaments or Idiosyncrasies of the individual body—in older times called Melancholic, Phlegmatic and Sanguineous. In the translation I have rendered the words literally. There is something of a general truth underlying these concepts, and the practice based upon them is not disregarded even in the present time. *Crasim* is the Latin in Col. 1 for **coimplex** from Gr. *κρᾶσις* a *combination* whence *ἰδιο-σύν-κρᾶσις* *idiosyncrasy*, or as it occurs in Old English, "His bodies crasis is angelicall" (1616).
11. **an aithfheghadh coimplex lenna duibh** *respectu complexionis melancolicæ*.
12. **Commentator an Damasenus**—the Damascene Commentator, was "Janus Damascenus" Jahjah ibn Massiweih, a famous physician and teacher of Harun, and a prolific translator from the Greek. He lived 780-857.
28. **don cháil gustrasda** nearly misled me into making it *gustatory*, but it is really for **gusan dtráth** *so lately* or *up to this time—de qualitate cibi jam dictum est*.

COLUMN 4.

LINE

3. **Do chaindigeacht in bidh**—Of the Quantity of the Food—*Quantitas cibi*, is the Heading of the Second Chapter of the Tract, although it ends the First as may be seen. **Dlighear a chaithimh intan tochlughte e**, it (food) *should be eaten in the time that is desired*. This is, of course, a simple commonsense observation, yet, not always acted upon. The word **caithimh** has a wide range of usage. **Gu meal 's gu'n caith thu e** *may you enjoy it and wear it out* is a kindly Gaelic wish when a friend gets a new suit of clothes. **Chaith e a mhaoin** *he spent or wasted his means*. **Caitheamh** is the disease *consumption*. In our Text it is used of the *using, eating, or consuming* of food, always. A little thought will show that the essential idea is the same throughout. **Tochlughte** is from **tochlughim**, which I cannot find in the dictionaries, but throughout the text it plainly means *desire, disposition, and appetite* most frequently.

4. **Arustotul**—*in epistula ad Alexandrum*. Aristotle was born at Stagira in South Macedonia, B.C. 384. His father, Nichomachus, was a physician of the race of the Asclepiadae who traced their descent from Aesculapius. The profession of medicine was hereditary in the family of the Asclepiads, and Aristotle was seventeenth in descent from the founder of the family and the profession. Diogenes Laertius tells us that Aristotle was with Plato at Athens for some twenty years, after which he went to take charge of the education of Alexander the Great for several years. After this he had a school at Athens from 335 to 322 B.C. when he retired to Chalcis where he died shortly afterwards. Some of Aristotle's works are well-known. He was the founder of the Peripatetic School of Philosophy and the originator of the scientific method of investigation and of reasoning. It is safe to say that no human being ever used language so precisely, so closely, and so keen-edged, as Aristotle used it for the expression of the highest efforts of the human intellect. The best minds of mankind have strived to follow him. He remains the supreme model of thought and expression and, as would seem, for all time.

25. **do ní duinte ocus is cúis sin don mhorgadh** *cibus excedens debitum oppilat et est causa putredinis*. **Duinte** is from **dúin**

- LINE *close up; it is Lat. oppilatio which is explained in another part of the Rosa as "Oppilatio hepatis est constrictio seu coarctio seu clausio venarum quae sunt in hepate seu in poris et foraminibus quae sunt in substantia ejus." See Col. 14, 34.*
26. **tre esbhuigh an indfhuartha** *propter privationem evantationis.*—
34. **égintus innfhuartha in croidhi** *necessitas eventandi cordis.*
28. For **innach** read in[tan]nach.

COLUMN 5.

3. **apititus caininus.** I have translated this literally as *dog-ish appetite.* It is a diseased excess of appetite usually now called Bulimia. **Tuitim tochluighi** "*pigritiam,*" *sluggishness.*
7. This would read better and perhaps be more correct as **eirghitt na detaighi inmolta.** The Latin is *vapores boni ascendant,* and my statement in the Vocabulary should be so corrected—although the MS. reading and the context are quite enough to have led me away.
20. The sign 2 is used for **dá** *two* and with a superscript for **dara** *second* (23, 34) and for *est*, and for the terminal syllables **-da** and **-dha.** Inverted 3 is for **con** always as in **otrardha,** **ogmail,** etc. The old Latin 3 for *ejus* is very neatly used in l3 = **leighius** *healing or cure.* Col. 7, 24.
25. **feithi anmfhanda.** The word **feith** is now almost always used for a *vein.* **Cuisle** is the word in the Text for a *vein* (see Col. 27), but in the later usage the word means more correctly an *artery.* This differentiation is desirable and even necessary. The primary meaning of **cuisle** is a *pipe* or hollow tube. The Latin is *nervos debiles*, but we have no word in Gaelic for *nerve* so far as I know.
27. **intán tosgaighius go himurcrach** *quando excedit debitum.*
40. The spelling **imchubhaidh** shows that my rendering **imchubidh** might be better so spelled, but as I had it so set in type I have left it as it was. The same is the case with the word **dlighear** which I have put in the Scottish Gaelic form throughout. In the division of words I have also leaned towards the Scottish forms rather than towards the Irish method of "eclipsis"—but this does no violence to the language.

COLUMN 6.

LINE

4. **duine ro-dheisgribhidech** *homo summe discretionis.*
5. **an senduine on tsenordhacht**, lit. *the old man from* (because of) *the old-agedness*, but the latter word seems to have a specific meaning apart from its etymology. O'Reilly renders it as "the fifth stage of human life, from 54 to 84 years of age." It is, however, very difficult to deny a kinship between it and the Sc. Gaelic **seanair** *a grandfather*, which is usually taken to mean **sean-athair** or *old-father*. It is, however, equated with *sen-ator*. The *senex* of Latin was a man over sixty. The meaning of the Text is however quite clear. It means a man old beyond the generally accepted old man. In the second line we find **dona tshenduine on thsendacht** *to the old man because of his agedness*, but here in the sixth line, as quoted, *the old man because of his over-agedness*—the treatment is different. The Latin in the younger case is *seni a senectute*, and in the older *seni a senio*.
6. **dibenta** *decrepiti.*
8. **lóchrand ullamh cum baithi** (leg. **báidhti**) *lucerna parata extinctioni.*
9. **sa .c. partegul d'amforismorum.** This clearly refers to the Aphorisms of Hippocrates, for Galen makes the Comment. It is, in my copy, the 21st Aphorism of the Second Book *Δίμων θώρηξις λύει.*
12. **Fiarfuighim** *I ask.* Compare **ag iarraidh** *seeking*, Col. 10. These words are part of the same verb but the one has initial **f** and the other has not. This **f** initial is not "organic"; it does not belong to the first part of the original compound word **iar + fach** which is the preposition **iar** *after*. It is called "prosthetic." It seems to be a matter of dialect and is very unstable. See **osluighthi** (13) where Sc. Gaelic would have **fosgailte** *open*. It comes and it goes readily. It comes very often where it does not belong, and it goes, perhaps as often, where it does, e.g. the Preposition **ri** which was originally **frith**, Lat. **vert**, *turn*. We have **feagal** for **eagal** *fear* in several districts, and other similar instances might be given.

COLUMN 7.

5. **isin tshingcoipis** from **συγκόπτειν** *to cut short*, usually applied to fatal fainting coming from heart-failure.

- LINE
10. **dá (2) bhriala**—see the explanation seven lines down *as much as a person can take without drawing breath and yet not restraining it*. I cannot trace the word satisfactorily. *Bria* was old Latin for a wine-vessel, but it is not easy to see a connection with this. *Bala* is a *mouthful* in Arabic and this may have been a miswriting. It is certainly interesting that our own word even now for a mouthful is **bala-gum**. In a text of 1595 it is *duas phialas*, but in the margin it has “*duas brialas est in auctore*.”
12. **déis cuislinde** lit. *after the vein*, but used here and frequently in the Text for *blood-letting*—see Col. 27.
13. **Dlighear an gnathughadh do coimedh annso mad arrsaigh e muna fa ro-olc e** *the (usual) habit should be observed here if it is (an) old (custom)*. **Arrsaigh** is not now in use and it does not seem to be etymologically related to **aois** *age*, for which it is frequently used in the Text. **Fa**, again, is used here not as the prep. **fa** = **fo** *under*, or as in **fadhó, fathrí** *twice, thrice*, but as the verb *to be* **fa** = **bha**. Compare Col. 17, 12.
18. **claochlogh anala** *change of breath*—or between one breathing and another. This in Sc. Gaelic is **caochladh** with base **clóim muto**, *I change*. It is very finely used in the common speech for the great change of death. The idea of extinction is entirely absent—excluded. It is never used of the death of animals. **Caochladh aghaidh nan speur** is *the change in the face of the skies*. **Caochladh na h'aimsire** is the change or *transition* of the seasons. The concept of essential continuity is as clearly implied in the word as is that of simple change. **Chaochail e** *he has changed*—Eng. he is dead.
27. **san inadh .c. na** *in the same place*. This single .c. is used as here in **cétna** *the same*. It is also used for **cét** *first* in .c. **inadh** *the first position* 27, and for **cét** *a hundred* **goraibhi a athair fén .c. bliadhan ina bhethaig** *that his own father was a hundred years in his life*—that is, of age 10.

COLUMN 8.

2. **taréis na coda** *after the meal*, is for **tar** *trans* + **éis** *a trace* or *footstep*. It is always translatable as *after* even when combined with another prepositive as **déis** for **do** + **éis**. It may take a personal pronoun as **tar a éis** *after it*, **dom éis** *after me*.
14. **fundamint** is the Lat. *fundamentum*, but what the exact physiological intention here is I cannot well say. It may mean

- LINE that the food was supposed partly mixed or dissolved and partly not, and that the latter was the *fundament*.
16. **continoidech** which I translated as *constringent* in my Essay, basing it upon Lat. *contineo* in the sense of *holding together*, e.g. **leighes continoidech** *astringent medicine* will hardly do here. The Latin is *multiplicat vires non quantitatem continuam*, the *unbroken* or *ordinary quantity*. O'Reilly gives **cointoiniodeach** as *customary*—from an old source.
18. **trí deocha** *three kinds of drink*—Alteratiuus, Permixtinus, Delatiuus. The Alterative was supposed to effect a beneficial change in the body without materially affecting the fluids—the humors. The Permixtinus was a “mixed drink,” but whether it had any fixed formula or any definite aim would seem to be impossible to know. The drink Delatiuus is rendered in Gaelic **imairctech**, which means *removing* or *changing*, and the fact that it should be taken after the meal suggests that this was something like the purpose of it. The word is made up of **imm + air + ic** *to come*.

The “Appetiser,” the “bottle of wine,” and the “Liqueur” of civilisation are doubtless descendants of these three drinks, performing similar supposed service.

COLUMN 9.

1. **caindighect na nithead is intabhurta** *quantitas offerendorum*. The prefix **in-**, **ion-**, signifies *fitness* or *appropriateness*, so **intabhurta** means *giveable* or what is right to give.
7. **D'Ord in Dieta no Caithme in Bhídh**—*Of the Order of the Diet or the Eating of Food*. This begins the Third Chapter as stated at the end of the previous paragraph.
13. **coimleadh an corp**, *let him rub the body*, from **co + melim** *I rub* or *grind*, Lat. *molo*. The same word is used for the teeth (24)—**coimleadh a fhiacila le duille uircill . . . ocus le croicinn an ubhaill buidhe** *fricet cum foliis citrulli et cum cortici citri*.
23. **tursgar na súl** very likely a metathesis from **trus** *gather*, therefore, what gathers upon the eyes during the night—*illud enim aufert lippitudinem oculorum eosque clarificat*. Lippio was an old expression for having sore or bleary eyes.
32. **na gabhadh roimhe ocus na cuireadh a fail** *non ante nec tardius*.

COLUMN 10.

LINE

2. **do lenduibh morguighthi** *with corrupt humors, pravis humoribus.*
3. **linadh tadhbais o l[ind] r[uadh]** *a heavy filling from red humors, venit repletio fantastica propter choleram contractam ad os stomachi.*
5. **lisin thochlughadh ainmhidhe** *with the animal (natural) desire, appetitu naturali.*
10. **prolongare**—it should be noticed that the loop on the stem of **p** is in front *before, pro* the stem, whereas in *per* it is after the stem—if the vowel is not superscript as in Col. 1, 8.
16. **Ni gabdhaois biadha examhla an éinfheacht** *nec diversa edulia acceperisse simul.* **Examhla** = **eu** + **con** + **samail** the negative of **cosmail**. **Ein** *one* + **feacht** *time*—the word is not now in use, but it remains, if rather hidden, in the words **feasda** *for ever* and **fathast** *yet*, which are our present forms for old **i-fecht-sa** and **fo-fecht-sa**.
26. **meadughadh** here has a slightly exceptional meaning. Usually the direct meaning is to *enlarge, to make large*, but here it means to *equate* the food to the powers of the stomach—to make the food “as large as” the stomach can use. The Latin has it well as *apportionare*.
30. **o nach feduruis cad is indenta** *quum ignoras quid sit faciendum.*

COLUMN 11.

13. **Proindiughadh orduighthi** *orderly (or proper) feeding*—to take food three times in two days. **Proind**, the base here, is evidently the Lat. *prandium* “a dinner,” but used in the general sense of a meal. Compare “post prandium” with **déis in proindighthi**, Col. 12, 22.
14. **Fathrí sa dá lá .i. fadhó ládib ocus einfecht lá eile** *twice in the two days, that is, twice on days and once (only) on the other day.* The modern language has lost these very useful forms **fadhó, fathrí**, etc. They should be restored.

This dietary may seem peculiar—one day two meals and the other day one, or three meals in forty-eight hours. A personal note may be excused. While on a long sea voyage two years ago, I found that the regulation three or four meals a day made

- LINE me quite useless, and strangely enough I fell into this very way of two meals one day, and only one on the alternate days. The result was to me altogether excellent, and indeed surprising, and I have followed it more or less closely ever since. I can truly say that when I may depart from it I am in no way benefited, but distinctly the reverse. This was before I knew anything of this Text or of its teaching.
25. **tuirlingha an bhiadh** in MS. Should be **an bhidh**.
28. **uiginti duas**. This seems to be an error. In the Latin texts it is always *sedecim*.
30. **tre moille oiprighthi na brighi dileaghthaighi** *propter tarditatem operationis digestivae*.
32. Read **na[in] inaduibh** etc., *quam in aliis digestis*—a recognition that they knew digestion took place in other parts as well as in the stomach.
35. **is luath indtaighter** etc., *et ideo cito convertitur in rosem (in rorem, 1595) in poris membrorum*.

COLUMN 12.

9. **gur sgeigheadur** *evomuerunt*.
13. **Lubra**—the word seems essentially to mean, or rather to have meant, *leprosy*, when that disease was common in this country, but later the word seems to have come to mean simply “disease” in one of its coarser external forms. Specific leprosy seems to have followed the Crusaders into Western Europe. Lazar-houses were numerous in England from eleventh century onwards for more than five hundred years. There was a leper-house at Canterbury in the eleventh century, and one was established in Edinburgh as late as 1591, and it was the end of the eighteenth century before the disease disappeared—in the Shetlands.
14. **Lictuairi** a *lectuary*, an old form for electuary. Chaucer has it “Too late cometh the lectuarye.”
17. **Drageta**. This seems by some way of kinship to be the same as Fr. *dragée*, a sweetmeat or comfit. A form *dragé* is used in modern pharmacy for sweetmeat covered medicines.
- Rufhus**—of Ephesus, a man very greatly in advance of his time (about 50 A.D.) especially as anatomist.
25. **Marchuideacht** *riding, horsemanship*, from old Gaelic **marc** a horse—W. Cor. Br. **march**.

LINE

32. **tar modh amach** is rather unfamiliar. It means that the sleep and the sleeplessness *which goes beyond manner* or is excessive either way, is bad.

COLUMN 13.

7. **Arson nan ae do beith faoi in ghaili** *because the livers are under the stomach.* It is remarkable that the liver is always referred to in the plural form. This implies that they knew the evolution of the human liver, and that morphologically it is a compound organ, or that they made no post-mortem examination or dissection of the human body, and that they derived their knowledge from observations upon the lower animals. It is well known that dissection of the human body was even a rare thing in the old Schools from which our MS. had origin, but in the Latin texts the word is always in the singular, in Gaelic only is it in the plural form.
8. **dilighur impog ar in taobh clé** *you should change to the left side.* The writing of **dilighur** which is wrong for **dlighear** shows that the writer was copying and that not intelligently. The same sort of error occurs frequently. In Col. 14, 10 **móran in bidh** was written **móran in biadh** but it was corrected and even then left wrong.
22. **angar do beith asuighi** *visi quasi sedendo.*
29. **o mhaidin go teirt** *mane usque ad tertiam*—to the “third hour”—after sunrise. O’R. has **Teirt** *sunrise.*
33. **cluthur le hédach gomaith e** *pannis bene contegatur patiens.*
35. **measruighter aicidigi na h’anma** *accidentia animar reperentur.*

COLUMN 14.

2. Note the contractions for **acht**, **nach** lines 2-3. The former is very often met with as terminal **-acht** and **-echt**, and the latter for **nech** *a person.*
8. **sul toitís an biadh** *before the food falls*—**toitís** mis-written for **tuitís.**
16. **édrum** *light*, compare **édrom** line 4.
17. **ar an cétna** *upon the same thing.* Note the contraction for **cétna.**
19. **athumulta.** I cannot find this word anywhere. It means

LINE “molesta,” and is perhaps **ath-thum-alta** or as we should say *repeating* of the food.

21. *res est manifesta*—a new way of writing *est*.

22. **teaguisgaigh an ealadha leighis** *the art of medicine teaches*.

This means rather that from the means used an instructive inference can be drawn. If the remedy used, and directed towards a definite purpose, succeeds, then the inference is good that the diagnosis was right.

32. **na fastaighter ar én cor iad** *nec reteneatur ultra quam natura stimulat*, let them not for any reason be restrained or withheld. The verb is spelled **fostogh** in Col. 7. The meaning here is that neither the natural inclination of the bladder or of the bowel should be for any reason restrained beyond the time in which it is the habit to empty them. This advice holds true in our day—and with emphasis—when our most valuable lives are too often wrecked or lost from Appendicitis, of which this unnatural restraint of the bowel is almost if not altogether the simple and sole cause. It is not the farmer or the field-worker or the shepherd who suffers from Appendicitis, but the dweller in the office and especially in the drawing-room. Without anti-peristalsis there would be no Appendicitis; but the very simple physiology of the matter cannot be entered upon here. The advice is powerfully pertinent, and the explanation in the Text is quite complete—“**on gaothmuirecht ag impogh suas**.” There is no need for any theory of Appendicitis beyond this. A well-known English epitaph gives sound and sincere advice on this matter; but a friend has, for some reason, thought it would be better Latinised, and in *his* Latin.

“Quacunque sis, efflate bis;

Retente, me—hic jacit!”

That retention of the urine may cause stone is not at all unlikely, but that it may and does cause syncope there can be no doubt.

34. **oir do gendaois duinte** *quia generant oppilationes*—see Col. 4, 25.

38. The last line is an interesting note; it is the signature of Hugh O'Cendainn, the writer.

COLUMN 15.

LINE

1. **nech** in MS. has the aspirate, wrongly.
8. **sa ló conoidchi** *in the day with a night*; **oir is e sin in lá nadurda** *for that is the natural day*—24 hours. This preposition **con** is lost to modern Sc. Gaelic although it remains hidden in a few old expressions. **Slat gu (con) leth** *is a yard and (with) a half*.
16. **do leith na haoisi**, etc., *actati, regioni et tempori*.
21. **na cabain inmhedhonach** *the internal cavities, ventres*—the stomach and intestines.
25. **oi ni bfuil** *for there is not*. **Oi** here is for **oir**. It occurs so, and so often, in the Text that it becomes a suggestion the writer was tongue-tied or lisped. It occurs Col. 17, 4 and 26, where it is followed 28 by **oir** for **uair**.
29. **doréir shinte in edluis**, etc. It is very difficult to understand the concept underlying these phrases. The Latin (which I have been compelled to put in the Translation) is just as difficult to understand. The wording is not difficult but the meaning is.
33. Note **q** with **m** superscript for **chum**, and in 36.
35. Observe the reversion of the writing here to the previous line 34 and continued in the following 36. This is the rule in these MSS. and almost certainly for economy of space—see Cols. 6, 32; 20, 6. **Mesurrdha** here is *temperatus*.

COLUMN 16.

5. **da tucaoi** should be **da tuctaoi**.
16. **tempore brune** = *tempore brumae*. *Brūma* is more correctly the shortest day or time of the year—the winter Solstice or Christmas time. It is really *brevissima (dies)* contracted. It is here meant for the Winter or the cold time as a whole.
20. Note the terminal contraction 2 for **-da** in **mesurrda**. This, with and without the aspirating over-dot, is frequent. Compare **mi-mesurrdha** 24.
22. **in moderatis**—*immoderatis* **mí-mesurrdha**.
33. **roimh an teirt**, etc., *ante tertiam et hora vesperearum*.
34. **uair an éigentuis** *tempus necessitatis*.

LINE

37. nach eidir le nech, etc., *nullus potest observare tempus cibi sumendi nisi is qui non est occupatus in aliqua operatione necessaria aut qui liberam habet conditionem in omnibus.*

COLUMN 17.

10. Don gnathughadh *Consuetudo Dictandi.*
 29.ocus mar ata in nadur uilidh, etc., *et sicut est de natura universalis quae est deus ita de particulari in homine quia non statim punit sed in processu temporis.*
 32. an .c. oi = an cét uair *the first time.* See Col. 15, 25.
 36.oir do ní gach uile thoradh, etc., *omnes fructus faciunt sanguinem aquosum et inutilem et putrefactibilem.*

COLUMN 18.

5. lagaid na húbla rosdaighthi roim an qid[chuid] lucht l[enn]a r[uaidh] *the roasted apples (taken) before the meal relax those of red humors—colerici.*
 7. istipeda = is stipeda, and so also at 9, *they are the more binding.*
 13. Ysaac (Ben Soleiman, 830-940) was a pupil of "Johannes Damascenus"—Col. 3, 12. He made a special study of Foods, determining the value not only of the different kinds of flesh, but also of the different parts of the same animal. Though a Jew (hence called Isaac Judaeus) he was strongly in favour of pork as a nourishing food.
 27. drong ele a gcinn ocus drong ele a gcnamha. This is perhaps the best example of Irish "eclipsis" in the Text. It occurs with other initial consonants, as may be seen, but not at all regularly. It is not unlikely that the Scottish tendency, which has quite done away with "eclipsis," was asserting itself at the time. There is a superfluous a at the end of 27.
 29. pisces et mulieres. It is *uxores* in the texts available to me, and so it is rendered in the Gaelic—na heisg ocus na mná.

COLUMN 19.

1. mur is folluis do tharr in bradain. Mur if not quite wrong would be better as mar. Mur is the Negative Conjunction if

LINE *not*; but **mar**, which is here certainly intended, is the Adverbial *as*.

I was very nearly misled by **do tharr**, which I took for **do thár** *regarding or concerning*—the salmon. This, however, is the old **tarr** *the belly* of the salmon which is, as evidently was, considered the best and most digestible part. **Donnachadh Bán** finely sings of the "**Bradan tarra-gheal**" *the white-bellied salmon*. The Latin is *ut patet de ventre salmonis*.

2. **in cuid is mo bis ar gluasacht**, etc., *illu pars quae magis est in motu pauciores habet superfluitates*.
8. **gluasacht hégin** *some movement*—a certain amount. Note the contraction for **h'eígin**—it frequently occurs.
9. "That which tastes best nourishes best"—a very neat expression and perhaps true all the way, yet the "verse" is against it.
14. **is don milsi oenda tuighter sin** *it is of the single sweetness that is to be understood*. *Single* here means the sweetness of one simple article of food as against the *compound* sweetness of made "dishes," or **neithi cumuisgtech**—see Col. 8, 20.
16. This contraction for **etir** is not common.
22. **an drong lerbáil coimriachtachain do gnathughadh** *qui volunt uti coitu*.
26. **gna a denumh gominic** should be **gan a denumh** *without doing it often*—simply bad copying.

COLUMN 20.

1. **Don cuislind umorro** begins the paragraph upon Blood-letting.
2. **aū** here is for Avicenna and not Averrhoes.
4. **Aphoplexia**. This word is a remnant of the old "evil spirits" concepts of disease. It is even now in English called "a stroke." The idea was that the evil spirit came up stealthily and maliciously from behind and *struck* the unfortunate victim with a mortal, even if invisible hammer, so knocking him down, perhaps never again to rise.

"Whilst Apoplexy, cramm'd intemperance knocks
Down to the ground as butcher felleth ox."

Thoms. *Castle of Indolence*.

The same concept is in the word Epilepsy in which the malicious spirit was thought to jump or *leap* upon the victim

- LINE unawares and held him under, writhing and foaming, during the fierce struggle. The Greek origins of these words are plain and their meanings also.
5. **Meghathegni** = μέγα + τέχνη the Great Work—see Col. 1, 7, note.
 6. Note the reversion of the Latin quotation.
 9. **don uile fholmugad** (O'G.).
 10. **gurob cara don nádur fuil derg** *that red blood is more akin to nature—to the tissues of the body—than any of the other fluids.* This of course is quite correct. “Quia sanguis est amicus naturae plus quam alius humor.”
 12. **intan is imarcach e** *quando excedit.*
 13. **coimplex fola deirge** *a ruddy complexion* showing that he is full-blooded.
 17. **squinancia ocus nescoidedh inmedonach** *quinsy and internal ulcers.* The word **nescoid** is now limited specifically to the boil and *carbuncle*—*apostematum interiorum* is the Latin—but in the old time before the advent of our pathology its application was very wide and very indefinite.
The genesis of the word is given in Cormac's Glossary as follows: Goibniu, the smith of the Tuath dé Danann, was at his forge making weapons for the battle of Moytura when something affecting the character of his wife came to his ears, and this upset him. “There was a pole in his hand, when he heard the story; Ness was the name of the pole; and he sings spells over the pole; and to every man who came to him he gave a blow of this pole. Then if the man escaped a lump of gory liquid and matter was raised upon him, and the man was burned like fire, for the form of the pole called Ness was on the lump, and therefore it was named **Nescoid**, from that name. **Ness** then, that is *a swelling*, and **scoit** *liquid*”—all which may or perhaps may not be quite true. **Ma's breug uam is breug chugam.**
 20. In both my Latin texts of 1501 and 1595 this is “secunda particula Aphorismorum commento sexto” without the **dá fithett** of the Text.
 24. Read **fathrí acind [a] dara.**

COLUMN 21.

3. **Uair toghnidhi na bliadhna** *the time of year to be chosen—* for Blood-letting—begins a paragraph. The origin of the word

LINE **bliadhna** the *year* has not as yet been very conclusively explained. It is **bliadain** in old Irish, and O'Reilly (*Introduction*) argues at some length that it is the Keltic **Bel-ain** the great *circle of the god Bel* or the Sun—for **aine**, G. **fáine**, Lat. **annus**, and **anus** was and is a *ring* or *circle*, and see Dr. Macbain *in voc.* **Bealltuin** and **Bliadhna**.

5. **oir ni fuil én ní coimedus nech ar eslaintibh in t'samhruigh mar do ní cuisli an erruigh** *for nothing protects a person from the ills of Summer (so well) as does the Spring blood-letting.* **Coimedus**, which I translate *protects* here, is the same word as often occurs in the sense of *seeing* or *foreseeing*—see Col. 1. The Preposition **ar** is here used very clearly in the sense *against*.
14. **um feil Stefain ocus**, etc., *about the feast of St. Stephen and about the feast of John Baptist.* The Preposition **um** is here nearer to its original form than is usually met with. In modern Gaelic it is inverted to **mu**, although it still remains in the compound Prepositions as **umam**, **umad**, **uime** and **uimpe**, etc. Its cognates are W. **am**, Cor. and Bret. **am** and **em**, Gaulish **ambi**, Lat. **ambi**, Gk. **ἀμφί**.
19. **Don taobh as an dlighear a ligen**—*Concerning the side on which it should be let*—a paragraph.
23. **do leith an ré** *regarding the moon.* **Ré** is here used in its classic sense for *the moon*, which is now **a ghealach** or the *white one*. This should be a paragraph.
27. **Don diet d'áithli na cuislindi**—*Of the diet after the Blood-letting*—another paragraph.
31. **macht cadfarligettur i.** This is one of the places in which I find a difficulty in rendering the contraction which reads **macht** as **maseadh**, and yet I do not know a form **macht**, nor can I find one anywhere. **cadfarligettur** is *quem amiserunt*.
33. **an aithfeaghadh in begain bid** *in compensation for the small (quantity) of food*; but Latin is *in comparatione ad illum parvam cibum*.

COLUMN 22.

1. **is usa linadh na dighe na linadh an bidh.** This is one of the Aphorisms of Hippocrates, although the author does not mention it—eleventh of the Second Book—**Πᾶσι πληροῦσθαι ποτοῦ ἢ σιτιοῦ** *facilius est repleri potu quam cibo*.

LINE

4. **na biodh go gar do theine ocus na denuid coimhriachtain,** etc., I would translate this last word as *effort*, for the word and context would bear this rendering, but the Latin has it *nec igni nec coitu approximant*.
14. This is a little troublesome in **t'errach a féil peaduir** in the *Spring at the feast of St. Peter*. The feast of Peter Apostle is 29th June. That of St. Patrick, 17th March, would fit rightly, but Patrick is never *Petrus* but *Patricius*.
19. **doréir nan astroluighedh,** etc., *et hoc secundum Astronomos qui ponunt tempora aequalia—non sic Medici*.
Observe the contraction for **noch**, **l** = *vel* = **no** + **c** with aspiration.
27. **fo examhlacht uairedh a laetheadh** *secundum horas diversas diei*.
30. **na h'uighi ocus a caibhdeal** *ova et candellum de ovis valent flebotomatis*. The Gaelic is evidently made from "candellum," which I cannot follow. That it was something *white* (from *candeo*) made from eggs is clear—custard pudding, or what we please.

COLUMN 23.

2. **in potaitsi...do cabhlan ocus do hocus,** etc., "*fiat brodium de caulibus, malva, salvia, petrosilino vel de albis capitis porrorum decoctis et expressis*" (1595).
6. **ocus a coimsuighedh le bairdi almont** *and mingled with milk of almonds, "cum lacte amygdalarum confectis."*
7. **gurub romaith an t'Ord.** I prefer here to **an toradh** for it reads better with context, although the writing of the word favours the latter, and the grammatical setting is also in favour of it. Latin, however, is *dico quod amygdalae comestae sicut sunt vel excoctae sunt optimi fructus flebotomatis et ethicis* [hecticis].
11. **lucht na ptisisi** *those of phthisis*—such as suffer from phthisis.
23. **eanbruithi** *soup*, suggests that there is a *bird* in it, at any rate etymologically, for it is frequently written **énbhruithe**. The Sc. Gaelic is **eanaraich** for *broth, soup*, but this would not greatly oppose my suggestion. Cormac's Glossary says that it means *the water of flesh*, from old **en** water + **bruithe** *flesh*.
32. **oir is dúintech righin iat** *for they are constringent and tough, quia est valde oppilativa et viscosa*. **Treabhantar** is *curds and whey* (O'G.). The Latin is *pinguedo lactis vel crema*.

LINE

1. The plants named in this paragraph are—
 “Kale” *Brassica oleracea*, **Ocus** *Oculus Christi* Wild Sage, *Salvia verbenæ* (but Lat. *malva* mallow), **Saithsi** sage, parsley, and the white heads of leeks—with milk of almonds.
2. Borrage, Bugloss *Echium vulgare*, Violet, Mercurial, Spinache, Monk’s rhubarb *Rumex patientia*, Lettuce, the tops of Fennel, parsley and Avens *Geum urbanum* the “herb Bennet” *herba benedicta*, because, as Platearius says, the Devil cannot enter a house in which the root is kept.

COLUMN 24.

2. **na h’oisreaghdha** *the oysters and the half-raw things are bad.*
4. **is beg nach leth don dileaghadh . . . cogaint maith in bíd**
good cooking of the food is nearly half of the digestion—a very wise observation.
9. I misread this sentence at first, and almost excusably, because of the peculiar use of the word **tindisnech**, and because of the miswritten **daniri** for **dan aire**. The meaning is that “those err who eat food *too hurriedly* or *ravenously*, for thus they sometimes eat injurious things without being brought to their notice”—*errant qui nimis festinantur comedunt et aliquando comedunt nociva et non advertunt.*
12. Here, as is usual, the coming new Chapter is announced—Of the Age and of the Complexion—no doubt also to save space.
14. **daoine óga—sen-daoine—macaoimh**, although all Masculine in form, and literally, are nevertheless better rendered as *young adults, old people, and youths.*
22. **caithid neithi seimhe . . . noc[h]** *intuighter go luath comedunt igitur subtilia quæ cito convertantur.*
29. **bit tirim go foirimillach**, etc., *sunt sicca exterius et solidiora per totum ideo minus divisibilia a calore.*

COLUMN 25.

1. **is olc aran na pastae** *panis pastillorum est malus*, probably something of our own *past-ry—riaghail forlethon regula generalis.*
4. **intan taidhillter e** *quum tangitur.*

LINE

7. **In t'aibstínens measardha is ro-árd in leighes e** *the moderate abstinence is very high healing—it is a noble treatment. This is one of the very many native, wise comments to be met in the Text, showing all the time that the author was thinking and writing upon the basis of a sound and observant experience. Abstinenti enim moderata est summa medicina.*
14. **is ro-urusa lis na sen-daoinibh in tréiginus d'fhulang** *old people bear emptiness (abstinence) very easily.*
19. **is leor ansacht,** etc., *phlegmatici bene possunt jejunium.*
20. **fíond** in MS. should be **find**.
24. **oir is luigha in tes disgaoiles indtu,** etc., *qui calor dispersus est minor et possunt plus resistere.*

COLUMN 26.

5. **nar bu dimaoín let céimniughadh déis na coda** *and do not think it is in vain to take a walk after the meal—after the supper. This is probably the source of the proverbial advice “After supper walk a mile,” and see Introduction, p. 12, “post coenam stabis aut passus mille meabis.”*
8. **na conaim ar th'fual ocus na héigin[i]gh go láidir do shuig[h]i** *do not restrain thy urine and do not distress thy seat—the bowel. This is in effect the same advice as is given Col. 14, 32, with perhaps the implied difference, or rather agreement, that restraining strongly, and forcing the bowel unnaturally, are both wrong and very injurious.*
12. **ataid naoi socamhuil do beir in fíon glan duit** *the clean (pure) wine will give thee nine comforts—or benefits, namely :*
1. **imdaighi na brigha** *it will increase the powers (the strength).*
 2. **lagaid na hinde línta** *it will relax the full intestines.*
 3. **nertaighi in gaili** *it will strengthen the stomach.*
 4. **ocus in incinn** *and it will strengthen the brain.*
 5. **do bir in croidhi subaltach** *it will give the merry heart.*
 6. **do ní dánacht** *it will make (give) courage—efficit audacem.*
 7. **togairmidh an t'allus** *it will call forth the sweat.*
 8. **geuraigi in t'indlecht** *it will sharpen the intellect—aptat ingenium.*
 9. **ocus do ní foirbheartas do na cáirdibh** *and it will make a stimulus to the friends—towards friendship.*
- This is a very fair statement and withal correct—and yet

- LINE "let moderation be with it so that its working may not be perverted." The case for the use of wine could hardly be better stated.
25. The contraction which I have extended as **foirbheartas** (9 *supra*) O'G. renders as **forbfailtecus**, where **for** is an "extensive" + **failtecus** an *agreeable welcoming*; and O'R. has **forbhfaoi-leadh** for *mirth* = **for** + **faoilidh** *joyful*. Latin is *tali lusus congaudat amico*.
31. **fhuar** MS. should be **fhuair**.

COLUMN 27.

inté caithius cainel *he who uses cinnamon*—a very interesting expression which the modern language has lost. We cannot now say **intè** *the he* or *the him*, but we still retain **inté** *the she* or *the her*. Scottish Gaelic has lost the Masculine form but the Feminine remains.

Et is lór so, etc. This finishes the Tract. The rest is a postscript with no reference to the section of the *Rosa Anglica* upon which our Text is based.

It is difficult to say whether the handwriting of the rest of this Column is the same as that of the Text so far—although it almost certainly is, and therefore is that of Aodh O'Cendainn.

go h'ealadhanach le teine *per artificium, per ignem*.

COLUMN 28.

5. **Eochair gach uile eolais Ipocras**, *Hippocrates* (is) *the key of all knowledge*, was born in the island of Cos about 460 B.C. He was of the family of hereditary physicians descended from Aesculapius. His father Heraclides, himself a famous physician, taught him in his early days. After extensive travel and a wide experience, he established the great medical school of Cos, where he taught that the right conduct of life and right diet was the basis of health and the cure of all disease. His *Aphorisms*, which seem to have been culled from his extensive writings either by himself or by some of his followers, though fairly well known, but yet not so well known as they should be, are even now worthy of attention. Some sixty works are left us to his credit, but his authorship of several of these is doubtful. Galen (Col. 1, 6) was his great commentator. He is said to have died at Larissa in Thessaly B.C. 357.

COLUMN 29.

The few words here are of little interest except that "Donald MacBeath wrote this."

FURTHER NOTES.—I. **Sanis** *to the healthy*. It is most interesting to notice how the significance of language changes. Our *in-sane* people now are out of their mind. In the old time they were out of their health or *wholeness*. They were "broken" people. It is difficult to see the advance in conception. Perhaps there is none. The best definition of health that I ever learned was from the late Sir James Paget, if I am not mistaken, "If you close your eyes you don't know you are there at all." I have met with another definition in a margin of an old Latin text, "Qui bene ingerit, digerit, egerit is est sanus," but this reduces the human being to an animal machine pure and simple, and it is as well not to translate it into English, and certainly not into Gaelic, for the language is too plain. It reminds us strongly of "Rob Donn's" famous and perfect definition of the "useless," **Ghineadh iad is rugadh iad is thogadh iad is dh'fhás; chaidh strác do'n t'saoghal thairis orr' 's mu dheireadh fhuair iad bás.**

XII. 14. The following from Add. 546, B.M. Fol. 1 shows the distinction here made very clearly **Ata cuid do na leigheasuibh aenda agus cuid ele comsuighithi** *some of the medicines are simple and others are compound.*

The **punctum delens** is often met with in these MSS. Where the scribe, through carelessness or ignorance, has written a letter which should not be there, he or some one else on noticing the mistake put a dot *under* the letter. It is seen under the first **n** of **ieinunius** VI 16, under **i** of **oire** XIX 12, and under **ac** at end of XXVIII 21.

At XVI 31 observe **uair** in the margin and the mark of reference between **isí** and **is**; therefore **isí uair is fearr**.

GLOSSARY

A

A, An the Article *the*; **a samhrad ocus an geimhredh** *the summer and the winter* 21; **do lucht na h'eslainti** *to those of the ill-health* 1; **an gaili** *the stomach* 26. It is in frequently; **in foculso** *this word* 7; **in dieta** *the diet* 9.

A for in mod. **an in**; **a caibidil comhartha na coimplex** *in the chapter upon the marks (or signs) of the complexion* 1; **a ceim ocus a foirm** *in degree and in form* 1; **a póiribh nam ball** *in the pores of the parts or organs* 11; **an aimsir asan** (for ins an) **dtaighter** *the time in which* 14; **a croccan** *into a pitcher* 8.

A, As *out of, from*, Lat. **ex**, Gk. ἐξ: **as a ghaili** *out of the stomach* 11.

A *his, her, its*; **féttur a remh-choimhed** *it may be prevented* 2; **a aighiadh** *his face* 9; **a thráta Muiri** *his hours of Mary*; in an **dúsacht** *in their waking—awake*, in the day 13; **drong ele a gcinn ocus drong ele a gcnámha** *some people (chose) their heads and other people their bones* 18.

Abair *say*; **mar an abair** *where he says* 2; **et dan abairsi aburadh a thráta Muiri**, *let him say his hours of Mary*.

Abfullan "**auellana**" *the hazel nuts* 19.

Ac for **acht** *but*; **ac gurub lugha is fuar in t'iasg** *but that the fish is less cold* 18; **ach ar críchnughadh** *but after finishing* 19 It is for **ag** at Col. 5: **ac ind aimsir** *at the time*.

Adeir, adeirim, adeirimsi, adeirur 1, all are forms of the irregular verb to *say* as are **adeirit, adir** 2; **mar adeir Hali** *as Hali says* 1; **maseadh adeirim** *therefore I say* 1; **mar a deirur** *as is said* 1; **adeirimsi** *I myself say* 2; **adir Hali** *H. says* 2; **adeirit drong** *some people say* 2; **mar a dubhurt Rufhus** *as R. said*: **mar a dubhramar** *as we said* 10.

Adharc *horn*. The word primarily means *the thing to defend with* but here it means the horn-cup used for "cupping."

The word had another side meaning as *trumpet* whence *gilla-adhairce* *horn-boy* or trumpeter; *dlighear an adhar* *do cur* *where the horn should be applied* 27.

Adhbur *cause, reason*; **ocus is ar in adhbur sin** *and it is for that reason* 4.

Ae *the liver*; **arson nan ae do beith faoi in ghaili** *because the liver (lit. livers) is under the stomach, cum nan ae towards the livers* 13; **is na haeibh in the livers** 19.

Aedaighi *clothes, G. aodach*; **ocus cuireadh aedaighi go glan uime** *and let him put clean clothes upon him* 9. See **Edach**.

Aeir *air*; **droch aeir** *bad air* 13; **glantur an t-aer** *the air shall be cleansed* 27.

Aforismorum is Latinised ἀφορισμών (of) *the Aphorisms*; **do aforismorum féin** *of his own Aphorisms* 20—and frequently.

Ag, *at*; **ag tuigsin in texasin** 2, **ag neach at a person** 10. It goes with the Infinitive; **ag iarraidh a-seeking, ag tuigsin understanding** 2; **ag ol a-drinking**, and with intervening pronoun **ag a losgadh burning it**, *lit. at its burning* 12; **ag a caithimh eating it—at its eating** 10. It also enters into composition with the pers. prons. as **agam, agat, aige**, etc.; **bith a fis aghutt let you understand** 23; **bith a fis agut** 23.

Aghaidh, *face, G. aghaidh* “in face of”; **an aghaidh in rema fhuar** *against the cold rheum* 26; **an aghaidh gach uile eslainti** *against every disease* 27; **a lamha agus a aighiadh** *his hands and his face* 9; **muna bia in gnathughadh ina aighidh** *if the habit be not against it* 14.

Aháithle, *after*; **a h'áithle sin** *after that* 12; **d'áithle na cuisilindi** *after the vein—letting* 21; **as a h'áithle** *after it* 8; **as a h'áithle sin** *after that* 9.

Aibstinens, *Lat. abstinentia, Eng. abstinence*; **in t'aibstinens measurdha is ro-árd in leighes e** *the moderate abstinence is a very high cure* 25—an excellent cure.

Aicidigi *pl. of acaid a pain, dis-ease*, with the same original stem as *urchoid*, which see; **measruighter aicidigi na h'anma** *the diseases of the mind are to be here considered—“measured”* 13. Note under **Anum**.

Aighchi, *G. oidhche night*—see **oidchi**; **salchur na h'aighchi** *the filth of the night* 27.

Áil *will, desire, pleasure*; **madh áil let, “si vis,” if you desire** 1; **madh áil let beith fallain** *if you wish to be healthy* 25.

Áilginach *easy, gentle*; **siubhul áilginach** *a gentle walk* 12.

Aimsir *time, season*, W. *amser*, Bret. *amzer*; **tar an aimsir** *over or beyond the time* 5; **aimsir na h'eslainti** *the time of illness* 7; **an aimsir in geimridh... an aimsir an erraich** *in the season of winter... in the season of spring* 16; **ag cinn aimsire** *at the end (head) of a time* 17; **a cinn moirain dh'aimsir** *at the end of a long time* 28.

Aindeonach *unwilling, forcibly, compulsory* from **an** privative + **deonach** *desirous*; **gan fostogh ainndeonach** *without compulsory or forceful stopping—of the breath* 7.

Ainmidhi, Adj. *animal* from **ainmhídh** *animal, beast*; **ona ballaibh ainmidhi** *from the animal parts* 27. Compare **ballaibh spiritalta** *the spiritual parts*, four lines down. **Lis in thochlughadh ainmidhe** *with the animal (natural) desire* 10; **na hainminnthibh caithid na daoine** *the animals that men eat* 19.

Ainnsein, **annsein**, **aindsein**, **aindhsein**, Mod. **ansin** = **in** + **sin** *in that time*; **indarbadh ainnsein** *let him then expel* 9; **aindsein coimleadh an chorp** *and then let him rub his body* 9; **coimleadh aindhsein a fhiacra** *let him then rub his teeth* 9.

Aire *heed, attention*; **ní éigin d'aire** *something of heed* 15; **tabhradh an aire riu** *let them take heed* 17; **tabhradh lucht an droch fhollamhnuighi an air riu** *let those of bad habit (in diet) beware* 17.

Aireochuid from **airighim** *I feel*, G. **fairich** *feel, perceive*: **gin go n'airgid ar an lathair e aireochuid fós go maith** *yet though they do not feel it in their presence (i.e. now) they shall feel (and know) it too well—later on* 17.

Airgid. See last.

Áirighi and **áirighthe** *sure, especial*: **tinneas an cinn go h'áirighi** *the pain of the head especially* 27.

Ais *back, backwards*; **dlighear a treorughadh tar a ais** *he must be led back—to his first position* 17. This phrase **tar a ais** is now in Sc. Gaelic **air ais**. See Note, Col. 17.

Aithfegadh *comparison*, O.D., but in the text *compensation* would seem to be nearer the meaning as Col. 21 **an aithfeaghadh in becaín bídh** *in compensation for the small quantity of food*; and in Col. 3 the meaning would seem to be nearly the same **an aithfheghadh coimplexa lenna**

- diubh** (twice) *in compensation for black humors—to make up for them.*
- Aithi** *proofs*; probably akin to G. **aithne** *knowledge* “**co-gnosco**”; **eolus ocus aithi báis** *the knowledge and proofs of death* 28.
- Aithaidhim** *I know, perceive*; G. **fáth** *cause, reason*. But see the version of the second post-script, p. 57, where the word is written **aithne**.
- Allus** *sweat, perspiration*, G. **fallus**; **arson fuighill an alluis** *for the remains of the sweat* 9; **togairmidh an t'allus** *it will call forth the sweat* 26.
- Almont** *almond*; **le baindi almont** *with milk of almonds* 23; **ro-maith an toradh na h'almoimt** *the almonds are excellent fruit* 23.
- Alucadh**, G. **adhlucaidh** *interment, burial*; **ocus d'órdaigh a cur fo na cinn san alucadh** *and he ordered it to be put under his head in the burial* 28.
- Amach** *out, without, outside*. The construction of the word is interesting. It literally means *in the field in sa magh* and it is the opposite of **Asteach** (which see) meaning *in the house*. This is the “motion” form. **Amuigh** is the “rest” form. We say **tha e'dol amach** *he is going out*, but **tha e amuigh** *he is out*. The word is used in the text very often as an “extensive”; **tar modh amach** *outside of the usual* 12; **osoin amach** *henceforth* 27.
- Amháin** *only* for **na-n-má** essentially meaning *not more*; **feoil amháin** *flesh (meat) only*; **aran amháin** *bread only* 10; **én uair amháin** *once (one time) only* 20; **én dige amáin** *of one drink only* 7.
- Amhlaidh** *like as, so*, W. **amal**, Bret. **evel**, Lat. **simil-is**?; **ocus is amhlaidh is follaine iat** *and so they are the more healthy—broken into water, “poached”* 22.
- Anail**, *the breath*, W. **anal**, Corn. **anal**, Bret. **alan**, Sansk. **anila** *wind*, Lat. **anhelo** *I breathe*; **bis an anail beg minic** *the breath will be small (feeble) and frequent* 4; **gan claochlogh anala** *without change of breath* 7.
- Anbhfhaine** *weakness*, from **an** *very* + **fann** *faint, weak*. The word is written very irregularly; **o anmhfainne na bríghi** *from weakness of the vitality* 7; **o anmhfainne an ghaile** *from weakness of the stomach* 12; **gaili anmfann** *a weak stomach* 23.
- Andam** *seldom*, “**raro**,” G. **aineamh**, **ainbhith** (Mb.) *unusual* is

andam is *athumulta an suiper gearr the light supper rarely hurts* 14—see **Athumulta**.

Angar *near, close by, for in + gar proximity, angar do beith asuighi nearly sitting up* 13; *tairngidh cuigi gach ní bis angar dó it will attract towards it everything that is near it* 9; *go gar do theine near to a fire* 22.

Anís *anise; do marathrum ocus d'anís of Marathrum and of Anise* 12; **Marathrum** *μάραθρον is fennel. The borrowed English word as fineal is several times met with.*

Ann *in it; is maith macoll do cur and it is well to put avens in it* 25. It is sometimes difficult to translate, as, **uair ann** *sometimes* 25; **bidh drong ann** *there are some (people)* 17.

Anntu, *in them* 26; **indtu** 25; **inntu**, 27.

Ansacht from **ansamh** *hard, difficult*: **G. annsa** *better liked—borne; is leór ansacht le lucht lenna fiond treighinus d'fulang it is very (sufficiently) difficult for those of white humors to bear emptiness—or hunger* 25.

Anum *life, W. enaid, Corn. enef, Bret. eneff, Lat. anima, Gr. ἀνεμος wind, breath; na neithibh bis gan anum the things that are without life* 2; *na neithibh ambí anum the things in which is life* 2; *aicidighi na h'anma troubles of the mind* 13. Note, Col. 13.

Anus from **anaim** *I stay, rest, remain*; **G. fan**; **gurub sia anus** *and that it is six (hours) it remains—in the stomach* 11; **anus uair** *and that sometimes stays* 12; **anuid uair** *and they remain sometimes—for eighteen hours* 12; **aimsir anmhana in bídh** *the time of staying of the food—in the stomach* 11.

Aois *age, W. oes, Lat. aetas; ocus aois ocus gnathughadh and age and custom—or habit* 3; **do leith na h'aoisi** *concerning the age* 15.

Aon *one; W., Bret., Corn. un, Lat. un-us; o aon gnodugh from (any) one cause* 16.

Aonda *unified, simple, single; ocus ní go h'aonda and not singly* 3. "**Aonda** is the opposite of **cumusc**," O.R. It refers to things used as "simples" and not co-mixed or compounded.

Aontighius *conforms with, agrees. The verb is based upon aon one, therefore to unify, to bring into agreement; an gnathughadh aontaighius leis na neithi nádurra the*

custom or practice which agrees with natural things—or conditions 17; **as seachrannach aontughadh na meisg aon uair is in mí** *it is wrong to assent to (the getting) drunkenness one time in a month* 5.

Aotrom is **an + trom** *unheavy* therefore *light*. It is **édrom** and **édrum** in the same Col. 14. The form given first is that of the present Sc. Gaelic. **In suiper gerr no édrom** *the short or light supper*.

Aphoplexia—see Note, Col. 20.

Ar has several values, all arising from the fact that the modern form embodies three old forms of different meaning and grammatical conduct: **arson** *for the reason, for the sake of*; **arson fuighill an alluis** *for (because of) the remnant of the sweat* 9; **ar eglá** *for fear* 13; **ar aon bórd** *upon one table* 10, 12; **ar in taobh ndes** *upon the right side* 13; **ar in camra** *upon the "stool"* 15; **ar dtuitim an bídh** *after the food has fallen* 8. In the old language it is often used in the sense of *against*, as here; **ar eslaintibh in t'samhrúigh** *against the illnesses of summer* 21; **ocus coimheduigh ar truailledh na lenna** *and it will prevent the corruption of the humors—against the corruption* 26.

Ára *kidney*, pl. **árann**, W. **aren**, Lat. **nefrones**, Gk. *νεφρός*; **itir na h'airnibh** *between the kidneys* 27.

Aran *bread*, same root as **ar-bhar** *corn*, Gk. *ἄρτος*, Lat. **arvum** *a field*; **aran amháin** *bread alone* 10; **na neithi beirbtur an aran** *the things cooked in bread* 24-25: **is olc aran na pastae** *the pastry bread is bad—panis pastillorum*.

Árd *high*, akin Lat. **arduus** and Gk. *ὀρθός*; **le neithibh tesaighi, tirma, árda** *with things hot, dry and high* 3; **ocus bith in cend go h'árd** *and let the head be high—well raised* 13; **in t'aibstinens measurdha is ro-árd in leighes e** *the moderate abstinence is very high healing—excellent treatment* 25; **an inaduibh árda** *in high places—on high ground* 9; **do réir áirde** *according to height* 15.

Argamainti (*mar*) *as argument*, very likely from English use of Lat. **argumentum**; **do niter mar argamainti** *it is made (or put forth) as an argument—or as reason* 7.

Arís *again*, mod. **arithist** for old **ar + frith + st**. **Frith** is the mod. prep. **ri** in which the old and essential idea of *again-st* remains; **do geinemuin fhola arís** *to make blood again* 21.

Arrsaidh *old, aged*; **ponair na pís úr na áirsaidh** *beans or*

peas, new or old 23; *intan is áirsuigh an ré when the moon is old* 21; *mad ársaigh e if he is old*; *whence arrsuigecht agedness* 25.

Artús *at first, in the beginning ar upon + tús beginning*; *sínedh artús a lamha let him stretch at first his hands* 9; *ocus mar aduburt artús and as was said at the beginning* 3.

Asteach *inwards, within*; *ar eгла droch aeir do dul asteach for fear of bad air going insule*. **Isteach** is really a phrase is + *teach* for *ins in teach in the house, within*, as against *amach in the field, without*—which see.

Astroluighedh *astrologers*; *do réir nan astroluighedh according to the astrologers* 22.

Ata *there is, Ataid there are*; *na togra ata aige the disposition which he has* 1; *ataid trí gneithi there are three kinds—or ways* 1; *trath ata sa bél while it is in the mouth* 8; *mar ataid na siríopighi as are (such as) the syrups* 8; *ata in croicind the skin is* 9; *ataitt moran there are many* 14.

Athair *father*, Lat. *pater*, Gr. *πατήρ*—interesting as showing the loss of *p* in Gaelic; *a athair fen his own father* 18.

Athnuaightech *renewing, restorative*, from *ath-re + nua new*; *dlighider an diet bith athnuaightech the diet should be restorative* 24.

Athumulta “*molesta*.” Note, Col. 14.

Aturra mod. *eatorra* the plural prep. pron. *between them*; *aturra ocus an gaile between them and the stomach* 8.

Aueroy *Arerrhoes*—see Note, Col. 1.

Auicina *Aricenna*—see Note, Col. 1.

B

Baindi *milk*; *baindi ocus iasg... na fin ocus baindi milk and fish or wine and milk* 12; *baindi almont milk of almonds* 23; *bainne goirt sa t'shamradh sour milk (i.e. butter-milk) in the summer* 23; *uachtur baindi the upper-part of milk, that is cream* 23.

Ball *limb, member, part*; *ona ballaibh spiritalta from the spiritual parts—from “the higher centres.”* Compare this with the *Animal parts*, under **Ainmhidi**; *gidhedh is usa na boill ele do dileaghadh yet it is easier to digest the other parts* 18.

Bás *death*, eolus ocus áithi bais 28—see **Aithi**.

Basilica *the basilic vein*—on the inside of the upper arm; **na cuislidhi renabur basilica** *the vein called Basilic* 27.

Beagan *a little*, from **beag** *small, little*; **ocus dlighitt beagan do caithimh go minic** *and it is meet to use a little often* 24; in **begain bídh** *the small quantity of food* 21—see **Beg**.

Beg *little*, G. **beag**, W. **bach**, Corn. **bech-an**, Bret. **bich-an**, so G. **beagan**; **dlighitt began d'ól** *a little should be drunk* 21; **ocus uime sin is beg nach let[h] don dileaghadh . . . cogaint maith in bídh** *and therefore it is but little (very nearly) that the half of the digestion is not in the good cooking* 24.

Beir *give, bring*; **do beradh siubhal ar in mbiadh** *the food is put in motion* 8; **do beradh ar snámh e** *it is set aswim* 8.

Berbadh *a boiling*; **ar nam berbadh** *after being boiled* 23; from **berbaim** *I boil, seethe*.

Betha *life*; **ina bhetha** *in (his) life* 18; in **betha degindaigh** *the later life*—or the end of life 28; **gach ní ina fuil betha** *everything in which is life* 3.

Biadh *food*; W. **bywyd**, Corn. **buit**, Bret. **boed** the same base throughout as in **Beatha** *life* and **Beo** *living*; **no go tuitim an biadh is an ghaile** *until the food has fallen from the stomach* 6.

Blas *taste*; **oir is e in ní is fearr blas is ferr oilius** *for it is the thing of best taste that best nourishes* 19; **blas an bídh** *the taste of the food* 5.

Bliadhna. Gen. of **Bliadhan** *a year*; **aimsir na bliadhna** *the time of year* 3; **fa-cheithir sa bliadhain** *four times a year* 20; **én uair amhain acind a treas fithitt bliadhan** *once only (a year) at the end of three score years* 20.

Bog *soft, tender*; **na neithi maotha no boga** *the young and tender things* 24.

Bolais *bullace*; **nad bolais umorro ocus na risinedha** *but the bullaces and the raisins* 18.

Borsaitsi *borage*; **potaitsi do borrsaitsi** *a pottage of Borage*. The made Gaelic is not euphonious—nor is the English.

Bradán *salmon*; **do tharr in bradain** *as regards the belly of the salmon* 19.

Bráighedh *the chest, lungs, thorax*, lit. the upper part, “the brae.” It occurs in place-names as **Brae**, **Braid** (for **bra-**

ghad); na sróna agus na bráighedh of the nose and the lungs—the chest 9.

Brég a lie: G. breug; agus is brég sin and that is a lie 2; gídhedh is brégach na fersadha eile nevertheless the other verses lie 22.

Briala—briala d'ól to drink a Briala. The explanation is given lower down in the same Col. 7. *Et iseadh tuigim tríd in foculso briala .i. in meid doghebadh nech gan claochlogh anala as much as a person gets without changing (i.e. drawing) breath.*

Brigh has an exceedingly wide range of meanings, all however agreeing in "the essence." Perhaps *strength* is the best single word to use for it. We say **brigh an sgeoil** the "essence" of the tale, **brigh an fhocail** the essential force or power of the word, **brigh an eorna** the essential strength or product of barley, that is, alcohol or whiskey, **obair gun bhrigh** a work without result, **ní gun bhrigh** a thing without sense or strength, **chaill se a bhrigh** he or it has lost its "strength," etc. It is used in this text almost always for *strength*, **imdaighi na brigha** "uires multiplicat" 26.

Brotha, **broth** an eruption, the itch; **anaighi . . . brotha na sliastadh agus brotha in cuirp go h'uilidhi** against eruptions of the thigh and eruptions of the body generally 27.

Brúchtaigh belch, eructate; **ac ind aimsir ar in mbruchtaigh** in the time when he belches 5.

Buain reap, cut, remove; **a croicind do buain díbh** their skins being cut away or taken off 23.

Buglosa bugloss; **do borrsaitsi agus do buglosa** of borage and bugloss 23. Lat. *buglossa*, Gr. *βούγλωστος*.

Buidhe yellow; **croicinn an ubhaill buidhe** the skin of the yellow apple 9.

Bunuibh Dat. pl. of **Bun** a foundation, the lowest part of the trunk of a tree, the part next the trunk of the body from which a limb or a member or organ grows, as here; **bunuibh an righthigh (ruighe the forearm)**, that is, the elbows 27.

C

Caban a cavity, hollow (O.D.); **na cabain inmhedhonach** the internal cavities 15.

Caibidil *chapter*, Lat. *capitulum*; *mar a deir Auicina a caibidil comhartha na coimplex as says Avicenna in the chapter upon the symptoms of the complexion—or general health 1.*

Cáil *appetite*; *cáil ocus caindighecht ocus órd ocus aimsir . . . ocus aois appetite and quantity and manner and time (season) and age 3.*

Caindighecht *quantity*. The Gaelic and the English seem closely related. *Tabhair an biadh a gcainnidighecht big give the food in small quantity 16.*

Cainel *cinnamon*, Gr. *κιννάμωμον*; *inté caithes cainel go minic the person who uses cinnamon frequently 27.*

Cáirdibh Dat. pl. of *caraid a friend*; *ocus do ni foirbheartas do na cáirdibh and it will make assistance to the friends—it is a great help to friendship 26.*

Cáisi *cheese*, from Lat. *caseus*, W. *caws*, Bret. *kaouz*; *seach-nadh cáisi antán sin avoid cheese in that time 22.*

Caithim *I eat, use, wear*; *goraibhi a athair féin céit bliadhan ina bhetha arson nar chaith toirrrthi that his own father was a hundred years in his life because he did not indulge in fruit 18*; see under **Cainel** 27; *intán caithius nech biadha urchoideacha when a person eats hurtful foods 12*; *caithme in bidh the use or usage of food 9*; *is cum beith am bethaidh caithim ocus ni cum caithme bim am betaigh it is that I may be in life I eat and not to eat that I am in life 25.*

Camra *stool, seat*, **Camera?**; *nach maith beith gu ro-fadha ar in camra that it is not well to be too long on the stool 15.*

Caninus *dog-ish*; *ocus gan urlugadh na apititus caininus and without vomiting or dog-appetite—bulimia 5.*

Canoin *a Canon, rule*; *adeir Galen sa canoinsin G. says in this canon 16.* The word comes from Gk. *κάνων* through Latin. It primarily meant a stick, a “cane,” hence a “ruler,” whence a *rule* or *doctrine*. It has been confused with G. *cánain speech, language*, but the words are in no way related. This latter is simply *canamhuin language*, from *can say, speak*, which we have in *cainnt speech* also.

Caomhna from *caomhnaim I spare, save, restrict*, G. *caomhain*; *dlighe in duine égnaidhi a caomhna fein the wise man should restrict himself 6.*

Cara *a friend, relative*, here used adjectively; *gurub mó is*

cara don nadur fuil derg *that red blood is more near to (the) nature* 20.

Cas Lat. **casus**, Eng. *case*. In mod. Gaelic the word means a difficulty; **ocus is mar sin sa cás so** *and so it is in this case* 2.

Cathaighim *I fight, defend*; **oir cathaighidh re gach h'uili truailledh** *it will defend against every pollution* 18.

Ceathardha *the fourth*, G. **ceathramh**, Lat. **quartus**, from **ceathair** *four*, W. **pedwar**, Corn. **peovar**, Bret. **pevar**, Lat. **quatuor**, Gk. **τέτταρες**, Goth. **fidvor**—interesting as showing the letter-change in the different languages; in **ceathardha inadh** *the fourth place* 27.

Céimniughadh, base **céim** *a step* ∴ “make a step,” take a walk; **ocus nar bu dímaoin let ceimniughadh deis na coda** *and do not let it be foolishness to you to walk after the meal* 26.

Cena *yet, already*; **gidhegh cena nevertheless yet** 3.

Cennduibh Dat. pl. of **ceann** *head*; **no do cennduibh geala losa** *or of white heads of leeks* 23—**de albis capitis porrorum**

Cephalica the vein called *Cephalic*. This is on the outside frontal at the elbow, and the Basilic on the inside—of the upper arm—take up all the superficial veins of the forearm; **na cuislinn ren aburthar sefalica** *the vein to which is said (named) cephalic* 27.

Certuighter from **ceartaighim** *I correct, adjust, put right*; **go certuighter e arna mhárach** *that it shall be put right on the morrow* 11; **ni certuighter sa dara dileaghadh** *it shall not be put right in the second digestion* 4.

Cét *a hundred* W. **cant**, Corn. **cans**, Bret. **kant**, Lat. **cent-um**; **goraibhi a athair fén cét bliadhan ina bhetha** *that his own father was a hundred years in his life* 18.

Cét *the first*; **sa cét partegul in the first (p)article** 25. This word has no philological kinship with **cét** *a hundred*—so far as can be yet seen. **Cétna** in the phrase **mar an cétna** *likewise* is from this source; **et mar in cétna** *and so likewise* 25; **a cét oir** (for **uair**) **deis a dhenta** *the first time after its being done* 17; **nach denonn dighultus a cét oi** (for **an cét uair**) *that he makes not revenge the first time* 17; **in cét dileaghta** *the first digestion* 9; **sa cét leabur in the first book** 9.

Cétfadhuibh *the senses*—the seat of the *first impressions*—a very good word.

Ceum *a step, degree*, **ocus ni do réir ceime** *and not according to degree* 1.

Cinnamomo (*de*) *of cinnamon* 27.

Cindti *sure, reliable*; **o leitreachuibh cindti** *from reliable letters* (or writings) 9.

Cinn, ceann *a head, end*; **W. pen, Bret. penn**—which shows the change of **c** (**k**) and **p** in the two branches of the Keltic speech; **drong ele a gcinn ocus drong ele a gcnámbha** *some (people) their heads and other people their bones* 18; **ocus a cinn morain dh'aimsir** *and at the end of a great length of time* 28; **d'ordaigh a cur fona cinn** *he ordered it to be put under his head* 28; **ag cinn aimsire** *at the end of a time*—after a long time 17; **acind a dara fithett bliadhan** *at the end of the second twenty years, i.e. fortieth* 20.

Cireadh *let him comb*; **cireadh a chend** *let him comb his head*. 9. The base is **cír** *a comb*.

Cithfighter *from chí I see*; **mar do cithfighter** *as may be seen* 5.

Clais *a furrow, ditch, hollow*, **W. clais**; **a clais cuil in cinn** *in the hollow of the back of the head* 27.

Claochladh *alteration, change*, **G. caochladh** *a change*: **gan claochlogh do beith ar in fual** *without change being upon the urine* 4; **an deoch claochluightech** "*potus alterativus*" *the alterative drink* 8; **gan claochlogh anala** *without changing of breath* 7.

Claonas and **Claonadh** *inelines, inclination*; **in corp claonas do claonadh nadurdha** *the body that inclines (that way) of natural disposition* 1.

Clé *left (hand)*, **G. clí, W. cled, Bret. kleiz**; **ocus na lamha clé san fogmhur** *and the left hands in autumn* 21.

Cloch *a stone*, **G. clach, W. clwg**; **no cloch no ydoripis** *nor stone (in the bladder) nor dropsy* 14.

Cluas *the ear*, **W. clust, O. Sax. hlust, Eng. listen**; **ocus siasa-nach isna cluasaibh** *and noise or humming in the ears* 14.

Cluthur, clúdhaím *I cover*, **G. clúthaich** *cover, shelter*: **ocus cluthur le h'édach gomaith e** *and let him be well protected with clothes*—covering 13.

Cnamha *pl. of cnamh a bone*; **drong ele a gcinn ocus drong**

ele (a) a gcnamha *one class (of people) their heads and another class their bones* 18.

Cnaoi from **cnaoidhim** *I consume, spend*; **arna cnaoi ocus arna disgaoilidh** *spent and scattered* 16; **an droing bhis arna cnaoi** *those who are wasted* 23.

Cno *a nut, the hazel nut*; **gidhedh a deirim do na cnóib** *yet I say regarding the nuts* 19; **abair gurab fallain na cnó do sír do na haeibh** “*dic auellanas epati semper fore sanas*” *say that the nuts are healthy always to the livers* 19.

Coctana *a small Syrian fig*, Gk. *κότanna*; **mar ataid péredha ocus coctana** *as are pears and coctanas* 18.

Coda Gen. of **cuid** *a portion, a meal*; **is olc . . . goluath déis na coda** *it is bad too soon after the meal* 12; **ar deiredh na coda** *at the end of the meal* 25; **na sa cuid ele dhe** *than in the other portion of it* 18.

Codladh *sleep*, from **codlaim** *I sleep*; **atháili sin codladh go measarrdha** *after that sleep moderately* 12; **do nít daoine imdha lá don oidchi** *many men make a day of the night* 13; **ocus fós gan nemh-codlaidh do beith air** *and still without insomnia being upon him* 5.

Coidigenn from **cuidighim** *I keep, assist*: **is mór coidigenn in bairdi don gaili fuar** *the milk greatly helps the cold stomach* 23.

Coigill Imper. of **coigilim** *I spare*; **coigill fíon** *spare wine* “*parce mero.*” **Merum** is wine unmixed with water, an intemperate form of drinking—so Horace uses the word 26.

Coimed *looking, watching, warding*, “*conseruatium*,” G. **coimhead, rem-coimed** *fore-seeing, fore-watching* “*pre-seruatium*”; **mad áil let an coimplex . . . do coimet** *if you desire to retain the complexion—that is the full health* 1; **preseruatiuum** *that is, the fore-seeing* 1: **dlighear an gnathughadh do coimet** *the (ordinary) habit or custom should be observed* 5.

Coimhéigniughadh *forcing, restraining*: **gan coimhéigniughadh** *without restraining—the breath* 7.

Coimheduighi, a later way of writing **Coimet**, as Col. 1. **ocus coimheduighi ar truailledh na leanna** *and it will prevent the corruption of the humors* 26.

Coimleadh from **comlaim** *I rub*, W. Likely **co + melim** Lat. **molo** *I grind, rub*: **ocus coimleadh an corp** *and let him well-rub the body* 9. *Rub* for *same* is used of the teeth 9.

Coimint, *comment*, Lat. **commentatio** *reflection, thought*; **sa seathadh coimint** *in the sixth Comment* 1.

Coimplex *complexion, the general full health*, see **coimed**, and Note, Col. 1.

Coimriachtachain *want, distress, hard labour, lit. over-reaching*; **ocus na dénaid coimhriachtain** *and let them not over-work* 22, **an drong lerbáil coimhriachtachain do gnathughadh** *those who would wish to practise co-reaching*; **gidhedh is brégach na fersadha eile chuireter . . . ar in coimhriachtain** *nevertheless they are lying those other verses that would put a person to co-reaching—after a meal* 22.

Coimsuighedh from **comhsuidighim** *I compound, mix* (O'D.); **ocus a coimsuighedh le baindi almont** *and mixed with milk of almond* 23.

Cóir *just, right* = “co-vero,” **co-fíor**; **do budh cóir** *it was right* 10.

Collegett; **sa cuigedh leabur do collegett** *in the fifth book of Colliget* 2—Note, Col. 2.

Coithcenn *common, customary*; **gidhedh ata in gnáthughadh coitcind ina aighidh so** *nevertheless the ordinary custom (or practice) is against this* 18.

Colpaid *the calf of the leg*, G. **calpa**; **ar làr na colpaid** *on the flat of the calf* 27.

Comentator (Damascenus). See Note, Col. 3.

Comfhurtacht *comfort, relief*: **ocus do ni comfhurtacht an disnía ocus an asma** *and it will make comfort (to—will relieve) the dyspnoea and the asthma* 27.

Comhartha *a sign, proof*; **et is e is comurtha** *and it is a sign* 4; **comhurthaighi eile** *other proofs* 4; **a caibidil comhartha na coimplex** *in the chapter (upon) the signs of general health* 1.

Comnuighi *dwelling, remaining*; **a comnuighi sa corp** *remaining in the body* 11.

Comuisgim *I mix*; **ocus tic de sin go comuisgter ris e** *and it comes of that that the one is mixed with the other* 10.

Congmhail, congmhailim *I hold, retain*; **arna congmhail sa bhéil** *after being held in the mouth* 9; **ydooripis o chongbail an fuail** *hydropsy from retention of the urine* 14.

Connmhain from **congmbhaighim** *I hold, retain*, G. **cumail**, Irish **congmhail** also; **arson go connmhain an tes nádura** *because the natural heat is retained* 13; **na neithi rós-**

tuighthi connaimhter tar oidchi *the roasted things that are kept over night* 25; **na conaim ar thfual** *retain not thy urine* 26.

Continoidech *continent*; **an caindighecht continoidech do médughadh** *to increase the ordinary quantity*, 8.

Contrardha *the contrary*; **sa taobh contrardha** *on the opposite side*—or against this 3. This word is very often, and very neatly, written by a *ɔ*—a *c* inverted with a superscript. It is *e contrario* 11.

Corp *the body*, Lat. **corpus**, W. **corff**, Bret. **corf**; **don corp mesardha** *to the temperate (abstemious) body* 1; **an corp uili** *the whole body* 19; **na cuirp theo . . . ocus na cuirp fhuara** *the warm bodies . . . and the cold bodies* 3.

Cosaibh Dat. pl. of **cos** *a foot*, G. **cas**; **ocus folmuighi ona cosaib** *and it will empty, or draw from, the feet* 28.

Cosmhaile from **co** + **samhail** *co-similar, alike*: **o neithibh cosmhaile do niter in coimed** *from similar things prevention is made* 1; **cona cosmuilbh**, *with the like*—things 23; **tabhair neithi cosmuile** *give similar things* 1; **do tharr in bradain ocus da cosmailbh** *as regards the belly of the salmon and similar things* 19.

Creit *believe*, “**crede profanum irasci**”; **creit gurub dímaoin duit ferg do denamh** *believe that it is vain for thee to make anger* 25.

Críchnughadh *ending, finishing*; **ar críchnughadh an két dileaghtha** *after finishing the first digestion* 19.

Croccan dim. of **croc**, G. **crog** *a pitcher, an earthen vessel*; **croccan fhiuchach** *a boiling earthen vessel* 8.

Croicend *a skin*, G. **craicionn**; **no a croicind do buain dibh** *or their skins to be reaped (taken) of them* 23; **croicinn an ubhaill buidhe** *the skin of the yellow apple* 9.

Croidhi *the heart*, G. **cridhe**, W. **craidd**, Lat. **cor**, **cordis**, Gk. **καρδία**; **ocus do bir in croidhi subaltach** *and it will give the merry heart* 26.

Cruadi pl. of **cruaidh** *hard, dry*; **ocus neithi cruaidi** *and hard or dry things*, 24.

Cuala *heard*; **mar do chuala o daoineibh fírindecha** *as I have heard from truthful men* 12.

Cudrumacht *heaviness, weight* for **con** + **trom** “*co-heavy*” **na daine dambia cudrumacht** *the men (or those) to whom there is heaviness* 19; **go comhtrom** *evenly* 11: **dambia**

cudrumacht eli ann *if there is other evenness*—"ceteris paribus" 19.

Cugat *towards or to thee*. The prep. **gu** older **cu** is here repeated and the **t** is the second personal ending for **tu** *thou*. Scottish Gaelic writes **thugad**, but this is etymologically wrong; in coimplex dogabuis **cugat** *the general health which thou hast taken to thee* 1; **nach gabann nigním cuige** *that he will not suffer from inaction* 1.

Cuigedh from **cuig** *five*, G. **cóig**, W. **pump**, **pimp**, Corn. **pymp**, Bret. **pemp**, Goth. **fimf**, Lat. **quinque**, Gr. **πέντε**—quite a lesson in consonantal change between the languages; in **cuigedh inadh** *the fifth place or position* 27.

Cuimin the herb *cummin*, Gr. **κύμινον**; **na caittir i acht maille cuimin** *let it not be used but along with cummin* 23; **maille saland ocus re cuimin** *along with salt and with cummin* 23.

Cuimne *remembrance*; **ocus truailidh in cuimne** *and it will corrupt the memory* 21.

Cumdaidh *shapen*. The phrase is based upon the English; **bogsa cumdaidh** *a shapen box, a casket* 28.

Cuir *put*; **cuiridh na suile an doimne ro-mór** *it will put the eyes in very great depth* 19; **dlighear an adharc do cur** *where the horn ("cup") should be put* 28.

Cúirreacht *spasms, cramps*; **gan cuirrineacht na gaoth-mairecht**, *without cramps or flatulence* 5.

Cúis *a cause*; **ocus is cúis sin don mhorgadh** *and that is a cause of corruption* 4.

Cuisighim *I cause, induce*; **cúisighind an cuisli ro-minic aphoplexia** *the frequent blood-letting will cause apoplexy* 20.

Cuislind Gen. of **cuisle** *a vein*. The difference of vein and artery is never clear in this text. **Is e folmughadh na cuislinne is mó anmfhainighius in brigh**, *it is the emptying of the vein that most weakens the strength* 20; **a caibidil na cuislinne** *in the chapter upon the vein or blood-letting* 20; **don cuislind, umorro**, *but regarding the vein*, that is, blood-letting 20. **Cuisle** is frequently used alone for blood-letting.

Cúl *the back part of anything*, W. **cil**, Corn. **chil**, Bret. **kil**; **a clais cuil in cinn** *in the hollow of the back of the head* 27.

Cumdach *a covering*; **ocus cumdach orra** *and a covering upon them* 25. G. **comhdach**.

Cumgaighind cumhaingim *I make narrow*, G. **cumhang**

narrow; **arson go cumhgaighind an gaile ar in sgairt** *because the stomach closes upon or presses on the diaphragm* 4.

Cumsanadh *resting, in tranquillity*; **ocus e a cumsanadh** *and he a-resting* 20.

D

Daingen *strong, tight*; **ocus is daingne go huilidhi iad** *for they are all stronger*; **ocus dainighter doréir dherbhtha** **ocus gnaithighi e** *and it is confirmed according to proofs and custom* 9.

Dallaidh *will blind*; **oir dallaidh sin nech** *for that will blind a person* 21. This is from Adj. **dall** *blind*, Corn. **dal**, W. **dal**, Bret. **dall**.

Dánacht *boldness, courage*; **ocus do ní dánacht...ocus geuraigi in t'indlecht** *and it will make courage...and it will sharpen the intellect* 26.

Daoinibh *Dat. pl. of duine a man*; **o daoinibh firindecha** *from truthful men* 12; Adj. **in corp ndaonda** *the human body* 3; **na sen-daoine** *the old men* 25.

Dara *second, the other of two, from ind + araile the other*; **in dara inadh** *the second position* 27.

Dealachadh *separating, separation*; from **delaighim** *I separate*; **do denadh dealughaidh atturra** *to make separation between them* 8.

Dearbhadh *proof, confirmation, base dearbh certain, true*; **doréir dhearbhta** *according to proofs* 9.

Deathach *smoke, vapour, fumes*; **na dhetaighi inmolta** *in offensive vapours* 5, but see Note.

Dechra *difficult, from dí + cor difficult position. Sochair is good position, dochair is bad position, dichair is no position at all—a defect: is deachra an dealachadh on tes it is difficult to separate them from the heat* 24.

Degh, G. **deagh** *good*, W. **da**, Cor. **da**, Lat. **dex-ter**, Gk. **δεξιός** *right*—see **deghbaladh**.

Deghbaladh *seems for dég + boladh sweet or sweet-smelling; gnathaighter in cainel go minic or do bir an bél do deghbalaidh let cinnamon be used frequently for it will bring the mouth to sweetness* 26; **began d'fhín deghbalaidh a** *little of sweet wine* 5.

Deighinech *finally, at the end*; **o ibhter an fíon uair** *and go*

deighinech *since wine is drunk, time in—and out (i.e. occasionally) at the end; in deoch ibhter go deighinech the drink that is drunk finally—gives many pains 26—a bit of human experience.*

Deir *says; oir a deir Auicina for Avicenna says 9, and frequent.* Other parts of this Irregular Verb **Abair** *say*, meet us constantly; **mar an abair** *where he says 5; mar a dubhrumar roimhainn as we have said before (us) 10.*

Deiredh *the end; ar deiredh na coda at the end of the meal 25. Cuid* which means *a portion* seems to mean a meal always in the text. It is interesting that **cuideachd** *a company* is the people who share with you what you have to give. Our proverb says **Is moide cuid a roinn** *a portion or a meal is bigger for being shared.*

Deisgribhidech written wrongly for **deiscreidech** *discreet; duine ro-dheisgribhidech a very discreet man 6.*

Denom, G. **denamh** *to do; ni h'urusa sin do denamh that is not easy to do 10; gurub dimaoín duit ferg do denamh that it is foolishness of thee to make wrath—to get angry 25.*

Deoch *a drink; an deoch ibhter the drink that is drunk 26; is hégin gurob taréis an caithmhe ibhus nech deoch it is right (necessary) that it is after consumption (after eating) a person should drink a drink 6, and not at the time of eating; adeirim go fuilit tri deocha and I say that there are three drinks 8.*

Dermair *intense, great; caoinédh dermair intense weeping 16.*

Derna is frequently used for **deanadh** *to make or cause, ocus nach derna é'n urchoid doibh and that not one hurt comes to them 8; dan dernadh dia dighultus if God made revenge 8.*

Des, G. **deas** *right (hand), Lat. dexter, W. dehen, Corn. dyghow; na lamha desa san errach the right hands in the spring 21; ar in taobh ndes on the right side 13.*

Diaigh *end; na diaigh sin after that end or time. G. na dheidh sin and an deigh sin after that. This is clearly the stem in Deighinech, which see. A cinn moirain dh'aimsir na diaigh sin at the end of a long time after that 28.*

Dibenta *"in extremis." Dibne is extremity—of exhaustion; oir bidh an drong sin dibenta for such people are exhausted 6.*

Diet *diet, nourishment.* Sc. G. uses **diata** for “a meal”; **ocus diet mesurdha** and a moderate (measured) *diet* 14.

Dighe as Gen. of **deoch** a drink; **ocus na caitter e déis dighi** and let it be not used (or taken) after a drink, i.e. butter 23.

Digultus *revenge, retribution*; **dan derna dia digultus**, if God made retribution 8.

Dileaghaim *I digest*—food; **is usa na boill eile do dileaghadh** it is easier to digest the other parts 18; and in constant use throughout the text.

Dimaoin from **dí + maoin** “office-less” in vain; **ocus creit gurub dimaoin duit ferg do denamh** for, believe that it is vain for thee to make anger—to get wrathful 25; **ocus nar bu dimaoin let** and it would not be wrong (in vain) of you—to step out—after the meal 26.

Dimaoinus is the Abstract Noun from **dímaoin**, that is *foolishness, uselessness*; **oir teid an dimaoinus gach ní dibh so an égmáis in misuir** for all of these things go into uselessness (are no use) without the moderation 26.

Dirradas seems here to mean a will or direction. It occurs three times in this postscript 28, where it can only have this meaning. The base is **dír, díor** proper, right, lawful, which occurs several times in *Cormac's Glossary*.

Disgaolim *I dissolve, scatter*, for **dí + sgaoil + im**; **is luigha in tes di-sgaoileas indtu** for the heat is less that is set free in them 25.

Disnía for *dispnoea, difficult breathing*; **an disníaocus an asma** the *dispnoea* and the *asthma* 27.

Diureticech *diuretic*; **na én ní diureticech** nor one thing (anything) *diuretic* 12.

Dlighim *I ought, have a right, it is a duty.* Forms of this verb occur so often that quotation is not necessary. The translation will sufficiently show its usage.

Dlistinach *lawful, dutiful, right* G. **dleasnach** of same force. This is from a form **dligheas** *I ought*, with root **dligh** a debt or right Welsh **dled**, and Breton **dle**, of same meaning; **go dlistinach** rightly 4; **a meid andlistinaigh** in unright, unreasonable quantity 4.

Doimne *depth*, an Abstract Noun from **domhann**, G. **domhain** deep Welsh **dwfn** and Breton **don**; **oir cuiridh na súile an doimne ro-mór** for it will put the eyes into a very great depth—it will cause them to sink in their sockets 19.

Drageta, a kind of comfit in which the drug is covered by sugar, chocolate, or gelatine. It is the Fr. **Dragée** of the present day.

Dragma, the Gk. *δραχμή* used here in quite the modern sense of sixty minims or three scruples 28.

Droch *bad, evil*, W. **drwg**, Corn. **drog**. Like a few other old Adjectives it always stands before the Noun as **droch-dhuine** *a bad man*, **droch-bheairt** *an evil deed*; **na h'éin do niter do droch róstadh** *the birds that are badly roasted* 24; **lucht an droch fhollamhnuighi** *those of bad rule or evil conduct* 17.

Drong *a people, certain people*, of same meaning and perhaps of the same origin as G. **dream** akin to Gk. *δράγμα* *a handful*—of people; **bídh drong ann . . . ocus drong ele . . . ocus drong ele** *there are some people . . . and other people . . . and others* 18.

Duibh Gen. of **dubh** *black*; **lucht lenna duibh** *those of black humors* 25. See **Leann**. This is the same “humoral” idea as has come down to us in the word melancholia, *μελαγχολία* from *μέλας* *black* + *χολή* *bile*.—Note, Col. 25.

Dúinte is from **dúin** *shut, close up*, the old idea of “**strictum**” as against “**laxum**,” the idea being that certain foods caused a closing up of the bodily “pores” and so brought about an unhealthy state; **dúinte isna taobhaibh** *constriction in the sides* 14; **am biadh améid andlistinaigh do ní dúinte** *food in unreasonable quantity will cause constriction* 4.

Dúracht *desire*; **no aní eili bhus duracht lis** *or any other thing which he desires—to say* 9.

Dusacht *awake-ness*: **donit daoine imdha lá don oidchi ag codladh sa ló ocus in an dusacht san oidchi ocus is ro-olc sin** *many men make day of night, sleeping in the day and awake (in their awakeness) in the night—and that is very bad* 13.

E

Ealaidh *skill, art, science*; **teagaisgidh an ealadha leighis** “**medicina docet**” *the means of cure teaches* 14—that is, a good inference as to the cause may be drawn from what cures the disease—quite correct; **glantur an t'aer go**

h'ealadhanach *the air is cleansed scientifically* "secundum artem" 27.

Eanbruithi, G. eanaraich, *soup, broth*. This word has been a trouble to me for many a long day, and it has been a trouble to others. The form **én bruith**, which is so common in the older language, has always led me to think that there was a *bird én* in it, philologically at any rate. The late Dr. Macbain thought it was from **ín + bruite** "in-boiled." *Cormack's Glossary* and O'Clery would make it from **én water + bruite** *boiled*, and the late Whitley Stokes under the word **enghlas** *grey water* or *thin gruel or milk and water*, would point the same way. In this text it always means *soup or broth*; **gidhedh foghnuidh eanbruithi na písi** *nevertheless the soup of pcase will suffice* 23.

Édagh, G. Aodach *clothes, cloth*; **ocus cluthur le h'édach gomaith e** *and let him be well covered with clothes* 13.

Edluis, "raritas" 15. I cannot give an English equivalent.

Egla, G. eagal *fear*, is **éu-gal = ex-gal**, *wanting or void of valour or courage*; **ar egla na fellsamb ele** *for fear of the other philosophers* 28. The concept of manliness and courage in the Gaelic language is indeed very interesting. The positive element is the right and natural factor in character always. The defect is always "non" or "ex." It was never there, or it has disappeared.

Égmais, G. eugmhais, as **eugmhais** *without*. The word essentially means *want, defect*, and Dr. Macbain is perhaps not very far wrong when he suggests that the word is **eu + comas** "non-power" which is really *want and defect*. **Teid an dimaoinus gach ní dibh so an égmais an misuir** *all of these things will go into foolishness without the temperance or abstemiousness* 26.

Égnaidh Adj. from **éagna** *wisdom*; **dlighe in duine égnaidhi a caomhna fein ar fhín** *it becomes the wise man to spare himself of wine* 6, "*sapiens debet sibi prohibere vinum bibat.*"

Eignighim *I force, compel*. The stem is **éigin** *need, necessity*. W. **angen**; **na do meadon eignighadh** "*nec cogere uentrem*" *nor to force your middle, i.e. belly* 15; **na h'éignigh goláidir do shuigi** *do not forcefully compel thy seat, that is, thy bowel—do not force it* 6, "*nec cogas fortiter anum*" 26: o aon gnodugh éigentach eile

from one another (any) necessary cause 16; *égintus innfhuartha in croidi*, the necessity for the coolness of the heart 4.
Eile, eili and ele other, another, W. aill, Bret. eil, Lat. alius, Gk. ἄλλος, Old Gaulish allo—as in Caesar's *Allobrogi*; **naid leanda ele** than other fluids 20; **na nech eile** than another person 20; **do biadhuibh eile** of other foods 20; **ocus ataid fersadha eili ar an fíon** and there are other verses upon the wine 26.

Eireochas from *eirghim* I rise, G. *eirichim*, Lat. *erigo*, Eng. erect; **intán eireochas neach** when a person rises—in the morning 9; **oir eirighitt na dhetaighi inmholta** for it will rise in undesirable fumes 5—Note.

Éis *footstep, trace, death*. The essential meaning is not clear. The word now only remains in composite forms as **daéis** after and **taréis** after also, but with different Preps. **do** and **tar** = “trans,” the latter having a feeling of motion in it.

Én a bird, G. *eun*, W. *etn*, *edn*, Br. *ezn*, all from an old root *pet fly*; **na h'éin do niter do droch rósdadh** the birds that are badly roasted 24; **gaile an éin renaburthar struccio** the stomach of the bird named *Struthios* 2.

Én one mod. *aon*; **baindi ocus iasg ar én bórd** milk and fish upon the one (same) table 12; **na gabhthur...én ní diureticach** take not (any) one diuretic thing 12; **saor in gach én ní** free in each one thing—in every respect 17; **oir ní fuil én ní coimedus nech ar eslaintibh** for there is not (any) one thing which (fore) sees a person against diseases—better than blood-letting 21; **ar én cor** for (any) one reason 14; **na caithid ar én cor iad** let them not for any reason use them 23; **én raod** any part, lit. one thing 23; **o aon gnodugh** from one cause 16; **an éinecht in one time** 10—for *én* and old *fecht* time; **ocus én uair amhain** and one time only 20; **ocus is don milsi oenda tuighter sin** and it is of the united (single, simple) sweetness this is to be understood 19; **ar énochuid** at one meal 10.

Eochair a key; G. *iuchair*, W. *egoriad* “the opening thing” *eochair gach uile eolais* the key of all knowledge—Hippocrates 28.

Eoin Baisti (Féil); *um fhéil eoin baisti* about the feast of John Baptist—Midsummer Day, June 24th.

Eolas knowledge; *eochair gach uile eolais Ippocras* the key of

all knowledge Hippocrates 28; **ocus ro[f]urail eolus ocus aithi báis** and *he commanded* (sought out) *the knowledge and time of death* 28.

Errach *Spring*, G. **earrach**. This word seems based upon the old Keltic concept of the year. The **Céitein**, the month of *May*, has its best rendering as the **cét-ain** or “first-time” of the year. The **earr-ach** would then naturally be the “tail-end” as we have it in **earr-ball** *the tail* or end member; **sa geimredh ocus san errach** *in the Winter and in the Spring* 15—see **errannaibh**.

Errannaibh from **err** *a tail*, G. **earr**—which we have in **ear-ball** *tail-piece*, really from **air** *after* ∴ *the after-member*; **isi nan errannaibh is ferr no is millsí na h'éisg ocus na mná** “*pisces et mulieres sunt in caudis meliores uel dulciores*” 18; **is fuar in t'iasg in an err** *fish is cold in the tail* 18.

Esbhuigh *want, defect*; G. **easbhaidh** from or akin to **ex + bi** “to be out of”; **tre esbhuigh an indfhuara** *through the absence* (or want) *of the coolness* 4.

Espartan *twilight*. Simply the Lat. **Vespertana**, G. **feasgar**; **roimh an teirt ocus an uair na h'espertan** *before sunrise* (rather *the third hour*) *and in the twilight* 16.

F

Fadhó is the Prep. **fa + dhó** = *twice*; **is ferr began do caithimh fadhó** *it is better to use a little twice* 4; **fadhó no fathrí san aimsir cetna** *twice or three times in the same period* 15.

Faduighim *I make longer, prolong* from **fada** *long*: **ocus aimsir d'faiúghadh** *and to prolong the time* 10.

Fágbhail *leaving*, from **fág** *leave*; **intán bhes ag a fágbhail** *whilst it* (the food) *is leaving* 8.

Faghtur from **faghaim** *I find, get*: **muna faghtur glan gu nadurtha e** *if it is not found clean by nature* 27; **ni fhaghann on biadh remhar do beith an íchtar** *it cannot find* (a way) *because the fat food is at the bottom* 10; **ocus gan blas an bidh d'fhagbhail** *and not to get the taste of the food* 5.

Fáill *delay*, G. **dàil**; **ocus na cuireadh a faill** *and do not put it into delay* 9.

Faon *poor, feeble*; *is olc codladh faon a poor sleep is bad* 13.

Farligettur; *cad farligettur what has been "let," "quem amis-erunt."*

Fásaid, fás *grow*; *nach fhásaid na daoine ginacha that the greedy or gluttonous men will not grow* 4.

Fásgadh *wringing, squeezing*; *nach maith fásgadh eigneach do denamh nor (is it) good to make an imperative squeezing* 15; *arna mberbadh ocus arna fásgadh after being boiled and squeezed—through cloth* 23.

Fastaighter *from fastinghim I stop, stay, retain*; *na fastaigh-ter ar én cor iad and let them not be retained for any reason* 14.

Feaghadh *seeing, observing—see aithfeaghadh re-seeing, com-pensation* 3, 21.

Fecht *a time*; *began dotabhairt an ein[fh]echt a little given at one time* 16; *ocus ni gabhdhaois biadha examhla an éinfheacht and do not take "exemplary" foods at one time—exsamhla here seems to have an excessive or exceptional meaning. This old word remains in G. hidden in fathast yet and in am feasda forever, the one being fo-fecht-sa "sub hoc tempus" and the other in-fecht-sa "from this time forward"; oir in biadh caithir an einfhecht a meid móir ni h'éidir a dileaghadh for the food taken in large quantity at one time cannot be digested* 4.

Féchuin *to examine, see, try*; *dleghur aimsir na bliadhna do féchuin it is necessary to examine the season of the year* 15; *dlighear na neithisi d'fheuchain it is right to try (or examine) these things* 3.

Fédfuighi *from feudfaighim I can, must, am permitted*; *ni(fh)éidir no ni h'urusa it is not necessary nor easy* 10; *ocus o nach féduruis since you dare not* 10; *ni feduit they must not* 25.

Féil *a feast, festival*; *um féil stefain about (at) St. Stephen's feast, Aug. 2nd*; *um fhéil eoin baisti at the feast of John the Baptist* 21. Note, Col. 22.

Féin *self*; added to Personal Prons. and to Nouns to make them Emphatic; *do aforismorum féin of his own Aphorisms* 20.

Fellsamh *philosopher*; *ar eglá na fellsamh ele d'aghail dirradais for fear of the other philosophers getting his testament or secret*, 28.

Fén *a section of a book; sa dara fén don céat leabur in the second section of the first Book 2; sa treas fén dég in the thirteenth section 11.*

Féoil *flesh, flesh-meat; seachnadh cáisi intán sin agus féoil avoid cheese in that time, and flesh-meat 22; agus a gnáthughadh dh'féoil agus do biadhuibh eile oilius comaith and (habitually) using of flesh-meat and of other foods which nourish well 20.*

Feradh *excrement; indarbur an fual agus in feradh let the urine and the faeces be expelled 14: in feradh fadhó no fathri san aimsir cétna and defecation twice or three times in the same period; gan claochlogh do beith ar in fual na ar in feradh without change being upon the urine or the excrement 4.*

Ferg *anger; creit gurub dimaoín duit ferg do denamh and believe that it is folly of thee to make anger—to get angry 25.*

Férr and **fearr** *better; is í is ferr isna h'annminntheibh it is it that is better in the animals 19; toradh is ferr na iad a fruit that is better than them 19.*

Fersa *a verse, fersaigtheoir a versifier; et do cuir in fersaigtheoir fersadha ar follamnughadh na slaintí and the versifier has put (made) verses upon the regulation of health 25; adeir in fersaigtheoir the versifier says 21; et ataid fersadha eile ar an fín and there are other verses upon the wine 26.*

Fhiacla from **fiacail** *a tooth; G. fiacaill; aindhsein a fhiacla and then his teeth 9.*

Fiarfuighim *I ask; is uime sin fiarfuighim it is therefore I ask 6.*

Fígeadha *figs, from English; na risinedha agus na fígeadha the raisins and the figs 18; déis na fígeadh after the figs 19.*

Fín and **fíon** *wine; G. fíon, W., Corn., Bret. gwin, Lat. vinum, Gk. (F)οῖνος; dlíghitt nis mó d'ól d'fhín more of wine should be drunk 21.*

Fíneal *fennel; agus do bharr fhíneil and of the tops of fennel 23.*

Fíond *white; lucht lenna fíond those of white (or pale) humors 25.*

Fírindecha *truthful; mar do chuala ó daoineibh fírindecha as I have heard from truthful men 12; antan bis an*

t'ocarus *fírinnech ann in the time when real (truthful) hunger is there* 16.

Fis *knowledge; dlighear a fhis fós and you should know also,* 21, 24.

Fithett, *G. fichead twenty, W. ugeint, Corn. ugens, Bret. ugent, Lat. viginti; it occurs several times at end of Col. 20.*

Fiuchach from *fiuchaim I boil; croccan fiuchach a fiuchadh in t'uisgi. Croccan G. crogan is an earthen vessel. The expression here seems to mean a burnt earthen vessel in which the water is boiled* 8.

Flichadacht *wet-ness, moist-ness, from fiuch wet Lat. liquidus; ag dul a tesoighect ocus a bflichadacht going into heat and in moistness, 16; na neithi flichada the moist things 24; oir ge flichadhi na neithi róstuighi for though the roasted things are moister 24.*

Fodhailter from *fodhailim I divide; gidheadh is an dá rannuibh fhodhailter aimsir na bliadhna yet (or nevertheless) it is in two portions that the seasons of the year are divided* 21.

Foghmhar *Autumn. The name seems to be fo + gamur "sub hiemem" the under-winter; do beirid toirrthi an foghmhair caoinedh dermair duit Autumn fruit will give thee sore weeping* 16.

Fóghnuidh *it will suffice; ocus fóghnuidh an aghaidh an rema fhuar and it will suffice against the cold rheum 26; et is mór fhoghnuis fothrugadh uisgi milis and greatly will suffice (the) bathing in sweet water 14.*

Foirbheartas *help, assistance; ocus do ni foirbheartas do na cáirdibh and it will make assistance to the friends, that is, to friendship—the wine 26.*

Foillsighim *I show, demonstrate; dlighear d'foillsiughadh it ought to be shown 12; mur is folluis as is evident 19; mar foillsighes galen as G. shows 1.*

Fóiridh *it will relieve, from fóirim I relieve, succour, heal; ocus fóiridh tinneas in cind go h'áirighi and it will relieve the headache especially 27.*

Foirm *form, manner; doréir foirme ocus ni doréir céime according to form and not to degree 1.*

Foirmeallach *external; on tes foirmeallach from the external heat; go téid an tes a bfuirmill that the heat goes external*

16; **cum foirimill an chuirp** *towards the external (parts) of the body* 7.

Fola Gen. of **fuil** *blood*; **ocus re lucht fola deirge** *and with those of red blood* 25; **ocus togairmidh in fuil místa** *and it will call forth the monthly blood—the menses* 28.

Follain *healthy for fo + shlán* “under wholeness,” an extremely fine expression; **ocus is amhlaidh is follaine iat** *and it is so that they are the more healthy* 22; **mad áil let beith fallain** *if you wish to be healthy* 25. From **slán** *whole* comes **sláinte** *health* which is, and means *wholeness*; and even *holiness* is but an extension of the idea into the higher aspects of life. The Saviour is magnificently called **Slán-uigher** the giver of *wholeness*—“**sanator**,” and not “**salvator**” as other languages have it. To be **follain** G. **fallain** is to be enveloped in health as with a garment. **Eu-slán** and **eu-sláinte** is *ex-health, disease*, “broken” wholeness, in the truest and most real sense. No science can ever over-pass the perfect life-wisdom in these old words. The science which does not see, acknowledge, and accept this simple basic fact of human life is not science and we have no use for it.

It is a most valuable instruction to observe that the Gaelic language, in a fuller degree than perhaps any other tongue, expresses the attributes of manliness, health and courage in the positive form, and the defect of these, always, in the “ex-” form as being “out of” the natural state or condition. **Eu-slaint** is *disease*—“ex-health.” **Eu-cáil** is *disease* also but in lesser sense; it means *out of condition*. So also **eu-dóchas** *out of or beyond hope*, **eu-coir** *out of or beyond justice*, and many other similar expressions.

It may be mentioned that there is no word in Gaelic for a coward. The people who grew this language did not know the coward at all, but when in later days they unfortunately discovered him they called him **gealtair** or *madman*. This peculiar defect in the language is not perhaps more interesting than the way in which it was made good.

Follamhnuighim *I rule, order, govern*; **ar follamhnughadh na sláinte** *concerning the regulation of health* 1; **lucht an droch fhollamhnuighi** *those of bad rule or conduct* 17; **a**

leabur follamhnaighti na slainti in the book upon the regulation of the health 17.

Folmaighe from folmhaighim *I empty*; ocus folmaighe si ona ballaibh ainmidhi and it will empty (or draw from) the animal members 27; is e folmughadh na cuislide the emptying of the vein 20.

Fona under the, under his; a cur fona cinn to put it under his head 28.

For-lethon very broad, "hyper"-broad; *Et is riaghail for lethon condlighear an biadh lenus do na méruibh . . . do shechna* and it is a comprehensive rule that the food which sticks to the fingers should be avoided 25—for it is tough.

Fós yet, still; dlighear a chongmail fós it is right to keep it still 17; tuilleadh fós moreover.

Fosgladh opening; ocus ro-fhurail an uaigh . . . d'oslucadh and he commanded the grave to be opened 28.

Fostoghadh from fostaighim *I stop, stay, seize*; gan fostogh[adh] ainndeonach without compulsory stopping—of the breath 7; na fastaighter ar én cor iad let them not for one (any) reason be restrained 14.

Fothrugadh bathing, from fothraigim *I bathe*, G. fathraig bathe; fothrugadh uisgi milis bathing in sweet water 14.

Fual urine; na conaim ar th'fual and do not hold (or restrain) thy urine 26; ar galardha fuail against diseases of the urine 28; gan claoghlogh do beith ar in fual without change being upon the urine 4.

Fuara Adj. pl. from fuar cold W. oer, Corn. oir; le neithibh fuara with cold things 3; chum fuarachta towards coldness 3; an aimsir ro-fuar na ro-the in a time (which is) very cold or very hot 21.

Fuighill Gen. of fuidheal a remnant; arson fuighill an alluis because of the remains of sweat 9; fuighlech tochlughthi what remains of desire, "reliquie desiderii" 4.

Fuillighidh bleeding, from fuil blood; an adharc maille fuillighidh, the horn for the purpose of bleeding 27.

Fhuind Gen. of fonn soil, land, or region; is cóir ní éigin do tabhairt d'aire do leith na h'aosi ocus in fhuind for it is right to give something of attention on behalf of (concerning) the age and the soil or district 15.

Fulang suffering; is ro-urasa lis na sen-daoinibh in treiginus d'fhulang it is very easy for the old persons (lit. men) to bear

the abstinence 25; *is ferr fuilingit lucht lenna duibh e those of black humors suffer it better* 25.

Fundamint, Lat. *fundamentum* *base, foundation*; *ocus gan fundamhint ro-mór do denamh and so as not to make too great a foundation* 8.—Note.

Furail *to order, command*; *ro-fhurail an uaigh . . . d'oslucadh he ordered the grave to be opened* 28.

Furtaighi from *furtaighim* *I relieve, comfort*; *oir furtaighi (MS. furtachaighi) sin an dileaghadh for that will assist the digestion* 12; *a meid fhurtachaighus to the extent that (the sleep) helps—digestion* 12.

G

Gabatur from *gabh take*, W. Inf. *gafael*, Corn. *gavel*, G. *gabhail*; *mar gabatar iat as they were taken* 12; *ocus na gabhthur lictuairi ro-tesaigi and let not a very hot electuary be taken* 12.

Gach *each, every*; Corn. *pop*, Bret. *pep*, Lat. *quisque*. These and other forms of the word are most interesting to the student of language; *gach ní dibh so every one (thing) of these* 26.

Gaires from *gair call, name*; G. *goir*; *is neithi fuara gaires dibh sin these are called cold things* 2; *acht gairit errach d'aimsir measurdha but temperate weather is called Spring* 22—that is the “mean” between cold and heat; *gairther “preservatium” do “servatium” uair and preservatium is called servatium sometimes* 1.

Galardha *diseases*; *galardha fuail urinary diseases* 27. The word seems to be based upon *gal weeping* or I.E. *ghel pain*. In Gaelic it always has a heavier meaning than *tinneas* which is also *disease*, but based upon the old idea of “*strictum*” or *tension*.

Galen. Note, Col. 1.

Gan, G. *gun without*; *gan claochlogh do beith ar in fual without change upon the urine* 4; *gan cuirrineacht without cramp or spasm* 5.

Gaothmaracht *flatulency*; *on gaothmuirecht from the flatulence* 14; *gan gaothmairecht without flatulence* 5.

Geala Adj. pl. of *geal white*; *do persillidh no do cennduibh geala losa of parsley and of white heads of leeks* 23.

- Geinemuin** *to generate, create, from genaim, G. gin beget, W. geni to bear, Bret. ganet born, Lat. gigno, Gk. γίγνομαι; do geinemuin fhola arís to generate (restore) his blood again 21; on ginter droch leann from which bad humor is generated 7.*
- Geimredh** *Winter, mod. geamhradh, W. gaem, Bret. goam, Lat. hiems, Gk. χειμών; biadh remur a meid móir sa gheimredh fat food in good quantity in the winter 21.*
- Gendaois** *error for dhéntaois from dénaím I do; do gendaois dúinte it will cause constriction 14; do gentaoi on línadh which are done from the fullness 21.*
- Geuraigi** *from geuraighim I sharpen; ocus geuraigi in t'indlecht and it will sharpen the intellect 26.*
- Gidhegh** *nevertheless, variously written gidhedh 1; gidhegh 2; gideadh 25; G. gidheadh = ciod + eadh though yes or ge(dh)-eadh; gidhedh bit misur maille ris nevertheless let moderation be along with it 26.*
- Ginacha** *Adj. pl. greedy, gluttonous; adeir Auicina . . . nach fhásaid na daoine ginacha Avicenna says that the gluttonous men will not grow 4.*
- Glan** *clean; fíon glan "vinum purum" pure wine 26; dam bia in gaili glan if the stomach is clean 22.*
- Gluasacht** *motion, movement; ocus bis ar gluasacht hégin and they would be on some movement 19; arson in gluasachta because of their movement or activity 18; gluasacht mór big effort 12.*
- Gná** *Imper. of gnáthaighim I use or accustom myself; a ro-gnáthughadh its over-doing 20.*
- Gné** *kind, Lat. genus, Gk. γένος; is comór ata gach gné dibh mar sin and greatly is every kind of them so 18; ataid trí gneithi there are three kinds or divisions, upon the regulation of health 1.*
- Gnímaighitt** *from gním an action; o thota species gnímaighitt na baill from "tota species" the members act. Note, Col. 2.*
- Gnimuighend** *from gniomhaighim I act, perform; ar in gnimuighend upon which they act 25.*
- Gnodugh** *affair, business, cause, G. gnothach; ach a nech bis gan toirmisg o aon gnodugh éigentach eile except the person who is without prevention—forbidden—from any other compulsory cause 16.*

Goirteochar from **goirtighim** *I hurt* and secondarily *I make sour*; **oir goirteochar iad** *for they shall be hurt* 17; **na h'ubla goirti** *the sour apples* 18.

Goléor *sufficient* for **go + léoir** *up to enough*. This is the expression that has been "lifted" into English as *galore*, where it means not *enough* but far more than enough—abundance, excess.

Gominic *often* 19; may be taken as a type of Adverbial form which occurs very often. In the next line **gomór** *greatly*, is "another of the same." The **go** is G. **gu** *to*, Lat. **ad** or rather **usque ad** "up to"; **goláidir** *strongly, forcefully or violently* 26.

Grema Gen. of **greim** *a bit, a mouthful*; **taréis th'sluigti an grema** *after thou hast swallowed the mouthful* 8.

Gur, gurub, gurup, gurob 6 are subjunctive forms which may be rendered *that*. The elements are old **co** now **gu** + the verbal **ro** + a fragment of the verb "to be" **co-ro-ba**; **mar an abair gurub** *where he says that it is* 2; **gurup le neithibh fuara** *that it is with cold things* 2; **gurob taréis** *that it is after* 6.

Gustrasda = a working formula for **go san tráth-sa** *until now, lately*; **adubhrumar don chail gustrasda** *I have just said regarding the appetite*—"de qualitate cibi jam dictum est" 5.

H

Hali. Note, Col. 1.

I

Iad *they, them*; **follamhnaighter iad** *they shall be regulated* 2; **go truailtiter uile iat** *that they are all corrupted* 10; **toradh is ferr na iad** (any) *fruit that is better than them* 19.

Iarraidh (ag) *seeking*, Inf. of **iarraim** *I seek, ask*; **ag iarraidh sligheadh amach** *seeking a way out* 10—see **fiarfuighim**.

Iasg *fish*; **baindi ocus iasg** *milk and fish* 12; **seachnadh . . . iasg sailthi shun salted fish**—at that time of blood-letting 22; **is millsí na h'éisg ocus na mná** *that is sweetest of fish and of women* 18.

Ibhter from **ibhim** *I drink*, W. **iben** "bibimus." Corn. **evaf**,

Bret. *eva*, Lat. *bibo*; do ní *ibhter* concerning the thing that is drunk 9.

Íchtar bottom, lower part, the opposite of *Uachtar* *q.v.*; *ocus ní fhaghann on biadh remhar an íchtar* still the fat food being under(neath) prevents the other food passing 10; *gach eslainti dambia is na ballaib ichturuca* every disease which may be in the lower members or parts 27.

Ím butter, W. *ymenyn*, Corn. *amenen*, Lat. *ungen-tum*; *an t'ím umorro caitir roimh na biadhuibh e* the butter indeed it should be used before the meals 23.

Imarctech, "*Potus delativus*," *deoch imairectech*. Note, Col. 8.

Imchubidh proper, best; *is roim an mbiadh is imchubidh i* it is before food it is most proper 8; *dambia aimsir imcubidh aige* if he has sufficient time 9.

Imdaighi from *imdaighim* (based on *imdha* *q.v.*) *I multiply*, G. *ioma* and *iomadh* many, therefore *I make-many*; *imdaighi na brigha "uires multiplicat"* it multiplies the strength 26; *na biadha d'imdughadh* to multiply the meals—or more frequent 10; *is ferr na h'uaire d'imdughadh na in caindigeacht mór* it is better to multiply the times than (to take) a great quantity 4—it is better to take food often than in great quantity at one time; *acht na huair d'imdughadh* but to make the times more frequent 8.

Imdha many, G. *iomadh*; *daoine imdha* many men 13; *piana imda* many pains—"multos cruciatus" 26.

Imighi from *imigh* go; *oir imighi roim in ndileaghadh* for it goes before the digestion 7.

Imlan whole, is *im* intensive and *lán* full: *completely full, intact, altogether*; *na h'almoit ocus a caitimh imlan* that the almonds should be used, i.e. eaten, whole 23; *diligther gohimli e* it (the food) is wholly digested 13.

Imli wholly, an Adverbial form—see *Imlan*.

Ímpir Emperor, Lat. *Imperator*; *táinic in t'ímpir* the Emperor came 28.

Impogh from *impoighim* *I turn, move, convert*, G. *iompaich*, Inf. *iompaidh*; *ocus dlighur* (MS. is *dilighur*) *impog ar in taobh ele* and it is necessary to turn on the other side 13; *ocus impogh arís ar in taobh ndeas* and to turn again on the right side 13; *gaothmuirecht ag impogh suas* flatulence moving upwards 14.

Imsnimh *sorrow*; cuir imsnimh trom dít *put heavy sorrow off thee—away from thee* 25. The word occurs in Windisch's *Texte* Sc. M. 4; in imshnim mór *in great sorrow*.

Imurcracha *superfluities*; imurcracha na sróna *the superfluities of the nose* 9.

Inadh G. ionad *a place*; mar adeirur san inadh cétna *as is said in the same place* 1; an két inadh *the first place* or position 27—the word is used in this Col. several times; sea h'induibh *six places* or positions 27.

Incinn *the brain*; what is “in the head,” εν-κεφαλον, from in + ceann *a head*; geuraichi in incinn *it will sharpen the brain* 26.

Indarbadh mod. ionarbaim *I expel*; indarbadh ainnsin imurcracha *let the superfluities be then expelled* 9.

Inde *the “inward” parts, the bowels*; lagaid na h'inde linta *and they weaken or relax the full (or overcharged) bowels—“et uiscera plena relaxata”* 26.

Indfhuara is ind *to, against* + fuar *cold*, G. fionnar for fionnfhuar *cool*—feasgar fionnar *a cool evening*; tre esbhuigh an indfhuara *through the absence of coolness* 4.

Indladh from inlaim *I wash*; ocus indladh a lamha *and let him wash his hands* 9.

Indmuis *wealth, treasure*; G. ionmhas; d'iarraigh indmuis *to seek treasure* 28.

Indtlechta *intellect* Gen.; na leisgi indtlechta *nor laxness of intellect* 5; ocus geuraigi in t'indtlecht *and it will sharpen the intellect* 26. This seems to be directly from Lat. intellectus.

Indstruimint *the Eng. instrument, Lat. instrumentum means, tool, etc.*; on tes mar indstruimint *from the warmth or heat as the means* 2.

Indtu *in them*; in tes disgaoiles indtu *the heat set free in them* 25; in seregra bis inntu *the scregra which is in them* 27.

Induibh for inaduibh *places, positions*; sea h'induibh *six positions* 27.

Inmheadhonach *internal*; uime sin anbfuinnighter go h'inme[dh]onach é *it is therefore that he is weakened internally* 16.

Inmholta *offensive, “unpraisable”*; na dhetaighi inmholta *in offensive fumes—or eructations* 5. The word inmholta

- seems to be here used as the direct opposite of the sense in which it is commonly used—but see Note.
- Innis** *tell*; **ocus** is uime sin innisis **Galen** and it is therefore *Galen tells* 18.
- Inntaighter** from **inntaigim** *I change, convert*; **inntaighter a fuil deirg e** it is converted into red blood, **indtaighter fuil derg aros**, “convertitur in rorem in poris” 11.
- Intabhurta** “give-able,” allowable; **na neithead** is **intabhurta** the things which are allowable 9.
- Intán** in the time, whilst, from **in + tán**; **intán caithier in biadh** in the time in which the food is used 10; **intán sin in that time** 10, 21.
- Inte** 27 is for **inté** the he, the person; **inté caithius cainel go minic** the person who uses the cinnamon frequently 27.
- Ither** from **ithim** *I eat*; **ní ithter ocus ibhter** the thing that is eaten and drunk 9; **dlighitt began d’ól ocus d’ithi** (only) a little should be drunk and eaten 21.
- Itir** between, G. **eadar**, W. **ithr**, Corn. **yntr**, Bret. **entre**, Lat. **inter**; **itir in dá slinnen** between the two blade-bones 27; **itir na h’áirneibh** between the kidneys 28.

L

- Lá** a day; **oir is e sin an lá nadurra** for that is the natural day 15.
- Lachtach** loose; **dambia in medon lachtach** if the middle (the inside) is lax 18.
- Lactuca** lettuce; **do lactuca ocus do bharr fhineil** of lettuce and of the tops of fennel 23.
- Láidir** strong; **na h’éighingh goláidir do shuigi**, “nec cogas fortiter anum” and do not compel too strongly thy sitting = anus 26.
- Lagaidh** from **lagaighim** *I weaken, relax*; **ocus lagaid na h’inde linta** and it will relax the (too) full bowels 26; **gidhedh lagaid na h’ubla rosdaighthi** nevertheless the roasted apples will relax 18.
- Lámhuibh** Dat. pl. of **lámh** a hand; **ocus folmaighe si ann sin ona lámhuibh** and it will there empty (withdraw from) the hands 27.
- Lán** full, W. **llawn**, **laun**, Corn. **len**, Bret. **leun**, Lat. **(p)lenus**; **ocus a meadhon lán** and the middle (stomach) full 19.

- Lár** *the floor, the ground*, Lat. *planus*, Eng. *plain*, "the flat part"; **ar lár na sliastadh** *on the flat part of the thigh* 27.
- Leabhur** *a book*, W. *llyfr*, Lat. *liber*; **seathadh leabhur** *sixth book* 11; **leabhraibh eigin** *some books* 11.
- Leaghtur** from **leagh** *melt*; **gurub ullma leaghtur** *that more readily is melted* 2.
- Leag** *read*, G. *leugh*, Lat. *lego*; **do leag an cairt** *he read the deed* 28.
- Leag** *a gem, precious stone*; **no leag no seod mbuada** *or gems or precious jewellery* 28.
- Leanna** the "humors"—the old concepts of the *fluids* of the body; **lucht lenna fiond** *those of white or pale humors* 25; **lucht lenna ruaidh** *those of red humors*; **lucht na lenna duibh** *those of the black humors* 25; **do truailledh na lenda** *to corrupt the humors* 27. Note, Col. 3.
- Leasrach** *the loins*, the base is **leas** *thigh or hip*, perhaps akin to **leth-as** *a side*. "**Deasaich do chlaidheamh air do leis**" *gird thy sword upon thy thigh* (Psalm 45, 3).
- Leigheas** *a cure*, same base as **liagh**, G. **leigh** *a healer*; **na deocha leighis** *the curing or healing drinks* 8; **is dlighi leighis sin** *that is the necessary treatment* 7; **leighes** *medicine* 12.
- Leis-féin** *by himself, alone*; **leis** is the compounded pron. prep. masc. *with him* + **féin** *self* = *alone*; so **leis-fein** *with himself, alone* 28; **aní bhus duracht lis** *the thing which he desires* 9.
- Leisgi** *laziness, slowness, slothfulness*; **na leisgi indtlechta** *or slowness of mind or intellect* 5.
- Leitreachuibh** Dat. pl. of **leitir** *a letter*; **o leitreachuibh cindti** *from certain (or reliable) letters* 9.
- Lenus** from **lean** *follow, adhere to, cling to*; **an biadh lenus do na méruibh** *the food which adheres to the fingers* 25.
- Leór** *enough, sufficient*; **is leór ansacht le lucht lenna fiond** *it is sufficiently heavy or those of white or pale humors—to bear abstinence* 25; **et is lór so** *and this is sufficient* 27; **is comurtha go caithind neach goleór** *it is a sign that one has eaten enough* 4. This is the phrase **gu leoir** that has come into English as *galore* plenty, abundance, which really means "up to enough."
- Leth** *half, side*, W. **lled**, Bret. **let**, Lat. **latus**; **na neithi leat omha** *the things half-raw* 24.

Lethon *broad*, G. *leathan*, W. *litan*, *llydan*, *ledan*, Gk. *πλατύς*; see **For-lethon**.

Liagh *a physician*, G. *lighiche*; *oir is ní fuar gairter on liaigh do nithe íseal* *for it is a cold thing that the physician calls low things*; *oir in teas íseal is fuar am bél in lega* *for the low heat is "cold" in the mouth of the physician* 2; *ocus ní mar sin do na leghuibh* *and not so of (according to) the physicians* 22.

Lictuairi *the old spelling of electuary*; *na gabhthur lictuairi ro-tesaigi* *do not let a too-hot electuary be taken* 12.

Linadar *from lionaim*—see **Línta**, *I fill*; *an drong adeir gur linadar iad féin do biadh go minic* *those who say that they fill themselves with food often*—and that no harm comes to them 17; *is usa linadh na dighe na línadh an bidh* *for the filling (satisfying) with drink is easier than the filling with food* 22.

Línta *from lionaim I fill*; *na h'inde línta* *the filled bowels* 26—in a constipated or gross condition.

Lochran *a lamp*; Lat. *lucerna*, akin *λευκός* *white*; *bidh mar lochrand bis ullamh cum baithi* *it is as a lamp which is ready to drown—to go out* 6.

Loighett *diminution, reduction*—the irregular Third Compar. of *beag* *small*, really a Noun; *na loighett and san anail* *or diminution in the breath* 4.

Longadh *is used for supper*, but here most likely for *eating* generally; so *ar céit longadh* *is upon first eating*—or the first meal 6.

Losa *leeks, porrum*: *do cennduibh geala losa* *of white heads of leeks* 23.

Losgadh *burning, singeing*; *oir truaillett in biadh aga losgadh* *for the food is polluted, being burned* 12; *loisgfidhe on tes teinntighe e* *it will be burnt because of the fiery heat* 16.

Luath *quick, swift*; *do niter an codladh go ro-luath* *sleep is made too quickly* 14; *díligher go luath e* *it is quickly digested* 10.

Luathrigh *Gen. of luaithreach ashes, dust*; *arson fuighill an alluis ocus in luaithrigh* *for the remnants of sweat and of dust* 9—which are on the skin. G. *luath* means *ashes*, W. *lludw*, Bret. *ludu*, Corn. *lusu*.

Lubra *leprosy, infirmity*; *ullmuighit nech cum lubra* *they pre-dispose a person towards disease* 12.

Luigha *less*, G. *lugh*, W. *llai*, Bret. *lei*, akin Lat. *levis*, and Sansk. *laghas* *light*; *oir is luigha an tes disgaoiles indtu for the heat is less that is set free* (is untied) *in them* 25; *uair eile ni luigha another time less*—shorter 22. See **Loighett** for Third Compar.—this is the First.

M

Macaoim, *mac a son*, W. *map*, *mab*, Corn. *mab*, Bret. *mab*, Ogham *maqoi*; *na daoine óga ocus aindsein na macoim the young men and then the sons* 25; *na machtaoimh the sons*—children 24. The word may be taken to mean “youths” or young people of both sexes as *sendaoibh* “old men” means old people.

Macoll, *macall* (B.M. 15403), W. *mabcall*, *common avens*, Geum *Urbanum*. For a good many old plant-names see *C.M.J.*, April 1910.

Madh, *mad if*; *mad do gnathuich nech if a person has practised*—blood-letting 20; *madháil let bheith édrum if you wish to be light* 14; *mad áil let beith fallain if you wish to be healthy* 25.

Maidin *morning*, Lat. *matutina*, Eng. *matin*; *sa maidin in the morning* 9; *feoil amháin do caithimh sa maidin to eat flesh meat alone in the morning* 10.

Maille *with, along with, for imb-an-leth* “by the side of” (Mb); *bit misur maille ris let moderation be along with it* 26.

Mairidh from *mair last, live*; *ocus mairidh sin uair and ré mí and that will sometimes last through a month* 22.

Maith *good*, W. *mad*, Corn. *mas*, Bret. *mat*; *ni maith is na haeibh in ní is milis is in bél it is not good in the livers the thing that is sweet in the mouth* 19.

Maotha *soft, smooth, mild*, Lat. *mitis*; *na neithi maotha no boga the mild or soft things* 24; *toghtar in cuid is maeithi let the softer portion be chosen* 19.

Mar, *mar sin, mar so so, like that, like this*; *ocus ni mar sin do na leghuibh and not so of the physicians* 22. **Mar** for mod. *far where*; *mar an abair where he says* 5, 6.

Márach *tomorrow*, G. a *máireach*; *arna mhárach on the morrow* 11.

Maratrum, Gk. *μάραθρον*, fennel Ovid; **do maratrum ocus d'anis** of fennel and anise 12.

Marcuidhecht *riding*, based on **marc** a horse ∴ *horsemanship*, W. Corn. Bret. **march**; **do siubul no do marchuideacht** of travel or of riding—not good, after meals 12.

Maseadh = **ma-is-eadh** if it is “yes,” if so be it; **maseadh toghtar in cuidh is maeithi** nevertheless let the softer part be chosen 19. It is **madegh** 17; **ocus madegh dlighear a treigen go mall** and if it be so, it should be given up slowly or gradually.

Meadhon the middle, W. **mewn** within, Bret. **y meton** amidst, Lat. **medianum**, **medius**, Gk. *μέσος*. It is used, perhaps euphemistically, for the belly—**na do meadhon d'éigniughadh** “*nec cogere uentrem*” 15; **ocus a meadhon lán** and the belly-full 19.

Meas estimate, judgment, base of **measurdha** etc., which see; **doréir mhesa bis fogus don fhirindi** according to the estimate that is near to the truth 9; **measruighter aicidighi na h'anma** let the diseases of the mind be considered (measured) 13.

Measa worse, irreg. Compar. of **dona** bad, G. **miosa**; **ni fuil ní is measa** there is nothing that is worse 10.

Measardha temperate, moderate, “measured”; **don corp measardha** to the temperate body 1; **o measurdhact** from temperance—abstinence 1.

Mediana the median or middle vein of the forearm. It runs into the median-Basilic and the median Cephalic at the bend of the elbow; **is i mediana dligher do ligen** it is the median vein that should be opened 20.

Médughadh from **méduighim** I enlarge, increase; **an puls do médughadh** to enlarge the pulse 4; **an caindighect continoidech do medughadh** to multiply or increase the ordinary quantity 8; **uime sin méduighter e** therefore it is increased 13; at 10 the word has a “side” but very neat meaning; **an biadh do meadughadh ris in ghaili** to make the food the same size (quantity) as the stomach—can bear or requires—to equate it.

Megathegni lit. his Great Work **sa naoimheadh leabhur do megathegni** 20. Note, Haly Col. 1.

Méid quantity, size, “measure,” W. **maint**, Corn. **myns**, Bret. **ment**, Lat. **mensus**; **biadh remur a méid moir** fat food

in great quantity—in abundant measure 15—the base of **Médughadh**, which see.

Meisg *drunkenness* G. **misg**; **mar bis ag lucht na meisgi** *as will be to those of drunkenness* 5; **adeir drong gurub maith bheith ar meisgi uair sa mí** *some say that it is good to be drunk once a month* 5.

Méith *soft, sappy, juicy* the same word as **maoth** *q.v.* but with a shade of difference in the later meaning; **na neithi ro-méithi** *the very soft things* 25.

Menmuinn *mind*, G. **meanmhuin** *mind, joy, gladness* and **meanmna** from **mén** *mind*; **gan truime do beith ar an menmuinn** *without heaviness being on the mind*, or spirits 14; **bith menma t'shuilbir agat** *have a cheerful mind* 13.

Mér *a finger*, G. **meur**; **an meur tanuisti** *the second finger* 9; **an biadh lenus do na méruibh** *the food that sticks to the fingers* 25.

Mercurial, *dog's mercury*, *Mercurialis* of the *Euphorbiaceae*; **do sail-cuach ocus do mercurial** *of violet and of mercurial* 23.

Mí *a month*, G. **míos**, W. Corn. Bret. **mis**, Lat. **mensis**, Gk. **μήν**, Sansk. **más**, *a moon-eth*; **uair sa mí** *a time (once) a month* 5.

Mian, G. **miann** *desire, choice*; **is mian liumsa "placet mihi"** *I like a short walk after a meal* 12.

Milis *sweet, tasty*; **in ní is milis isin bél** *the thing which is more tasty in the mouth* 19. The base is **mil** *honey*—the sweet thing; **uisgi na meala** *the water of honey* 5.

Minic *often*, W. **mynych**, Corn. **menough**; **dlighitt beagan do caithimh go minic** *a little should be used often* 24; **co cúisighind ro-minc aphoplexia** *that it will cause (bring about) apoplexy* 20; **an drong adeir gur línadar iad fein go minic** *those who say that they fill themselves often*—with food, let them take care 17.

Minica the Compar. of **minic** *q.v.* *oftener*; **dlighitt . . . cuisli doleigen nis minica** *it is necessary to let blood more often* 20.

Misur *measure, moderation, reasonableness*, "in measure"; **oir téid an dimaoinus gach ní dibh so an éigmais an misuir** *for all things of these go into vanity (are in vain) without moderation* 26.

Mó *greater*, W. **mwyy**, Corn. **muy**, Bret. **mui**, Lat. **major**; **in cuid is mó bis ar gluasacht** *the portion which is in greater*

motion 19. This is a very good instance of the impossibility of getting the Gaelic idiom into English; *in cuid is mó*, standing alone, means *the part that is greater* but here *mó* refers to the verbal *gluasacht* ∴ *which is more greatly in motion*.

Modh *manner, habit, custom, reasonableness*, W. *modd*, Lat. *modus*; *is olc an codladh ocus in nemh-codladh téid tar modh amach* *bad is the sleep and the non-sleep (insomnia) which goes beyond ("without") all reasonableness* 12.

Moille *slowness* the noun from *mall* *slow*; *moille tuirlingha* *the slowness of descent* 11; *moille oiprighthi* *the slowness of the working—of the digestion* 11.

Moran *much*, from *mór* *great*; *ocus gan móran d'ól* *and without drinking much* 8.

Morgadh *corruption*; *ocus is cúis sin don mhorgadh* *and that is cause of the corruption* 4; *do lenduibh morguighthi* *of corrupt humors* 10; *do ní gach uile torradh . . . morgtha* *every . . . fruit will make corruption* 18.

Mothughudh, mothaighim *I feel, perceive*; *gan anmfainne do mothughudh* *without feeling weakness* 5.

Muin *back* or more often *top*. The idiom it forms is peculiar. *Thig air mo mhuin* *is come on my back*. *Tha e air mo mhuin* *is equally correct for he is on my back or he is on top of me—even if I am on my back*. *Air muin an eich* *on the back of the horse*. *Biadh omh ar muin bidh leth-bhuithi* *raw food on the top of half-cooked food* 11.

Muinel *the neck* or perhaps better here *the chest*; *sínedh a muinel* *let him stretch his chest* 9.

Muire *MARY, the Virgin*; *a trátha muire* *his Hail Mary* 9.

Muna *G. mur*. The Irish form is from *ma* *if* + *ní* *not* ∴ *if not*. The G. form is a shortened *mar-ro* *mur-robh* *if* (he was) *not*; *muna bia an duine óg* *if the man is not young* 20.

N

Nádur *nature* is borrowed; *mar is tusga tochluighes nádur e* *as nature more readily desires it* 14.

Nadurra *natural*; *is sin is codladh nadurra* *and in codladh nach sechnann in oidchi ocus nach toirmisind in lá* *that is natural sleep which avoids not the night nor prevents the day*, 13.

Neach *a person, anyone*, W. Corn. Bret. **neb, nep**; **go caithfid neach goléor** *that a person has eaten enough* 4.

Neimnechtarda *feebleness*; **do lucht na neimhnechtarda** *to those suffering from weakness* 1.

Neithibh Dat. pl. of **ní** *a thing, a food*; **le neithibh fuara** *with cold things* 3.

Nem-codlaidh *insomnia, "un-sleep"*; **ocus gan nem-codlaidh do beith air** *and without sleeplessness being upon him* 5.

Nertaighi *will strengthen*, base **nert** *strength*, G. **neart**, W. **nerth**, Corn. **nerth**, Bret. **nerz**, same as in Gk. *ἀνὴρ* *a man*; **nertaighi in gaili** *it will strengthen the stomach* 26.

Nesa mod. **neasa** *next*; **na rannuibh is nesa don t'samhradh ... is nesa don geimredh** *the divisions (times or days) that are nearest to the summer... (and) are nearest to the winter* 17.

Nescoidedh *boils, ulcers*; **nescoidedh inmedonach** *internal ulcers*. The word was, at this time, not used with any pathological precision; **nescoidedh inmedonach** *internal boils* 20—Note.

Ní *a thing, anything*; **gach ní** *everything* 9; **ni fuil ní is measa** *there is not anything worse* 10; **in ní is fearr blas** *the thing of best taste* 19; **én-ní** 21.

Ní the verb to *do, cause*; **do ní tes an t'samraidh urchoid** *the heat of summer will do harm* 16; **do ní lagadh** *it will cause relaxation* 22; **donít daoine imdha la don oidchi**, *many men make day of night* 13; **ocus do ní inadh...** *basilica and it will do (empty) the region of the Basilic vein* 27; **ocus do ní comfhurtacht an disnía** *and it will cause comfort to the dyspnoca* 27.

Ní a simple negative; **ni doréir ceime** *not according to step or degree* 1; **ni certaigher** *it shall not be corrected* 4; **ni h'imchubidh in fin** *the wine is not proper—after food* 7; **ni mar sin** *not so* 22.

Nigheadh *let him wash*, from **nigh** *wash*; **nigheadh a shúili** *let him wash his eyes* 9.

Nigním *inaction*; **nach gabann nigním ona cosmailiuis** *that none effect is taken (received) from the similars* 1.

Nis for **ní** + **is** "*id quod*" used in Comparison; **oir dlighidh an céim beith nis ísle** *for the step (degree) ought to be lower* 2; fully expressed 19, **oir is e in ní is fearr blas** *for it is the thing of better (best) taste—that best nourishes*.

- No** *or; no do lucht na neimhnechtardha or to those of weakness 1; no go tuitinn an biadh until the food has fallen 6.*
- Nodluig**, G. **Nollaig** *Christmas*, from Lat. **natalicia** *the Nativity*; **ligter uair** and **um nodluig i** *it is "let" occasionally about Christmas 21.*
- Nua** *new, young*, G. **nuadh**, W. **newydd**, Bret. **neuez**, Lat. **novus**, Sansk. **navya**; **intán is nua e** *when it is new—moon 21.*
- Nuimír** *a number*, from Lat. **numerus**; **nuimír éigin** *some number—or figure 11.*

O

- O**, G. **O** and **bho**, Lat. **ab** *from and since*; **o sin a mach** *from henceforth 27*; **o measurdacht** *from moderation 1*; **o cut-tromacht** *from equipoise—from a rightly balanced state 2*; **o nach bi** *since there will not be 4.*
- Oband** *sudden*; **ocus ni gohoband** *7*; **ocus ni go h'obonn** *and not suddenly 17.*
- Ocarus** *hunger*, G. **acarus**; **fulang ocaruis** *the feeling of hunger 10*; **an t'ocarus firinneach** *the truthful (real) hunger 16.*
- Ocus** *and*, G. **agus**, W. **ac**. The word occurs very frequently. It is the same base as in **fagus** *near*. **Agus** is close conjunction; **fagus** perhaps **fo + agus** is "under" or just short of **agus** *i.e. near.*
- Oenda** *single, simple*; **don milsi oenda** *of the single sweetness 19.*
- Ofrit**, **dofrit** *bad writing for do fuairit, they found*; **ocus is e ní dofrit** *and and what was presented there—was a box 28.*
- Óga** *pl. of óg young*. The Welsh **ieuanc** and Bret. **iaouank** are suspiciously like *young*—but they are all from the same origin; **na daoine óga** *the young men 24*; **munabia an duine óg** *if the man is not young 20.*
- Oi** *occurs frequently for oir for q.v.*; **oi ni fuil an tes gearr** *and for the heat is not short in it 15*; **oi dan dernadh dia dighultus** *for if God made revenge 17*; **a két oi = an két uair** *the first time 17.* All this suggests a lisping defect of speech in the writer.
- Oidchi** *night*; **is in oidchi** *in the night 14*; **super na h'oidhce** *the supper of night 14*; **san oidche** *in the night 14.*
- Oileamhuin** *nourish* from **oilim** *I rear*; **da tabhairt da**

oilemhaine *given to nourish it* 2; *dligher an drong so d'oileamhain le biadh leighiseamail for such should be nourished with healing food* 2; *ocus is uime sin nach oilenn se godlistinach and it is therefore that he is not nourished rightly* 4.

Oiprugh[adh] from *obairighim I work*. The base is E.Ir., *opair*, G. *obair* *a work, labour*, from Lat. *opus*, *-eris* *a work or task*; *conach truailter a oiprugh[adh] so that its operation shall not be corrupted* 26.

Oir *for* is really the preposition *air* used as a conjunction. The same occurs with *o from* which is used also as conjunction *since*; *oir is le biadh for it is with food* 2; *oir mar a duburt artús for as I said at first* 3.

Oireat, G. *urad* *as much*; *oireat in méid is teo as much of the warmer portion* 10.

Oisreaghdha pl. of *oisire*, G. *eisir* *an oyster*; *mar ataid na h'oisreaghdha as are (or such as) the oysters* 24.

Ól *drink*; *bit daoine ann lebáil móran d'ól there are men who would like to drink much* 21; *fín d'ól taréis bidh to drink wine after food—is bad* 6.

Olc *bad, evil* akin to Lat. *ulcus* *a wound* and Eng. *ulcer*, Gk. *ἔλκος*, *ata in gnathughadh coitcind ina aighidh so gu h'olc the common custom (or practice) is against this badly* 18.

Omh *raw, unprepared*, G. *amh*, W. of; *na neithi omha... ocus na neithi leat omha the raw things and the things half raw* 24.

Ona is *o from* + the pl. Art.—*from the*; *truailleadh tic ona toirthibh the corruption which comes from the fruits* 18.

Opair *work*, G. *obair*; *moille opairthi the slowness of working* 11—see **Oiprughadh**.

Órd is simply the Lat. *ordo* *rule, order*; *d'órd in dieta no caithme in bídh of the regulation of diet or the (proper) use of food* 9.

Orra *upon them*; *ocus cumdach orra and a covering upon them* 25. The Prep. pron. from *air upon*. It is *uirri* 8; *ocus nach uirri and not upon it*, where it is Sing. fem. to *coda*; *ocus bidh rabhaile orra and greediness will be upon them* 6.

Ortomia miswritten for *ortonia* *Orthopnoea*; *ocus an asma ocus an ortomia and the asthma and the orthopnoea* 27; Gk. *ὀρθός + πνοή* *breathing (only) upright*.

Osluighthi *open*, mod. *fosglaim I open*; *ocus in bél osluighthi and the mouth open* 13.

Osoin amach *from henceforth*, lit. *o sin a mach from that outwards* 27.

P

Paciencia, “*patience*” *monks’ rhubarb*, **Rumex patientia**; *do spinarchia ocus do paciencia of spinach and of patience* 23.

Partegul, Lat. *particula*, dim. of *pars a part*; *sa dara partegul in the second (p)article* 12.

Peaduir *St. Peter*; *a féil peaduir in Peter’s feast* 22—June 29th.

Pecadh *a sin, transgression*, is from Lat. *peccatum*; *in gach én pecadh in every one sin* 17.

Péiredha *pears* from Eng.; *mar ataid péiredha (such) as are pears* 18.

Persillidh *parsley*; *do saithsi ocus do persillidh of sage and of parsley* 23; *do bharr fhineil ocus persilli of fennel-top and parsley* 23.

Piana *pains*; *piana imda many pains*, “*multos cruciatus.*” It is *poen* in Welsh, Corn. *peyn*, Bret. *poan*, Lat. *poena*, Gk. *πῶνῃ*; *is mór an pian do goile super na h’oidhce the supper of night is great pain to the stomach* 14—Note.

Pís *the pea*; *an pís umorro the pea however* 23; *pís úr new pease* 23.

Póir *a pore*; *a póiribh in gaile in the pores of the stomach* 12; *oir atá in croicinn póiremhail for the skin is porous* 9.

Pónair *beans*; *pónair na pís beans or peas* 23—the sing. forms are here used, in the “collective” sense, for the plural.

Potaitsi *pottage*; *uair imchubidh caithme in potaitsi the proper time to use or take the pottage* 23.

Proinnighthi *the time of eating* from *proinn dinner, a meal*, Lat. *prandium*; in Old Irish *praind*; *uair in proinnighthi the time of eating* 16; *is proindiughadh orduighthi it is ordered, correct dietary—to take food three times in two days* 11.

Ptisisi *phthisis*; *lucht na ptisisi those of phthisis—phthisical people* 23.

Q

Quartana *quartan fever*; a caibidil leighis in quartana in the chapter which treats of quartan (fever) 10.

R

Rabhaile *foolishness*—or perhaps stronger. Irish has *rabhaidhil* for *raving*, but that seems too strong here. Perhaps the *greediness* of old age would be very near the first intention; *ocus bidh rabhaile orra* and they suffer from *greediness* 6.

Radh the Inf. of irreg. verb *abair* say; *ocus tic lis an radh so Auicina* and *A. comes with this saying* 11.

Radharc, G. *fradharc* sight, power of vision; *is ro-mor urchoidighius in biadh san oidche don radharc* the food taken at night greatly hurts the sight 14.

Ráithi a quarter of a year; *ré mí no ré ráithi* during a month or during a quarter 12.

Rann a portion, division; *indus go roindfigter in dá lá nádurra...go comhtrom a trí rannuibh* so that the two natural days (48 hours) are equally (or better evenly) divided into three (equal) portions 11; *an dá rannuibh* in two divisions 21.

Rannchuidid, see **Rann**; *oi[r] rannchuidid ris in samhradh ocus reis an geimhredh* for they are divided between the summer and (against) the winter 17.

Ré throughout, "the space of"; *ocus mairidh sin uair and ré mí* and that lasts sometimes for a month 22; *ré sea huairibh dég* during sixteen hours 12; *ré ocht n'uairibh dég* during eighteen hours 12.

Ré the moon; *intán is airsuih in ré* when the moon is old 21; *adeir do leith in ré mar so* he says regarding the moon—as follows 21.

Recha d'ég he will not go to his death "eur morietur."

Reime fatness, G. *reamhar* fat, W. *rhef* thick; *o reimhe ocus o ríghne* from fatness and from toughness 12.

Rem-coimhett "pre-seruatium" *pre-serve*; *in corp dobáil do rem-choimett* the body you would desire to preserve 3;

preservatiuum .i. rem-coimed preservativum *that is fore-guarding* 1.

Rema fhuar *the cold rheum*, a borrowed Greek word; **ocus foghnuidh an aghaidh in rema fhuar** *and it wil suffice against the cold rheum* 26. The Adjective is not in Agreement. It should be **an rema fhuair**. The meaning of the expression is now not easy to understand.

Remur *fat*; **tabhartur biadh remur... sa gheimredh** *let fat food be given in the winter* 15; **na neithi remhra** *the fat things* 24.

Ria *to them*, Mod. **riu**; **na daine dambia cudrumacht ria** *the men to whom is equableness—ceteris paribus* 19.

Riaghail *a rule*, G. **riaghailt**, Lat. **regula**; **et is riaghail for-lethon** *for it is a very broad (comprehensive) rule* 25; **riaghail do bir Damasenus** *a rule which D. gives* 20.

Righinn *tough*, **righne** *toughness*; **o reimhe ocus o righne** *from fatness and from toughness* 12.

Ríghthigh *for righe*, G. **ruighe** *the forearm—the base in ruigheachd* *reaching*; **ar bunuibh in righthigh** *upon the roots (proximal ends) of the forearm* 27.

Rísineadha *raisins*; **déis na figeadh ocus na rísinedh** *after the figs and the raisins* 19.

Roime *before, before it*; **go fétfadh stuider do dhenamh déis bídh mar do dénadh roimhe** *that study may be made after meat as done before it* 5.

Rósdagh *roasting*; **na h'éin do niter do droch rósdadh** *the birds that are badly roasted* 24; **neithi róstaighiti remra** *roasted fat things* 24; **na neithi rostuaighithi** *the roasted things* 24.

Ruadh *red*, G. **ruadh** *ruddy*, W. **rhudd**, Corn. **rud**, Bret. **ruz**, Lat. **rufus**, Gk. **έρυθρός**; **lucht lenna ruaidh** *those of ruddy humors* 18.

Ruigim *I reach, attain to, experience*; **ypocondria do righeadh** *to experience hypocondria* 4, 5.

S

Sail-cuach *the violet*; **potaitsi do...ocus do sail-cuach** *a pottage of... and of violets* 23. The Gaelic name is pretty and appropriate **sáil** *a heel* + **cuach** *a cup*, from the hollow spur formed by the lower of the five petals. This

is the same word **cuach** which has gone into lowland Scottish as **quaich** a drinking-cup.

Saithsi *sage* borrowed from English; **do saithsi ocus do persillidh** etc. *of sage and of parsley* 23.

Saland *salt*; **maille saland ocus re cuimin** *along with salt and with cumin* 23; **ocus iasg sailti** *and salted fish* 22.

Salchur G. **salchar** *filth* from **salach** with root **sal** *to dirty*; **glantur salchur na súl** *the filth of the eyes is cleansed* 27.

Samhradh *summer*; **sa t'samradh** *in the summer* 23; **ocus isin th'samradh** *and in the summer* 13; **eslaintibh in t'samhrugh** *the diseases of the summer* 21.

Saothair, *labour, exercise*; **a h'aithle sin denadh saothair ocus siubhal mesarrdha** *after that let him do exercise or moderate walking* 9; **déis in thsaothair** *after the exercise* 9.

Sástur from **sásaim** and **sásaighim** *I satiate, satisfy*, G. **sáth** *plenty*, Lat. **satis**; **gurub amlaidhi shásfaidhter in corp "sic corpus refice"** 14; **oir sástur in nádur o** *began for nature is satisfied from a little* 14.

Sáth *satiety, plenty*, base of **sastur** etc. which see; **ni dligheann neach a sháth do caithimh** *a person should not eat his "fill"* 10.

Scruball, Lat. **scrupulus**, the twenty-fourth part of an ounce 28 —twenty grains.

Sea *six*, **seathadh** *sixth*; **sa caibidil deighinuigh don seathadh leabhur do Colliget** *in the last chapter of the sixth book of Colliget* 11; **sea huair dég** *sixteen hours* lit. *six hours (and) ten* 11.

Seachnadh from **seachainim** *I shun, avoid, miss, pass by*; **seachnadh cáisi** *avoid cheese* 22; **dlighear an biadh righin do shechna** *the tough food should be avoided* 25.

Seachran *an error, going astray*; **adeirit drong go seachranach** *some erroneously say—that* etc. 2; **ocus seachranuighi brigh dileaghaidh an gaili** *and it will pervert the power of digestion of the stomach* 4; **is coithcenn t'shechranuighius in drong lerbáil cuisli doligen um féil stefain** *those commonly err who would wish to bloodlet about the feast of Stephen* 21; **madho rindeadh sechran** *if an error (or mistake) was made* 11; **ocus is sechranach do nid sin** *for they are wrong who do this* 17; **condentur sechran mór** *that a great mistake is made* 21.

Secired *secrets*; **secired a chroidi** *the secret of his heart* 28.
The heart is sketched, not written.

Sefalica written for **Cephalica** *q.v.*, 27; the outer superficial vein of the upper arm.

Seiledh *mucus*, G. **seile** *spittle, rheum*. **Glas-sheile** is G. *water-brash*. The meaning here 9 is to cleanse the nose and chest; **indarbadh ainnsin . . . le seiledh ocus le himur-cracha na sróna** *let these things be expelled with the mucus and the superfluities of the nose and chest* 9.

Seimh *mild, placid, tender*—used in the text of things more easily digested; **oir is seimhe in chilus na in t'aran** *for the chyle is tenderer (nearer digestion) than the bread* 11.

Sen *old, aged*; **na sen-daoine** *the aged men*, **mar na sen-daoinibh** *like the old men*—or persons 24; **na sen-daoine on t'sendacht** *the old men from their agedness* 25; **an sen-duine on thsenordhacht** *the old men from their great agedness* 6. **Senordhacht** has a specific meaning = the fifth age of life “from 54 to 84” O.R.—Note, Col. 6.

Seregra *dry eczema?* Lat. *seresco*; **ocus fóiridh in seregra bis inntu** *and it will relieve the seregra that is in them* 27.

Sesamh *standing* from **seas** *stand*, Lat. *sisto*, Gr. *ἵστημι*; **oir is ferr cumsanadh ina sesamh** *for it is better to rest standing*—or not in motion 12.

Sesar, *Caesar*; **tainic in t'ímpir .i. Sesar** *came the emperor that is Caesar* 28.

Sgairt *the diaphragm* the “separator” from **sgar** *separate*; **ar in sgairt** *upon the diaphragm* 4.

Sgeigheadur *for and from* **sgeathaim** *I vomit, reject*; **gur sgeigheadur bídh ocus leighes . . . mar gabatar iat mí roime sin** *that food and medicines were vomited just as they were when taken a month before that* 12.

Sgríbhadh *writing, to write*; **do[s]gríbadh** *to write* 28; **oir is doigh gurub e in sgribneoir fuair nuimir éigin sgríbhtha** *for it is most likely that it was the writer (copyist) who found some number written*—and mistook it, placing nine by error for sixteen 11.

Siasanach *a humming, singing noise*; **oir do gendaois . . . siasanach isna clusaibh**, *for they cause a singing in the ears* 14.

Simphoreanuis 22; **ocus in fhoghmar a féil S.** *and in the autumn in the feast of Simphoreanus*.—Aug. 22nd.

Singcoipis Gk. *συγκοπή* *a fainting away, swooning*; **isín t'singcoipis tig o anmhfainne** *in the syncope which comes of weakness* 7.

Sínedh 9 and **sínfedh** 12, from **sínim** *I stretch*; **sínedh artús a lámha** *let him stretch at first (or first thing) his hands—arms* 9; **ri sínfedh sin** *with the stretching (or extending) of that* 12; **ni do réir shínte na cainndighechta** *and not according to the extension of the quantity* 15.

Sínnsir *ginger*; **dlighear a caithimh maille sínnsir** *it ought to be used along with ginger* 18.

Sír, G. **sior** *long, continual, constant*, W. Corn. Bret. **hír**—the base of **siorruidh** *ever-lasting* and **gu siorruidh** *forever*; **abair gurab fallain na cnó do sír do na h'aeibh** *say that the nuts are always healthy for the livers* 19. I think the scribe, as myself certainly, was nearly misled by the contiguity of **Abhfullana** *nuts* for “**gur abfallain**” here, for the writing clearly shows the correction.

Sirioipighi *the syrups*; **mar ataid na sirioipighi** *as are the syrups* 8.

Siubhal *motion, a movement, journey*; **an biadh aga chur ar siubhal** *putting the food in motion* that is causing diarrhoea. The word is in common use for diarrhoea; **tha siubhal air** *he is relaxed*. It is also used for *death* in a high and fine sense; **shiubhail e** means *he is dead*, but literally *he is gone*—on a journey. Gaelic has no expressed concept of the individual extinction by death. **Chaochail e** is perhaps the most common expression in everyday use and it simply means *he has changed* the same as is used for a change in the weather or in the face of the sky. **Siubhal áilginach** *a gentle walk* 12; **siubhal mesarrdha** *a moderate walking* 9.

Sláinte is simply *wholeness* based upon **slán**.

Slán *whole, healthy* Lat. **salvus** *safe* and **solidus** *firm* and the Gk. *ὅλος* = *σολος* *whole* are all akin in origin and idea as in form.—See **Slainte** and **Euslaint**.

Sliastadh Gen. of **sliasaid** *the thigh*; **ar lár na sliastadh** *upon the floor (or flat part) of the thigh* 27.

Sligheadh *a journey, a way*, G. **slighe**; **ag iarraidh sligheadh amach** *seeking a way out* 10.

Slinnen *the shoulder-blade, scapula*; **itir in dá slinnen** *between the two shoulder-blades* 27.

Slug *swallow*; taréis thsluigti an grema *after the swallowing of the mouthful or bite* 8.

Snamh *swim* Lat. *no, navi*, Gr. *ναώ*; *no do beradh ar snamh e or it will be set swimming—the food* 8; *am biadh ar snamh sa ghaili the food a-swim in the stomach* 5.

Socamhuil *rest, ease*—same base as in G. *socair ease* and in *sochd silence*; *ataid naoi socamhuil do beir in fíon glan duit there are nine eascs (rests, pleasures) that clean (pure) wine gives thee* 25.

Sofena *the Saphenous vein*—in this case almost certainly the external or short Saphenous, because the operation is *ar lár na colpaid on the floor or flat of the calf*, where the Ext. Saphenous runs 28.

Soithech *a vessel, dish*; *gidhedh da faghaid in soithtech nemh-glan truailter gu ro-urusa iad nevertheless if the vessel is got unclean they are easily polluted* 22.

Spinarchia, *spinache*; *ocus do spinarchia and of spinache* 23—*garden spinache, spinacia oleratea*.

Spirutalta *spiritual*; *folmaighe si ann sin ona ballaibh spirutalta it will then (or perhaps better there) empty (or draw away) from the spiritual members or what would now be called “the higher centres”—compare na ballaibh ainmhidhi the animal parts* 27.

Squinancia, Old Eng. *Squinancy, Quinancy, Squinsy, Quinsy* Gk. *κυνάγχη*; *ar eglá squinancia for fear of quinsy* 20.

Srón *the nose*; *imurcracha na sróna the superfluities of the nose* 9.

Stefain (**Féil**) *the feast of St. Stephen*; *um féil stefain about the feast of Stephen* 21.—December 26th.

Stipeghdha from Lat. *stipo I press closely together* ∴ *constipating, dlighear torrtha stipeghda do chaithemh constipating fruits ought to be used* 18.

Stranguria *σπραγγουρία a choking of the urine*; “*stranguria interpretatur guttatim urine emissio*” *ionnarbadh an fhuail na braonibh* 28.

Struccio, *the ostrich*, Lat. *struthio*, Gk. *στρούθιον*.

Stuider *study* seems to be just the Eng. word borrowed. It has a very un-Gaelic feeling.

Subhaltach *joyful* from *subha pleasure, delight*, G. *subhach merry*; the opposite of *dubhach sad*—for *so-bo-io* and

do-bo-io "well be-ing" and "ill be-ing"; **ocus do bir** in **croidhi subaltach** *and it gives the merry heart* 26.

Substaint, the Lat. *substantia*; **na bit én raod da substaint** *and let there not be anything of its substance in it* 23.

Suighi *the seat*, "anus"; **na h'éighingh go láidir do shuighi** "nec cogas fortiter anum" 26. **Muna dernter angar do beith a suighi e** *if it (sleep) is not done in a nearly sitting position* 13.

Suilbhir *cheerful*; **bith menma t'shuilbir agut** *let you have a cheerful mind* 13.

Suili (na) *the eyes*, **súil** *an eye*, W. *haul*, Corn. *heuul*, Bret. *heaul*, Lat. *sol*—*the sun*. The eye is the sun of the body as the centre of our planetary system is its great light; **eslainti na súl** *diseases of the eyes* 27.

Suiper the Eng. *supper*; **ocus na denuid acht super beg** *and do not (take) but a small supper* 22.

Sul *ere, until*; **sul do biritt dan [a]íri iad** *before they are brought to their attention* 24; **sul dileaghtar go h'ímlan e** *before it is entirely digested* 11.

T

Tabhair *give*; **na neithead is intabhurta** *the things that are forbidden* "un-give-able" 9; **ni dlighear atabhairt déis na coda** *it should not be given after the meal* 6.

Tachmaingnid from **tachmaingim** *I surround, embrace*; **ocus gu tachmaingind e** *and that it is surrounded* 13.

Tadhbais *firm, thick*; **línadh tadhbais o lenna ruadha** *a thick fullness from red humors* 10.

Taidhillter from **taidhim** *I adhere, join to*; **intan taidhillter e** *in the time (or when) it adheres* 25.

Taighter from **taig** *custom, habit*; **an aimsir as an dtaighter an indharbadh** *in the time in which it is customary to expel them, that is, the usual personal habit* 14.

Táinic *came*, "vénit" **táinic in t'ímpir** *the emperor came* 28.

Tairngter from **tairngim** *I pull*; **conach tairngter an biadh cum nan ae** *so that the food may not be drawn towards the livers* 13; **ar na tarruing cum béil an ghaili** *being drawn towards the mouth of the stomach* 10.

Tanuisti *anything second whence* **tanist** *heir apparent*; **an meur tanuisti** *the second finger* 9; **Pilip tanaisi an tíre**

- P. the tanist or heir-apparent to the government O.D.; hi persin tanaisi "in persona secunda" Sg.*
- Taobhaibh, taobh** *a side, flank.* The Welsh, Corn. and Bret. is *tú* and the word is indeed so pronounced largely over the North of Scotland; **do gendaois duinte isna taobhaibh** *it will cause constriction in the sides* 14.
- Tar** *over, across, beyond, W. tra, Lat. trans, Sansk. tar; na neithi... connaimhter tar oidchi the things that are kept over night* 25; **ocarus tar a gnáthughadh** *hunger beyond ordinary—beyond customary* 10.
- Tarbhach** *useful, profitable, effectual; caindighecht is tarbhach the quantity that is useful* 8; **is tarbhach cum an dileaghtha tart d'fhulang** *it is effective towards digestion to suffer thirst* 8.
- Tharr, do tharr in bradain** *as regards the belly of the salmon* 19.
- Te** *hot, G. teth; gach uile ní inafuil betha is te e everything in which is life is warm* 3; **na cuirp theo** *the warm (or hot) bodies* 3; **arna theghadh** *after being warmed* 9.
- Teagaisgigh** *from teagaisg teach, instruct; teagaisgigh an ealadha leighis the skill of healing teaches "medicina docet"* 14.
- Teasargadh** *from teasargaim I save, rescue; fettur a remh'-choimed no a tesargadh re neithibh fuara it may be prevented or saved by cold things* 2; **do teasargadh ar na h'eslaintibh** *to save against the diseases* 21.
- Teghni, Gk. τεχνίς; sa treas partegul do theighni** *in the third particle of his Work* 2.
- Téghmand, from tégmairs it happens; oir ni thegmhand so for this would not happen 4.**
- Teine** *fire; na sa teine than in the fire* 2; **go gar do theine** *close to a fire* 22.
- Teintighe** *fiery based on teth hot and teine fire, W., Corn., Bret. tan; do loisgfidhe on tes teinntighe e it would be burned because of the fiery heat* 16.
- Teirt** *sunrise; roimh an teirt before sunrise* 16. Note, Col. 13.
- Tes** *heat, warmth, W. tes, Corn. tes, Bret. tez, Lat. tepeo, Eng. tep-id; oir in teas íseal is fuar am bél an lega e for the low heat is "cold" in the mouth of the physician* 2; **le neithibh tesaighi** *with warm things* 3; **go fuil an fín tesaighi tirim** *that the wine is hot (and) dry* 3; **tre tes na h'aimsiri** *through (because of) the heat of the season* 21.

Texa *a text*, from English; **a coimint an texa so commenting** upon this text 2; **ag tuigsin an texa sin understanding that** text 2.

Timprail not a very Gaelic word. It means "stirring up"; **arna coimusbh agus arna timprail mixed and stirred**—the food in process of digestion 8.

Tindsgaint and **Tinnsgnius** from **tinnsgnim** *I begin, commence*; **cend do tinnsgaint an geimhrioh the head of the beginning of the winter** 22; "**iemis caput est orientis**"; **go tabhair tindsgaint loighi...furtacht mór that the beginning of lying down**—an after-rest—gives great assistance to digestion 13; **cahuair thinnsnuid aimsira na bliadhna what time the seasons of the year begin** 22.

Tinneas *sickness, here pain*; **tinneas in cind pain of the head** = headache, retaining the old pathological idea of "**strictum**" or tension. It is widely used now, as here of *pain* **ocus fóiridh tinneas in cind goháirighi** 27, **tinneas na h'urchoid orchitis tinneas mara sea-sickness**; **tinneas cléibh chest disease, etc.**

Tirim *dry*; **na cuirp tirma le neithibh tirma the dry bodies with dry things** 3; **le neithibh tesaighi tírma árdá with warm, dry, high things** 3.

Tirmuighi from **tirmuighim** *I dry*; **oir tirmuighi an stuidir iad for the study makes them dry** 24.

Tochlughadh *desire*, **intan tinnsgnius a thochlughadh go nádúra when his desire (for food) begins naturally** 9; **na tuitim tochlughadh do beith air nor that a failure of desire (appetite) should be upon him** 5; **fuighleoh tochlughadh remnant of desire "reliquie desiderii"** 4.

Togairmigh *will call forth* from **to + gairm**; **togairmigh an t'allus it will call forth the sweat** 26; **togairmidh in fuil místa it will call forth the monthly blood = menses** 28.

Toghtar from **toghaim** *I choose, select*; **sa geimhredh toghtar in uair bhus teo in the winter the warmer time is chosen** 17; **uair toghnidhi na bliadhna the chosen time of the year** 21.

Togra *inclination, desire, disposition*; **arson na togra ata aige because of the inclination it has** 1.

Toirmisges, from **toirmisgim** *I forbid, hinder, prevent*; **nach toirmisgind in lá "diem non impedit" that does not prevent (it) in the day** 13; **ocus toirmisgit in stuider and it will prevent the study** 5.

Toirtheagh *fruit*; **gidhedh** *is ferr na toirrthi uile do trégin nevertheless it is better to shun all fruit* 18; **re gach uili truailleadh tic ona toirthibh** *because of all the pollution which comes of fruits* 18.

Tolladh from **tollaim** *I bore, pierce, excavate*, G. **toll** *a hole*, W. **twll**, Bret. **toull**; **arson co tabhair ar an mbiadh tolladh sul dileaghta e** *because it makes the food penetrate (pass out of the stomach) before it is digested* 6.

Tosach *the beginning*, G. **toiseach**; **uair imcubidh caithme in potaitsi a tosach na coda** *the proper time to use the pottage (is) at the beginning of the meal* 23.

Tosgaithes from **tosguighim** *I move*; **ocus da tosgadh e began uaithi** *and if it should move (or depart) a little from it (natural custom)* 17; **gidhegh mad mór in tosgadh** *nevertheless if the departure (from nature) is great* 17; **intan tosgaighius go h'imurcrach** *when it moves superfluously* 5.

Trachtadh, Lat. **tractus**, *a tract, treatise*; **sa treas trachtadh** *in the third tract* 11.

Tráth *a time, season*; **tráth ata sa bél** *while (the time) it is in the mouth* 8; **trátha muiri** *the times of Mary* 9; **dentur o mhaidin gu tráth** *let it be done in the morning, early* 13.

Trátha *Times*; **tratha muiri** *the Hours of Mary* 9.

Tréiginus from **tréig** *shun, avoid*; **is ro-urus alis na sen-daoinibh in tréiginus d'fulang** "**senes facilime ferunt ieuenum**" *the old men most easily bear abstinence* 25.

Treorughadh "**reductium**" Inf. of **treóruighim** *I guide*—a supremely wise and comprehensive word; **dlighear a treórguhadh tar a ais** *he should or must be guided back—to his first condition* 17; **ocus is e sin a treorughadh cum a contradha** *and that is to lead it towards the contrary* 3.

Truaillett from **truail** *pollute*; **ocus truailidh in cuimhne** *and it will pollute the memory* 21.

Truimidecht *heaviness*, from **trom** *heavy*, W. **trwm**, Corn. **trom**, Bret. **troum**; **gan cuirreneacht na gaothmairecht na truimedecht** *without cramps or flatulence or heaviness* 5; **ocus tromaighi an chorp** *and it will make the body heavy* 7.

Tuathadh *the people*, G. **tuath**, W. **tud**, Bret. **tud**, Corn. **tus**, Gaul **teut**, akin Lat. **totus**, Lett. **tauta**; **do reir na tuathadh** *according to the people* 21.

Thubhairt Past of **abair** *say*; **mar a duburt artís** *as I said at first* 3; **ocus adubhrumar** *and we have said* 3.

Tuca *towards them*. This is the Scottish Gaelic form for **chuca** as we have **thugad** *towards thee* for the older and etymologically more correct **chugad** and **Cugat**, which see.

Tucaoi from **tug**, G. **thug** *give*, should be **tuctaoi** 16.

Tuigsin *understanding*, Inf. of **tuigim**; **a deirit drong**... **a tuigsin an texa sin** *some say... understanding* (or interpreting) *that text* 2; **ocus is uime sin nach dligher a tuigsin** *and it is therefore it should not be understood that, etc.*, 3; **ocus tuicter so o Auicina** *and this may be understood from Avicenna* 13.

Tuilleadh *more*, the Inf. of **tuilim** *I enhance, increase*; **tuilleadh fós** *more yet, furthermore* 14; **misur ina tuillfedh oirett éndige amáin** *the measure (as much) as is taken at one drink only* 7.

Tuirlingha *a descent, fall*—based upon an old verb **lingim** *I spring, jump*; **moille tuirlingha** *the slowness* (or delay) *of the falling*—of the food 11.

Tuitim, Inf. of **tuitim** *I fall*; **dambia coimplex lenna find ar tuitim do thuithim aicidigh chum fuarachta ocus cum flichada** *and if a general health of pale humors* (perhaps we should say *an anaemic person*) *was fallen to a diseased fall* (or state) *towards coldness and towards moisture* 3; **no go tuitinn an biadh** *until the food has fallen*—into the stomach 6.

Tuma from **tum** *dip*; **ocus ar tuma an méir tanuisti** *and after dipping his second finger in it* 9.

Tusga *easier, rather*; **mar is tusga tochlughes an nádur e** *as nature rather desires it* 14.

U

Uachtar *surface, upper part*; **uachtar baindi** *the surface of milk that is cream* 23. In Scottish place-names as **Aughter** and **Ochter** *the upper ground*; **na an uachtar** *or above* 10.

Uaigh *a grave*; **ocus rofhurail an uaigh... d'oslugadh** *and he commanded the grave to be opened* 28.

Uair *an hour, a time*, from Latin *hora*; **uair** and “*time in*”—and out 1; that is, *occasionally*—a pure and peculiarly Gaelic phrase; **toghtar in uair bhus teó** *let the warmer time be chosen* 17; **uair in proinnighthi** *the time of eating*

16; **uair sa mhí** *once a month* 5; **a cé** *oir the first time* 9; **sia huaire** *six times* 15.

Ubhal *an apple*, W. **afal**, Corn. **auallen**, Bret. **avallen**—all which suggests a kinship with **Auellana** *the hazel nut*, named upon Avela a town of Campania famous for its fruit; **le croicinn an ubhaill buidhe** *with the skin of the yellow apple* 9—the orange?; **mar ata péredha ocus coctana ocus úbhla** *as are pears and coctanas and apples* 18.

Uighi *eggs*; **dlighear a fis go combfurtachaidh na h'uighi ocus a caibhdél in drong bis déis cuisli** *it should be known that the eggs and their custard comfort those who are after blood-letting* 22.

Uilidhi, go h'uilidhi *entirely, altogether*; **an aighi... brotha in cuirp go h'uilidhi** *and against eruption of the body generally* 27; **aimsir na bliadhna uile** *the time of the whole year* 21.

Uircill *water-melon, pumpkin*; **duille uircill** *the leaf of the melon* 9.

Uireasbhuidh *defect, want of, failure*; **egail uireasbhuidh na brighi** *the fear of the failure of the strength* 7.

Uirri *upon it*—See **Orra**. This is the Fem. sing. form.

Uisge *water from a root* **ud**, Gk. *ὑδ-ωρ* Sansk. **ud-an**, Lat. **und-a**; **a h'uisgi fhuar in t'shamradh ocus a h'uisgi the sa geimredh** *out of cold water in the summer and of warm water in the winter* 9.

Uisgemail *wateryness from Uisge*; **uisegemailmí-tarbhach** *unsubstantial wateryness* 18.—See **Tarbhach**.

Ullma Compar. of **ullamh** *prompt, ready* **air + lamh** *a hand* ∴ *handy*; **adeir aueroys gurub ullma... leaghtur iarann mór** *A. says that (a) large (piece of) iron is sooner or more promptly melted* 2.

Ullmaighim *I prepare, make ready*; **ocus ullmuighit a biadh** *and let his food be prepared* 9; **oir ullmuighit nech cum lúbra** *for it prepares (predisposes) a person towards leprosy* 12—Note.

Umorro *yet, besides, over and above*—the use of the word is not at all definite, but it is always on these lines. It occurs frequently; **umorro a deir in fersaighiteoir** *and so the versifier says* 21; **an saimradh umorro aimsir ro-te é the summer moreover a very hot time it is** 22.

Unsa *an ounce*, here the Troy or pharmaceutical ounce of 480

grains.—See the “signatures” 28, that is, fol. 14*b* of the text.

Urail from *furailim* *I offer, incite*.—See **Furail** in another “side” sense; **ocus ro-(fh)urail eolus ocus áithi bais ocus betha** and he offered or taught the knowledge and prognostics of death and life 28.

Urbanuis (Féil) *the feast of St. Urban; in samhradh a féil Urbanuis in summer in the feast of Urban* 22.—May 25th.

Urchoid *hurt, harm*. The verb is *urchoidim I hurt; is ro-mór urchoidighius móran in biadh san oidche too much food at night greatly hurts* 14; *urcoidigid na neithi omha the raw things hurt* 24.

Urlugadh *vomiting, spewing; ocus gan urlugadh na “apititus caininus” without vomiting or dog-ish appetite* 5.

Urusa, gu ro-urusa *very much easier*. The base is **usa** *easier* from Old Irish **asse** “*facilis*” and **assu** “*facilius*,” in G. as **fasa** Compar. of **furasda** *easy*. **Ro-urusa** has a double intensive in it **ro + air + usa** ∴ *very much easier; truaillter go ro-urusa iad they are be-fouled much more readily* 22. There is a further Compar. **innus gumadh usaide tarrongtar an ní . . . cum nan ae** *so that the thing (digested) is drawn towards the livers* 13; **is usa na boill ele do dileaghadh** *it is easier to digest the other parts* 18,—the other parts are easier to digest; **ni héidir ocus ni h'urusa** *it is not necessary and not easy* 10.

Y

Ypocondria seems altogether out of place here 4. It does not read well into the text and may be disregarded.
